HED	702	Critical Policy Issues In Higher Education	How great expectations in Washington are dashed in Oakland. Pressman and Wildavsky (1984) state that "policies imply theories--Whether stated explicitly or not, policies point to a chain of causation between initial conditions and future consequences." Policy can be broadly defined as a principal, plan, or course of action undertaken by governments, organizations, or individuals and designed to influence and determine decisions and actions. Many assumptions made by policy makers and other constituencies as well as competing social and political considerations shape the development of policy in higher education. Given the importance of federal and state public policy-making to higher education, we examine the effect of public policy on the functioning of colleges and universities and explore the various facets of public policy issues. Examines critical policy issues for higher education and the assumptions underlying their development.	N	LEC	N	GNA	MaryLouFulton Teachers College	Educational Leadership & Innovation, Division	3. Doctoral students review theoretical concepts related to ethical decision making and apply them to moral dilemmas in higher and postsecondary education leadership, policy-making, and organizational change. HST	404	Conquest	How did Hernan Cortés and Francisco Pizarro defeat the Aztec and Inca Empires? Despite numeric inferiority, limited provisions, and little knowledge about the Americas, Cortés and Pizarro defeated advanced civilizations that had experienced warriors and millions of inhabitants. Possible explanations include the conquistador's valor, advanced weaponry, superior military strategy, Indian allies, and biological attacks. In their encounters with native peoples of the Americas, Europeans were not always conquerors. Álvaro Núñez Cabeza de Vaca and Lope de Aguirre failed both in their attempt to conquer a large Indian civilization and in their effort to find mineral wealth. A few Europeans such as Bartolomé de Las Casas spoke out against the abuses committed against the Indians during the conquest. Explores these issues from the perspective of both Europeans and native peoples and looks at the long-term impact for Latin America and its peoples. Through lectures, presentations, readings, listening examples and video/DVDs, studies music identified as strong examples of the major periods, composers and compositions in the history of music. Students learn and adopt a minimum new language to help express the elements of music they experience and listen to and develop strategies for writing and communicating about what they hear and put words to how they respond to it. Because experiencing music performed live is an integral part of the learning process, students are required to attend concerts outside of class and submit critical reviews of what they hear.
