EMS	504	Communications and Sustainability I	One of the greatest challenges for leadership in sustainability is multidisciplinary communications. Currently, sustainability itself lacks meaning and emotion, which leads to a lack of commitment and execution. Therefore, all future executives must be proficient communicators who can convey vision and human context to the organization's sustainability initiatives. Helps you survey your internal communications environment, understand students target audiences and their unique customer centricities and develops their voices through the use of proven story structure.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 502, 503. Corequisite(s): EMS 505
EMS	505	Sustainability Leadership I	The practice of leadership in sustainability requires leading in multidisciplinary roles across multiple scales of an organization. In many of today's organizations, leadership must identify, communicate and support novel organizational contexts as sustainability emerges. Enables students to meld powerful and traditional leadership skills while challenging the student's prior knowledge with multiple lens of leadership in a sustainability context. Students create a personal plan for their unique needs and personal growth toward sustainability leadership.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 502, 503. Corequisite(s): EMS 504
EMS	506	Global Context II	As material sustainability issues are identified and prioritized and as the organization applies sustainability as core success platform, the organization looks to mitigating risks outside of its control, shaping the risks it can control, and creating new opportunities and leveraging those identified in the process. Global context comes into focus not only in expanding resource relationships and concerns, but also across dimensions of time, responsibility, success and a growing need to engage with an ever-growing group of stakeholders and potential partners. Organizations and leaders must innovate and execute at all levels of the organization to match the evolving reality. Explores and applies global sustainability as a knowledge platform for ongoing success, organizational innovation and effective organizational leadership.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 504, 505; Corequisite(s): EMS 507
EMS	507	Strategic Sustainability II	As sustainability becomes a core strategic goal of any organization, it impacts all aspects of the organization from informing risk and reward to the definitions and dimensions of innovation and overall success. Uses reframing, re-visioning and backcasting via a sustainability lens as constructs for introducing strategic sustainability across all aspects of an organization--both internally and externally. Applies various methods such as natural capitalism, design for sustainability/method of sustainable product design, Anderson method, cradle-to-cradle and framework for strategic sustainable development to develop flexible action platforms for sustainable enterprises. Students create a strategic vision, action plan for an organization, including critical external partnerships with communities and institutions.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 504, 505. Corequisite(s): EMS 506
EMS	508	International Immersive	The international immersive experience takes place in a compelling location where all the challenges and opportunities of sustainability are in play. It is designed as a dynamic vehicle to make real-world connections to sustainability leaders, projects and communities, and is among the most memorable experiences of the program. Students "see" and "feel" sustainability from another country and culture's perspective and see the overlap and conflict to their own context. Extending one's professional network to other host countries and generating a reflective experience and analysis report are experiential learning artifacts that are generated from this experience. Collaborative teams work through a sustainability case study and present their solutions.	N	SEM	N	OPT	School of Sustainability	School of Sustainability	1.		Prerequisite(s): EMS 506, 507
EMS	509	Communications and Sustainability II	Marketing and communication professionals in all industries are attempting to keep up with the rapidly expanding landscape of multichannel communications. This is especially true in sustainability, given that the Chief Sustainability Officer must understand and appreciate the modes of communications across all platforms, not just in the consumer market. Maps internal, external and target audiences/markets; strategizes channels to reach them with sustainability stories; and creates a multichannel communications plan that incorporates modes of engagement for all audiences.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 506, 507. Corequisite(s): EMS 510. Pre- or corequisite(s): EMS 508

EMS	510	Sustainability Leadership II	As sustainability emerges as a core strategic platform for an organization, leadership and sustainability intertwine; leadership opportunities--and responsibilities--greatly expand; thus requiring innovation. Individual leadership and organizational leadership are asked to find opportunity via extended definitions of critical systems; value webs, increased roles for diverse internal and external partnerships, and the need to lead within increasingly complex and unpredictable global systems. Engage students to challenge their prior definitions of systems, responsibility and community from the perspective of sustainability and leadership and provides a toolbox for leading with sustainability as a fundamental success platform.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 506, 507. Corequisite(s): EMS 509. Pre- or corequisite(s): EMS 508
EMS	511	Global Context III	Sustainability leaders help their organizations recognize when material issues require solutions that extend beyond their control or capabilities, and when to look for, participate in and potentially lead industry, cross-industry, regional or other collaborative approaches. Global sustainability context becomes an increasingly proactive concept where individual and organizational responsibility and success extends to a global scale. Organizations organize themselves as agents of change toward sustainability that aligns with more traditional organizational success. Students learn from successes and failures of current and past attempts and assess the implications for this change in leadership perspective to their organizational context.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 509, 510. Corequisite(s): EMS 512
EMS	512	Strategic Sustainability III	Organizations that aim at sustainability come to recognize that they must be part of sustainable success on all scales, from local to global, from internal to external and for today and tomorrow. Tools such as resource plans, investment pathways, stakeholder engagement and policy influencers set the theatre for sustainability-oriented organization to challenge the status quo and advance agendas that embed both success and sustainability. Students apply their enhanced strategic sustainability skills to examine select case studies on international sustainability in corporate and nongovernmental agencies.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 509, 510. Corequisite(s): EMS 511
EMS	513	Communications and Sustainability III	Most stories of sustainability are driven and told with data as its central character. Unfortunately, data is nearly meaningless to our minds unless it is placed in an illuminating human context. The best chief sustainable storytellers bring meaning to data through the use of metaphor brought to life by thought-provoking narrative. Story grips the mind and propels people forward. Students develop proof of concepts for campaigns, expand social media presence and influence, create and record a 20-minute presentation in the style of a TedTALK, and become a leader in sustainable communications.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 511, 512. Corequisite(s): EMS 514
EMS	514	Sustainability Leadership III	Lasting, sustainable change fully takes hold once ownership and accountability extends well into the organization and community. Engages the student to identify and apply pathways to inspire, persuade and influence others to act toward a shared global vision. Future orientation, reframing organizations to be globally scalable and still be locally focused, leadership best practices for diverse, multinational, and international human talents and redefining success and growth using sustainability as a success lens are great tasks that sustainability leaders face.	N	LEC	N	OPT	School of Sustainability	School of Sustainability	2.		Prerequisite(s): EMS 511, 512. Corequisite(s): EMS 513

GLG	327	Earth's Critical Zone	The Earth's near surface environment (the "critical zone") supports most life and is the dynamic interface between the solid Earth and its fluid envelopes where much of the geologic record is produced. We now know that we face rapid climate change and the consequences of changes in land use, water resources, and ecosystems. Critical to planning a response to, or mitigation of, environmental change is understanding how the Earth surface works. Focuses on how changes to the environment manifest themselves in the critical zone--in the form and function of the Earth's surface (landforms, water resources, soils, ecosystems). Offers a quantitative introduction to the form and function of the processes impacting the Earth's critical zone to build an understanding of the interactions of physical, chemical and biotic processes in shaping the surface and determining fluid, solute and sediment fluxes. Many assumptions made by policy makers and other constituencies as well as competing social and political considerations shape the development of policy in higher education. Given the importance of federal and state public policy-making to higher education, we examine the effect of public policy on the functioning of colleges and universities and explore the various facets of public policy issues. HST	404	Conquest	How did Hernan Cortés and Francisco Pizarro defeat the Aztec and Inca Empires? Despite numeric inferiority, limited provisions, and little knowledge about the Americas, Cortés and Pizarro defeated advanced civilizations that had experienced warriors and millions of inhabitants. Possible explanations include the conquistador's valor, advanced weaponry, superior military strategy, Indian allies, and biological attacks. In their encounters with native peoples of the Americas, Europeans were not always conquerors. Álvaro Núñez Cabeza de Vaca and Lope de Aguirre failed both in their attempt to conquer a large Indian civilization and in their effort to find mineral wealth. A few Europeans such as Bartolomé de Las Casas spoke out against the abuses committed against the Indians during the conquest. Explores these issues from the perspective of both Europeans and native peoples and looks at the long-term impact for Latin America and its peoples.
