| CHS     | 305         | Principles of Prevention & Public Health Surveillance | Disease surveillance and population health monitoring represents one of the most important tools for public health, for early disease detection and prevention, and the monitoring and evaluation. Early detection of and rapid response to a public health threat has huge potential to save lives and costs from preventing hospitalizations and deaths. This course provides an overview of different types of surveillance systems and the sources of data that are used in such systems. Students learn to assess challenges and limitations associated with different types of public health surveillance systems and develop the skills to examine the tools and approaches that can be used to improve the effectiveness of public health surveillance systems. The course looks at principles of disease prevention more broadly. Public health prevention measures are discussed including immunization and screening, using case studies for both communicable and non-communicable diseases. The role of epidemiological and social factors is also considered. | N                 | LEC               | Y               | NSW           | College of Health Solutions   | School for the Science of Health Care Delivery | 1-3   |                 | Prerequisite(s): Bachelor of International Public Health major; Pre- or corequisite(s): CHS 301; CHS 304; HCD 300 |
| CHS     | 306         | Public Health Policy & Programs                       | The overall aim of this course is to enable students to develop their understanding of both public health policy and programs as a part of public health practice. Students will learn about the concept and role of policy and the key concepts, models and approaches to designing and evaluating public health programs. Case studies from multiple countries and contexts will be used as teaching material.  | N                 | LEC               | Y               | NSW           | College of Health Solutions   | School for the Science of Health Care Delivery | 1-3   |                 | Prerequisite(s): Bachelor of International Public Health major  |
| CHS     | 307         | Health Leadership                                     | The course aims to develop students understanding of different approaches to leading and managing at different levels in health services in local and international contexts to improve individual, community and population level outcomes. Students will be introduced to the common and overlapping skills and features of effective health leadership within public health agency settings requiring coordinated system-wide action through to health care management in more clinically focused patient delivery settings. Topics include management and leadership theories and models; systems perspectives and strategic thinking; influence, power and leading change; managing interprofessional teams and motivating staff; conflict management and improving health worker performance.   | N                 | LEC               | Y               | NSW           | College of Health Solutions   | School for the Science of Health Care Delivery | 1-3   |                 | Prerequisite(s): Bachelor of International Public Health major  |
| CHS     | 308         | Comparative Health Systems                            | Principles and practice of health system analysis, the sources and utilization of information relating to health services, and frameworks for assessing health systems performance. Examines the constitutional, legal, economic, social and political environments within which health care systems operate. Compares different models of health system funding and operation. Reviews different health services organization and management, health service financing arrangements and the health workforce.  | N                 | LEC               | N               | GNA           | College of Health Solutions   | School for the Science of Health Care Delivery | 3     |                 | Prerequisite(s): CHS 306  |
| CHS     | 309         | Global Health and Lifestyle Disease                   | This course aims to enhance students' understanding of the major non-communicable diseases-specifically so-called "lifestyle diseases" including cardiovascular disease, cancer, type II diabetes, chronic lung disease- and the interaction between their associated lifestyle behaviors such as unhealthy diet, physical inactivity, tobacco use and alcohol use. Students will examine the concept of the epidemiological transition to provide insights into trends in the burden of lifestyle diseases and injuries globally and in developing countries. This course will help students to evaluate prevention and control approaches to lifestyle diseases, and to critique the modern social environment and lifestyle behaviors with respect to global health. Topics include: the global burden of disease, the epidemiological transition, injury prevention, health systems, global tobacco control, obesity, and global action plan on non-communicable diseases.  | N                 | LEC               | Y               | NSW           | College of Health Solutions   | School for the Science of Health Care Delivery | 1-3   |                 | Prerequisite(s): Bachelor of International Public Health major  |

| COM     | 314         | Inner-City Families: The Cycle of Poverty                       | Examines issues and concerns that confront inner-city families. Blends theory and application. From a theoretical perspective, examines issues that affect families who live in the inner city (e.g., race and poverty), as well as specific skills and programmatic elements that are needed to work with families in an urban setting. In terms of application, provides an intensive service-learning-based experience. Engages students in specific service to an embedded inner-city organization for a minimum of 3 hours per week. Students work with the professor to determine appropriate service placements. | N                 | PRA               | Y               | GNA           | New Interdis Arts & Sciences | School of Social and Behavioral Sciences | 3     |                 | Pre-requisite: COM 100 OR Junior standing; Credit is allowed for only COM 314 or 498 (Inner City Family)                                     |

| CPP     | 101         | Foundations of Cross Sector Leadership | Prepares NGSC track members for success in their four-year journey while also sparking opportunities to develop as a leader throughout their Sun Devil careers. Provides a baseline for ethical decision making which is the cornerstone of effective leadership. This is accomplished through the lens of the public, private and nonprofit sectors. Also explores complex challenges we face and examples of successful cross-sector collaboration that have led to sustainable solutions. Additionally, students develop teamwork, time management, professionalism and respect for fellow NGSC team members.   | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 1     |                 | Credit is allowed for only CPP 101 or CPP 194 (Next Generation Service Corps) or CPP 194 (Foundations of Cross Sector Leadership)  |

| CPP     | 201         | NGSC Community Impact Lab              | Behind every challenge is an opportunity to innovate. Course offers hands-on, service learning opportunities for students within the ASU Public Service Academy--Next Generation Service Corp (NGSC). Using a problem-solving method called human-centered design, student teams work closely with a nonprofit organization, small business, government office or community organization to develop a solution to a critical issue within their organization that is based in research and empathy for the organization and their stakeholders. Beyond learning and applying the design thinking process, students also develop skills in team management, conflict management and reflection.   | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 2     |                 | Prerequisite(s): CPP 101; Credit is allowed for only CPP 201 or CPP 294 (NGSC Community Impact Lab)  |

| CPP     | 301         | Cross-Sector Collaboration             | Examines how public, private and nonprofit organizations seek to address social challenges and explores how the three sectors work together and in isolation to tackle social problems. Students learn about the motivation of employees in the public, private and nonprofit sectors and the ways in which organizational structure, environment and legal contexts differently constrain or facilitate action within and across these organizations. Explores effective strategies for collaboration among the public, private and nonprofit sectors and identifies organizational similarities and points of contrast that could enhance or create barriers to such collaboration.  | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 3     |                 | Prerequisite(s): CPP 101; Pre- or corequisite(s): Public Service Academy student; minimum 45 hours; Credit is allowed for only CPP 301 or CPP 294 (Cross-Sector Collaboration) |

| CPP     | 520         | Program Evaluation for Emergency Management and Homeland Security | Examines core concepts and techniques of program evaluation and policy analysis and applies them to specific challenges in the domains of emergency management and homeland security. Develops knowledge and expertise in the practice of evaluating public sector programs, policies and other agency actions related to hazards issues--both natural and human-made. Develops students' knowledge, skill and ability in identifying appropriate research designs for particular evaluation and policy analysis problems; in managing data and focusing reports based on project objectives; and in appropriately characterizing and presenting empirical those data gathered for program evaluation and policy research projects. Provides an opportunity to learn about conducting evaluation and policy research in a way that is relevant to solving policy and management challenges germane to emergency management and homeland security agencies. | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 3     |                 | Prerequisite(s): CRJ 511; Credit is allowed for only CPP 520 or CPP 591 (Program Evaluation in EMHS)                                     |
| CPP     | 530         | Leadership for Innovation in Public Fire Services                 | Provides current and future fire service leaders with an understanding and the skills necessary to manage creativity and foster a culture of innovation in public fire and emergency services. The approach is to treat the fire officer as an entrepreneur who identifies ideas and opportunities, then builds a business case for innovation.  | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student   |
| CPP     | 540         | Foundations of Emergency Medical Services                         | Examines the operational structure of emergency medical services in the United States, including the current organization, delivery and financing of these systems. Discusses strengths, weaknesses and future challenges of EMS with consideration for creating systems better integrated with the overall health care delivery system.   | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student   |
| CPP     | 550         | Community Paramedicine: Mobile Integrated Health Care             | Explores mobile integrated health care and community paramedic programs and how health care professionals and community partners can work together to identify community health needs, foster partnerships and overcome hurdles in MIH/CP program development. Discusses examples of successful MIH/CP programs.   | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student   |
| CPP     | 560         | Emergency Services Operations Analysis and Planning               | Applies common data analysis tools and techniques appropriate to risk assessment, deployment analysis and performance measurement to evaluate an organization's abilities to respond to community risk.  | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student   |
| CPP     | 570         | GIS for Hazards Analysis  | Provides a basic level of familiarity with several aspects of geographic information science such as key geographic concepts and techniques related to the theory and application of geographic information systems (GIS). Covers topics such as data models, geographic coordinate system and map projections, data entry and editing, and various types of spatial analysis in both conceptual terms as well as practical application. Additionally, outlines a range of GIS-related activities in emergency management and homeland security. Exposes students to the current and potential roles of GIS in support of emergency management activities in each of the four stages of the emergency management cycle. Gives students a basic understanding of GIS and its possibilities along with the capabilities as they apply to emergency management and homeland security.   | N                 | LEC               | N               | GNA           | Col of Pub Serv & Comm Solutns | College of Public Service and Community Solutions | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only CPP 570 or CPP 591 (GIS for Hazards Analysis) |

| CPY     | 652         | Individual Intellect Assessment                        | Examines the nature of human intellectual/cognitive abilities, their standardized measurement, and related issues in interpretation and practice. Provides preliminary training and experience in the administration and interpretation of two of the most widely used tests in this area: the Wechsler Adult Intelligence Scale, 4th ed. & the Wechsler Intelligence Scale for Children, 5th ed. Introduces other instruments at a topical level. Emphasizes theoretical foundations, practice skills, cultural considerations and ethical issues in intellectual/cognitive assessment. Operates under the broad principles of a cooperative learning approach. By researching and presenting on key course concepts, students practice incorporating a scholarly and empirical basis into their clinical work to develop specialized expertise in clinical assessment. Class format includes instructor- and student-led didactics, discussion and practice labs.   | N                 | SEM               | N               | GNA           | Integrative Sciences & Arts | College of Integrative Sciences and Arts | 3     |                 | Prerequisite(s): Master of Counseling or Counseling Psychology PhD student; Credit is allowed for only CPY 652 or CPY 691 (Individual Intellect Assessment) |
| CPY     | 653         | Neuropsychology  | Assumes students have knowledge of basic topics in physiological psychology and/or in brain and behavior-type courses. Concentrates on human neuropsychology; the main topics are related to functional brain organization and hemispheric specialization, with a particular emphasis on functional assessment. Includes several other topics related to late-breaking empirical developments in the field. Read and discuss articles and studies, employing a large variety of methodologies, ranging from the 1950s to the latest publications, with both normal and pathological subject populations. Much of the course is spent discussing brain assessment techniques to study cognitive function and dysfunction. Emphasizes commonly used approaches in the assessment and measurement of human behavior and how the human brain is responsible for cognition, language, memory, spatial processing, emotion and personality.   | N                 | SEM               | N               | GNA           | Integrative Sciences & Arts | College of Integrative Sciences and Arts | 3     |                 | Prerequisite(s): Master of Counseling or Counseling Psychology PhD student; Credit is allowed for only CPY 653 or CPY 691 (Neuropsychology)                 |

Designed for students enrolled in an APA-accredited professional psychology training program; it does not focus on application of physiological principles to psychological practice. Capitalizes on most students' prior familiarity with psychopathology to help enable acquisition of general information about important brain structures and functions. Includes information about basic nervous system-related biochemistry, cellular structure and physiology, and anatomy and physiology. Students participate in classroom problem solving activities during which an array of principles is covered based on reading assignments. Challenges students to consider the role of biological, evolutionary and genetic factors in the expression of an array of typical and atypical behavior. | N                 | SEM               | N               | GNA           | Integrative Sciences & Arts | College of Integrative Sciences and Arts | 3     |                 | Prerequisite(s): Master of Counseling or Counseling Psychology PhD student; Credit is allowed for only CPY 654 or CPY 691 (Biobases of Behavior)            |

| CRJ     | 610         | Advanced Topics in Juvenile Justice                              | Examines the meaning of the concept of juvenile delinquency as a separate entity in the criminal justice system. Considers the relationship between social attitudes and definitions of youthful law violation, and reviews studies on various forms of delinquency, such as drug offenses, sex delinquency, and status offenders. Also focuses on the internal workings of the juvenile justice system. | N                 | SEM               | N               | OPT           | Col of Pub Serv & Comm Solutns | School of Criminology and Criminal Justice | 3     |                 | Pre-requisite: Criminology and Criminal Justice PhD student  |
| CRJ     | 611         | Advanced Topics in Crime and Victimization                       | Examines research on criminal offending and victimization, focusing on the correlates of offending and victimization, risk and protective factors, and policies designed to reduce the impact of crime on victims.   | N                 | SEM               | N               | OPT           | Col of Pub Serv & Comm Solutns | School of Criminology and Criminal Justice | 3     |                 | Pre-requisite: Criminology and Criminal Justice PhD student  |
| CRJ     | 612         | Advanced Topics in Race, Gender, and the Criminal Justice System | Examines the interrelationships among race and ethnicity, gender, crime and the criminal justice system. Focuses on theoretical perspectives and empirical research on racial minorities and women as victims, offenders, and criminal justice professionals.  | N                 | SEM               | N               | OPT           | Col of Pub Serv & Comm Solutns | School of Criminology and Criminal Justice | 3     |                 | Pre-requisite: Criminology and Criminal Justice PhD student  |

| CSE     | 259         | Logic in Computer Science                               | Logic has been called the calculus of computer science. The argument is that logic plays a fundamental role in computer science, similar to that played by calculus in physical sciences and other engineering disciplines. Indeed, logic plays an important role in computer architecture (Boolean logic, digital gates, hardware verification); software engineering (specification, verification); programming languages (semantics, type theory, logic programming); databases (relational algebra, database query language); artificial intelligence (automated theorem proving, knowledge representation); algorithms and theory of computation (complexity, computability, expressiveness). This course is a mathematically solid introduction to propositional logic, first order logic, logic programming, and their applications in computer science. | N                 | LEC               | N               | OPT           | Ira A. | CSE     | 552         | Randomized and Approximation Algorithms           | Introduces two important areas of algorithm design for graduate students. A randomized algorithm is allowed to rely on the outcome of a random experiment in deciding on its next step. In many applications, randomized algorithms are simpler than any deterministic algorithms known, but in several cases, they are in fact more powerful or more efficient than any deterministic algorithms. Covers basic paradigms for randomized algorithm design and analysis, as well as for derandomization. | N                 | LEC               | N               | OPT           | Ira A. Fulton Engineering | Computer Science and Engineering Program | 3     |                 | Prerequisite(s): graduate Computer Engineering or Computer Science student; CSE 550 or 551 or 555 with B or better  |
| CSE     | 555         | Theory of Computation                             | Rigorous treatment of regular languages, context-free languages, Turing machines and decidability, reducibility, and other advanced topics in computability theory.   | N                 | LEC               | N               | OPT           | Ira A. | DCE     | 530         | Graduate Movement Practices I   | The four-semester sequence of graduate movement practices are a sequence of graduate-level movement studies experiences designed to emphasize in-depth psychophysical explorations of specific somatic movement practices and frameworks as well as epistemological frameworks for learning in and through the body. Addresses the integrated practices and theoretical underpinnings of Laban/Bartenieff praxis, Body Mind Centering and other somatic practices that are explored within the four-course sequence that facilitate movement exploration, movement functioning, movement performance and movement creation as well as performance and social theory constructs.   | N                 | STO               | N               | OPT           | Herberger Inst Design & Arts | School of Film, Dance and Theatre | 2     |                 | Pre-requisite: MFA Dance student   |
| DCE     | 531         | Graduate Movement Practices 2   | The series of graduate movement practices courses are a sequence of two graduate-level movement studies experiences designed to emphasize in-depth psychophysical explorations of specific somatic movement practices and frameworks as well as epistemological frameworks for learning in and through the body. Classroom experiences are approached from theoretically grounded and contextualized perspectives that address through practice current somatic and epistemological thinking. The overarching frameworks for the first and fourth modules are designed as "bookends" for introducing, contextualizing, and synthesizing classroom experiences and concepts explored within the two-course sequence.   | N                 | LEL               | N               | OPT           | Herberger Inst Design & Arts | School of Film, Dance and Theatre | 2     |                 | Pre-requisite: MFA Dance student   |

| EDS     | 200         | Design Literacy and Communication                       | Builds the requisite skills for students to be able to express their ideas visually. Gives exercises to create an understanding of basic principles of design as well as design communication, principles of composition and aesthetic evaluation. Uses tools such as sketching, drawing, computer graphics and model making as a vehicle to develop an understanding of visual methods of expressing one's self.  | N                 | STO               | N               | GNA           | Herberger Inst Design & Arts   | The Design School                             | 3     |                 | Prerequisite(s): Environmental Design or The Arts (Fashion Design) major   |
| EDS     | 201         | Fundamentals of Sustainability in Design                | Explores sustainability as it relates to the key disciplines that comprise environmental design. Topics range from issues affecting the preservation of the urban fabric to the development of earth-friendly materials used by interior designers and product designers to the design of sustainable buildings by architects through the use of appropriate materials and requisite energy efficiencies. Surveys the literature of sustainability, identifying critical issues on the subject today. Explores the theoretical underpinnings of the sustainability movement as it affects environmental design and related disciplines.  | N                 | LEC               | N               | GNA           | Herberger Inst Design & Arts   | The Design School                             | 3     |                 |  |
| EDS     | 223         | Design Thinking   | Introduces the notion of design thinking, a concept that is gaining significant recognition in several disciplines including art, design, business, engineering and others. Design thinking can be described as a creative, multidisciplinary, human-centered approach to solving complex problems. Contemporary society faces numerous challenges, and the need for new tools and methods to tackle and solve these problems is more pressing than ever before. Offers several new techniques of design thinking and creative problem solving through engaging lectures and exciting projects.  | N                 | LEC               | N               | GNA           | Herberger Inst Design & Arts   | The Design School                             | 3     |                 |  |

| EDS     | 301         | Contemporary Issues in Design Strategies and Innovation | Covers theories and methods needed in design, innovation and management of environmental design projects. Uses best practices and case studies related to the design of artifacts and to the design of built environments as a vehicle to develop students' understanding of different aspects of environmental design in a real-world setting. Also discusses the impact of contemporary issues such as globalization, digital tools, global connectivity on the theories and practice of environmental design.   | N                 | LEC               | N               | GNA           | Herberger Inst Design & Arts   | The Design School                             | 3     |                 | Pre- or corequisite(s): EDS 200  |
| EDS     | 302         | Design Inquiry and Undergraduate Research               | Theories and methods of design inquiry within a research environment. Prepares students for the senior-year synthesis courses. Students take on design-related research and develop and write a proposal for an integrative experience/project for an environmental design intervention and make an implementation plan to realize this intervention.  | N                 | RSC               | N               | GNA           | Herberger Inst Design & Arts   | The Design School                             | 3     |                 | Pre-requisite: EDS 301   |

Investigates exploration and presentation of emerging technology along with their acquisition, use, and implementation into society. Course includes the use of software programs and online simulations for scientific investigation, internet research, data collection, visual representation of data, probability, measures of central tendency, Action Research, 3D modeling, and Web page design.  | N                 | LEL               | N               | GNA           | MaryLouFulton Teachers College | Division of Teacher Preparation | 3     |                 |  |
| EDT     | 210         | Games, Technology and Society  | Introduces the role and significance of digital games in society and the process of designing games for impact in areas such as education, healthcare and social activism. Explores general theories about the relationship between technology and society, using games as examples, as well as develops a better understanding of methods that take a systemic, contextualized approach to designing games for impact.  | N                 | LEL               | N               | GNA           | MaryLouFulton Teachers College | Division of Teacher Preparation | 3     |                 |  |
| EDT     | 220         | Understanding Games for Impact   | Explores the nature of learning in and around games designed for entertainment as well as games designed intentionally for impact. Students gain familiarity with current research on course topics; develop a language for reflection on the cognitive, sociocultural and educational merits and drawbacks of game-centered learning environments; and gain new insights into the ways in which digital playspaces and pastimes shape how people think and learn. Develops the ability to analyze learning in games and game-related social contexts, using different theoretical perspectives and tools.   | N                 | LEL               | N               | GNA           | MaryLouFulton Teachers College | Division of Teacher Preparation | 3     |                 | Prerequisite(s): ENG 101, ENG 105, or ENG 107 with C or better   |

Employs digital tools including Microsoft Office's spreadsheets and databases, Google apps, mobile apps, and a variety of other Web-based tools in problem-based environments.   | N                 | LEC               | N               | OPT           | MaryLouFulton Teachers College | Division of Teacher Preparation | 3     | CS              | Pre-requisite: Minimum 45 hours; Credit is allowed for only EDT 180 or EDT 321   |
| EDT     | 329         | Games, Simulations, and Virtual Environments                               | Focuses on the use of Gaming, Simulations, and Virtual Environments (GS/VE) in education and instruction. Examines how educational professionals and other practitioners can leverage students interests in digital culture to accelerate their learning. Participants explore the foundational, social, and cultural implications of these new media and the power they hold to engage learners in new ways. Discusses historical overview of GS/VE with an emphasis on educational applications. Analyzes the distinctive features of GS/VE from different pedagogical, psychological (cognitive/emotional), social, and entertainment perspectives. Participants learn how to analyze the design of games, simulations, and virtual environments, creating evaluative criteria for the selection of products in educational environments. | N                 | LEL               | N               | OPT           | MaryLouFulton Teachers College | Division of Teacher Preparation | 3     |                 |  |
| EDT     | 340         | Designing Games for Impact   | Introduces concepts, methods, techniques and issues associated with designing interactive, game-centered experiences that are developed through a lens of impact. As a cumulative project, students create and test a digital game or game-based experience that demonstrates understanding of impact models and learning science principles.  | N                 | LEL               | N               | GNA           | MaryLouFulton Teachers College | Division of Teacher Preparation | 3     |                 | Prerequisite(s): junior or senior standing   |

| EGR     | 216         | Engineering Electrical Fundamentals           | Introduces modeling of electrical systems using mathematical and scientific principles. Covers electrical circuit analysis techniques including Kirchhoff's and Ohm's laws, series and parallel circuit elements, equivalent elements and circuits, and nodal analysis. These techniques are developed for DC, AC, and transient conditions. Also introduces the basic structure of a modern electronic measurement system and relates this structure to measurement accuracy, precision and resolution. | N                 | LEL               | N               | GNA           | Ira A. | EGR     | 217         | Engineering Mechanics Fundamentals            | Provides a foundation in the theory and principles of statics and dynamics. Examines the effect of forces acting on particles and rigid bodies. Extensively uses vector mechanics. Statics addresses the topics of equilibrium in two and three dimensions, to include distributed loads, trusses, frames, friction and the moment of inertia. Dynamics addresses kinematics and kinetics of particles.  | N                 | LEL               | N               | GNA           | Ira A. | EGR     | 425         | Unit Treatment Technologies and Systems                     | Addresses fundamental concepts of unit treatment technologies and the scientific and engineering principles that govern the proper design, operation and management of these systems. Course is divided into two overlapping major categories of unit treatment technologies: air-pollution controls and soils/groundwater remediation. Enhances understanding of the unit treatment technologies by reviews of dimensional analysis, mass transport mechanisms, mass balances, modeling, kinetics and reactors.   | N                 | LEC               | N               | GNA           | Ira A. | EGR     | 426         | Integrated Solid Waste Systems                              | Addresses the fundamental concepts of solid waste, pathways and transformation processes following the from cradle-to-grave approach. Follows the life of the solid waste from point of generation, reclamation and treatment to point of disposal. Emphasizes describing the present solid waste systems as an integrative set of functional units. Considers physical, chemical and biological transformations of the solid waste, together with the existing technologies and practices for management, treatment and disposal of the solid waste. Includes a specific overview of sustainable solid waste practices such as waste minimization, pollution prevention, reuse and reclamation, together with current domestic and foreign regulations. Addresses planning and design of solid waste operations and facilities. | N                 | LEC               | N               | GNA           | Ira A. | ELS     | 501         | Environmental Life Sciences: Grand Challenge: Global Climate Change     | Introduces first-year graduate students to a range of fields related to the Environmental Life Sciences graduate program. Co-instructed by an interdisciplinary faculty team, combines overview lectures and active discussion of current literature in the fields of inquiry. Culminates in synthetic collaborative research proposals on topics that foster transdisciplinary approaches to environmental life science questions. | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences      | School of Life Sciences                       | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student   |
| ELS     | 502         | Environmental Life Sciences: Field Camp                                 | Combines lecture, field, and laboratory components; provides opportunities to develop field skills relevant to current questions in environmental life science, and to carry out a wide range of observations and measurements in natural systems. Instructed by an interdisciplinary faculty team. Travel out of the country is required and students need to be in possession of a valid passport.                                | N                 | PRA               | N               | OPT           | Liberal Arts and Sciences      | School of Life Sciences                       | 4     |                 | Pre-requisites: ELS 501  |
| ELS     | 535         | Sustainable Ecosystems  | How human activities and management practices alter biodiversity, ecosystem functioning and the provisioning of ecosystem services; use of economic and other social-science perspectives to estimate the value of ecosystem services; evaluation of options for achieving the sustainable flow of services from ecosystems.  | N                 | SEM               | N               | OPT           | Liberal Arts and Sciences      | School of Life Sciences                       | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate. | EMS     | 501         | Sustainability Leadership Workshop I  | Formally takes students into the four learning threads of the EMSL program and the ASU brand of sustainability. Hands-on collaboration and group time with peer cohort members, field trips and deep diving into discussion, and application of sustainability theories into real-world scenarios. Sustainability speakers and practitioners engage students in critical thought.   | N                 | SEM               | N               | OPT           | School of Sustainability  | School of Sustainability | 1     |                 | Prerequisite(s): Executive Masters for Sustainability Leadership major   |
| EMS     | 502         | Global Context I                      | Examine global sustainability issues, determine materiality for their organization and practice communicating this information to critical stakeholders, i.e., translating the complex global context into compelling organizational realities. Applies tools to identify relevant risks and opportunities within their organizational context and investigates potential responses.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): Executive Masters for Sustainability Leadership or Master of Sustainability Leadership major; Corequisite(s): EMS 503; Pre- or corequisite(s): EMS 501 or SOS 501 |
| EMS     | 503         | Strategic Sustainability I            | As a foundational course in strategic sustainability, focuses on sustainability as a strategic lens. Explores the interface among strategy, sustainability and ongoing success, developing a framework for strategic sustainability that underpins authentic and transparent strategic efforts. Identifies the different levels and implications of organizational maturity from a strategic sustainability perspective. Engages in systems mapping, planning and prioritizing methods, tools and techniques to identify and assess strategic opportunities.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): Executive Masters for Sustainability Leadership or Master of Sustainability Leadership major; Corequisite(s): EMS 502; Pre- or corequisite(s): EMS 501 or SOS 501 |
| EMS     | 504         | Communications and Sustainability I   | This foundational course for professional communications aims to create chief sustainability storytellers. Helps students survey their internal communications environments, understand their target audiences and their unique customer centricities, and develop their voices through the use of proven story structures and techniques.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 502, 503. Corequisite(s): EMS 505   |
| EMS     | 505         | Sustainability Leadership I           | Focuses on emerging sustainability leadership. Students meld powerful and traditional leadership skills while challenging their prior knowledge with a multiple lens examination of leadership in a sustainability context. Provides a view of oneself to prepare students to better understand others. Students create the first phase of their personal plans for their unique needs and individual growth toward sustainability leadership.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 502, 503. Corequisite(s): EMS 504   |
| EMS     | 506         | Global Context II                     | Building on the skills gained in previous course work, explores proactive response strategies to material global sustainability challenges and opportunities. Examine how organizations can evolve from risk avoidance and compliance to innovation and thought leadership and explores what role they can play as sustainability leaders.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 504, 505; Corequisite(s): EMS 507   |
| EMS     | 507         | Strategic Sustainability II           | Uses reframing, re-visioning and backcasting via a sustainability lens as constructs for introducing strategic sustainability across all aspects of an organization both internally and externally. Students apply and integrate various science-based methods, used successfully by organizations large and small, for developing flexible action platforms for sustainable enterprises. Expects students to create a strategic vision and action plan for an organization.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 504, 505. Corequisite(s): EMS 506   |
| EMS     | 508         | International Immersive               | The international immersive experience takes place in a compelling location where all the challenges and opportunities of sustainability are in play. It is designed as a dynamic vehicle to make real-world connections to sustainability leaders, projects and communities, and is among the most memorable experiences of the program. Students "see" and "feel" sustainability from another country and culture's perspective and see the overlap and conflict to their own context. Extending one's professional network to other host countries and generating a reflective experience and analysis report are experiential learning artifacts that are generated from this experience. Collaborative teams work through a sustainability case study and present their solutions. | N                 | SEM               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 506, 507  |
| EMS     | 509         | Communications and Sustainability II  | Focuses on audiences and looks at how and where students are telling their stories of sustainability. Students map internal, external and target audiences/markets, strategize channels to reach them with their sustainability stories, and create multi-channel communications plans that incorporate modes of engagement for all audiences.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 506; EMS 507; Corequisite(s): EMS 510   |
| EMS     | 510         | Sustainability Leadership II          | Challenges prior definitions of systems, responsibility and community from a sustainability and leadership perspective. Also provides a toolbox for leading with sustainability as a fundamental success platform. Provides information needed for students to better understand others, a necessary skill to be able to persuasively lead others to transform their organization into a sustainable enterprise. The focus shifts away from being centered around oneself and towards a focus on audience/stakeholders. Students continue to develop their personal leadership skills.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 506; EMS 507; Corequisite(s): EMS 509   |
| EMS     | 511         | Global Context III                    | Expands student perspectives beyond the needs of their organizations and considers what could be gained from industry and cross-industry collaborations. Assesses the implications of changes in leadership perspectives to their organizational contexts.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 509, 510. Corequisite(s): EMS 512   |
| EMS     | 512         | Strategic Sustainability III          | Focuses on expanding efforts for strategic planning and sustainable success beyond the bounds of a given enterprise through strategic collaboration, partnering, innovation and resource development. Applies strategic sustainability as a tool for developing synergistic collaborations and driving innovation for more sustainable enterprises and enterprise systems. Also develops sustainability-informed collaborative approaches to identify and garner resources for strategic imperatives.   | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 509, 510. Corequisite(s): EMS 511   |
| EMS     | 513         | Communications and Sustainability III | Ignites the storyteller within as students learn to think like authors; craft their stories in scenes; and produce their presentations to entertain, educate and engage their audiences to move them to action. Reveals the students' transformation into courageous storytellers in presentations that combine their compelling narratives with captivating visual storytelling. Also creates social media editorial calendars to publish their stories to help express their thought leadership in sustainability online. By the end of this course, students learn how to own any room, from the boardroom and break room to the chat room and living room.  | N                 | LEC               | N               | OPT           | School of Sustainability  | School of Sustainability | 2     |                 | Prerequisite(s): EMS 511; EMS 512; Corequisite(s): EMS 514   |

| EMS     | 514         | Sustainability Leadership III                       | Focuses on transformational leadership for global success, which requires students to identify and apply pathways to inspire, persuade and influence others to act toward a shared global vision. Some of the challenges that all future sustainability leaders face are future orientation; reframing organizations to be globally scalable yet locally focused; and redefining success and growth using sustainability as a success lens. These are just a few of the challenging tasks that sustainability leaders face. Importantly, sustainable leadership involves being an effective change leader, and this course provides the tools and learning needed to initiate and sustain change. | N                 | LEC               | N               | OPT           | School of Sustainability       | School of Sustainability                      | 2     |                 | Prerequisite(s): EMS 511, 512. | ENG     | 205         | Introduction to Writing, Rhetorics and Literacies | How do we understand the ways in which people in systems--both small and large--social, political, and economic, throughout the world use language and other symbolic resources to carry out work? Three fields of study take this kind of questioning especially seriously: studies in writing, studies in rhetoric, and studies in literacy. Inquiry--that persistent, deliberate commitment to question and to build methods sufficient to that questioning--is a generative force in each of these fields of study. Familiarizes students with such questioning traditions and to help them judge for themselves what each is good for. The goal is to strengthen your own repertoire and decision-making power for producing and circulating work (widely defined across material, print, and digital media) that matters in our risk-ridden world. Quite simply, then, this is a course in asking good questions and in evaluating responses to situations that spur questioning. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     | L               | Prerequisite(s): ENG 102, 105, or 108 with C or better              |

| ENG     | 229         | Love and Lust in Medieval Literature              | The medieval period, roughly 600-1500, cannot reasonably be called the "dark ages." Indeed, the Middle Ages provides us with a corpus of literature replete with complex characters struggling to live and love, dealing with sin and lust, unity and diversity, faith and reason within a tumultuous cultural milieu and religious rigor, all of which are feeling the winds of changes. Explores medieval literature, noting the astonishing differences from our own time, as well as surprising similarities. Western civilization, our own 21st century, for better or for worse, is indebted to the love and lust of the medievals.  | N                 | LEC               | N               | GNA           | New Interdis Arts & Sciences | School of Humanities, Arts, and Cultural Studies | 3     |                 | Prerequisite(s): ENG 102, 105 or 108 with C or better; Credit is allowed for only ENG 229 or 294 (Love and Lust in Medieval Lit)   |

| ENG     | 235         | Introduction to Contemporary Theory               | Introduces key ideas and concepts in contemporary critical and cultural theory. In addition to the "posts"--postmodernism, poststructuralism, post-Marxism, postcolonial studies, post-feminism and posthumanism--explores new theoretical formations that have emerged in response to our contemporary social condition, such as queer theory, trauma theory, disability studies, cognitive studies, the new "object-oriented" philosophies and materialist theories. And then there's the "trans" domains--transnationalism, transgender studies and transhumanism--which, like so many contemporary theoretical formations opens up new perspectives on where and how we live, who we are and even what we are. The contemporary theories studied in this course provide the tools for understanding 21st-century life and the limits and enjoyments of our humanity. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     |                 | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit is allowed for only ENG 235 or ENG 294 (Literary Theory & Interdisciplinary Studies) or ENG 294 (Introduction to Contemporary Theory) |

| ENG     | 316         | Literary Readings of the Hebrew Bible            | Literary analysis of two of the main genres of the Hebrew Bible: narrative art and poetry. Students learn the main literary conventions of biblical prose and poetry, and how these conventions are applied or subverted. Each class comprises the study of a literary aspect, close readings, and thematic discussions. Biblical texts are read only in translation. They are situated in the religious, literary and artistic traditions that have developed on their basis.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences    | Department of English                            | 3     | L or HU         | Prerequisite(s): minimum 45 hours. | ENG     | 318         | The Life and Death of Languages                  | The history of language development, spread and contraction as well as thinking on where language may be going in the future. Discusses how languages differentiate and become new languages, how they mix with each other and how the development of writing can change this process. Maintains a focus on the ways speakers from different language communities have found to communicate through pidgin languages, bilingualism and languages of wider communication. Moreover, discusses the invention of new varieties and languages by people who feel their current choices do not fit their needs. Lastly, in considering what might be needed in the future, addresses issues such as machine translation, brain-to-brain communication, aspects of intergalactic communication posed in science fiction and interspecies communication. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     |                 | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit is allowed for only ENG 318 or ENG 394 (The Life and Death of Languages)                       |

| ENG     | 390         | Methods of Inquiry  | Studies in writing, rhetoric and literacy are multiple and diverse because these areas deal with complicated ways people create meaning, circulate meaning, and understand meaning in a variety of contexts and a variety of modal formats. Examines ways of developing research problems and questions, designing studies and conducting, reading and evaluating research in the areas of writing, rhetoric and literacy. Qualitative methods (e.g., case study, ethnographic methods, interviewing); historical methods (e.g., archival, document analysis and artifact interpretation); rhetorical analysis and discourse analysis; feminist approaches to research and analysis; and recent advances in research in the fields of rhetoric, writing and literacy studies. Investigates the many attitudes and assumptions about creativity and cultural work that make methods of inquiry as controversial as they are significant to contemporary public life.   | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     | L               | Prerequisite(s): ENG 102, 105, or 108 with C or better  |
| ENG     | 391         | Writing in Context  | How do we understand the ways in which people use written language to carry out work in professional, academic, social and/or personal contexts? How does our understanding of the ways writing is produced for an audience shift between and among these different contexts? More importantly, how do writers adapt their writing practices in order to facilitate audience understanding as well as cultivate an audience's capacity for action? Familiarize students with rhetorical practices that position them to read, assess and respond to the rhetorical demands of a wide range of writing contexts. Strengthens students' existing rhetorical skill sets and problem-setting capacities for producing and circulating work (widely defined across material, print and digital media) that responds to a range of problems in an applied manner. Assesses the rhetorical demands of writing contexts and in developing and producing tailored, audience-specific texts that forward work in complex, interdisciplinary environments. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     |                 | Prerequisite(s): ENG 102, 105, or 108 with C or better  |
| ENG     | 392         | History of Rhetorical Theory  | Begins in ancient Greece with the rise of the art of public oratory (known as rhetoric) and ends in the present, an era dominated by mass media. Engages in a great deal of reading--lots of very old writings as well as some newer ones. Covers a great many topics and ideas; focuses by continually returning to the subject of public discourse. Challenging readings designed to emphasize the connection between systems of philosophy (or "worldview") and systems of communication. By focusing on big ideas, students become a better thinker and communicator in any chosen career.  | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     |                 | Prerequisite(s): ENG 102, 105, or 108 with C or better  |
| ENG     | 393         | Theories of Literacy  | While theories of literacy have, for the most part, been determined by the primacy of reading and writing script, more recent scholarship in literacy theory and history has served to challenge such limitations. Many contemporary perspectives on literacy view scripted text as one component of complex acts and practices of written communication that occur in social contexts. Studies that examine such communicative acts in their local contexts reveal that literate practices and the texts that are produced are imbued with social and cultural values and traditions and the needs and desires of individuals. As the statements above illustrate, theories of literacy themselves are embedded within the values and assumptions of individuals, institutions, and academic specialization. Examines some of these theories, their influences on academic scholarship and pedagogy, the ideological assumptions that inform them, and how we might view these theories within broader social-cultural landscapes.             | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     |                 | Prerequisite(s): ENG 102, 105, or 108 with C or better  |

| ENG     | 485         | Digital Tools   | Digital (online, electronic) tools as best utilized in language arts curriculum and instruction for junior and senior high schools. Addresses many practical classroom matters; broadens knowledge of Web 2.0 opportunities for teaching and learning. Creates a detailed inventory of the digital tools familiar to secondary students, and compares these to what a clever English teacher can access in a public school classroom. Imaginations, studies, and designs digital tools to enhance student achievement. Uses digital tools to increase student access to history and culture and opportunities for individuals to find and articulate their voices, as well as opens avenues for their creativity. Empowers the English language arts classroom with critical understandings of media, culture and public relations (digital information manipulation) and develops secondary students from passive consumers to literate participants in democracy. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     |                 | Prerequisite(s): English (Secondary Education) BA major; ENG 102, 105, 108 and one other ENG course with C or better   |
| ENG     | 485         | Digital Tools   | Digital (online, electronic) tools as best utilized in language arts curriculum and instruction for junior and senior high schools. Addresses many practical classroom matters; broadens knowledge of Web 2.0 opportunities for teaching and learning. Creates a detailed inventory of the digital tools familiar to secondary students, and compares these to what a clever English teacher can access in a public school classroom. Imaginations, studies, and designs digital tools to enhance student achievement. | ENG     | 541         | Teaching Texts in Secondary Classrooms                       | English language arts teachers want all of their students to love literature and become immersed in the texts they assign. Explores activities and philosophies for building a strong reading curriculum in the secondary language arts classroom. Through identifying proficient readers, conducting thoughtful conversations about students and reading, and using a variety of ways to invite readers into texts, designs and experiences reading workshops based on innovative and effective teaching strategies. Students learn to create and implement reading units, literature circles, books of choice, literary tea parties, reading portfolios and final projects. Students also learn hands-on strategies for supporting ethnically and linguistically diverse readers and for teaching reading from a critical lens. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                            | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only ENG 541 or ENG 598 (Teaching the Novel Grades 6-12)                                     |

| ENV     | 201         | Fundamentals of Environmental Science                 | Examines the functioning of the earth system and how it has changed over long and short time scales. Emphasizes understanding global processes and how human activities can disrupt these processes, changing the ability of our global environment to support life. Also emphasizes important feedbacks between biological and physical processes and their effects on the biosphere. Discusses the response of natural and managed ecosystems to global change along with prospects for the future.   | N                 | LEC               | N               | GNA           | New Interdis Arts & Sciences   | School of Mathematical and Natural Sciences   | 3     |                 | Prerequisite(s): BIO 181 and 182 with C or better; CHM 116 with C or better  |

| ENV     | 410         | Soil Science  | Fundamental principles of soil science, including physical, chemical, biological and ecological properties. Applies these principles to explain the importance of soil as both a natural resource and ecosystem. Discusses the role of soils as the heart of terrestrial ecosystems, both natural and managed, and the importance of this key natural resource to environmental health and biological productivity. Explores how human activity and global change are impacting this vital natural resource and ecosystem that is crucial to life on earth. The laboratory component also introduces applications and standard methodology for investigating these principles.  | N                 | LEL               | N               | GNA           | New Interdis Arts & Sciences   | School of Mathematical and Natural Sciences   | 4     |                 | Prerequisite(s): BIO 320 with C or better; CHM 116 with C or better; PHY 101 or higher with C or better  |

Neither a substitute for a catalog course nor a means of taking a catalog course on an individual basis. Requires application well in advance of regular registration with the student's advisor, the advisor's signature, and approval by both the instructor with whom the student will work and the chair of the department offering the course. This course may be taken only by outstanding senior students who have completed at least one semester in residence and who have a cumulative GPA of 3.00 or higher in the major or field of specialization. A special class fee may be required. | Y                 | IND               | Y               | Z1            | New Interdis Arts & Sciences   | School of Mathematical and Natural Sciences   | 1-3   |                 | Prerequisite(s): minimum 45 hours  |

| EPA     | 555         | Translating Research for Educational Change           | Teaches educators how to translate research to promote educational change in their schools and districts. Three concepts emerge to empower practitioners to translate research to their individual schools and communities: (1) a needs assessment to understand the context (student population, community, networks); (2) an emphasis on the generalizability of research to provide an understanding of which findings are most applicable to specific contexts at which times and under which conditions; and (3) explicit training on ways of knowing to encourage practitioners to develop their own theoretical perspectives and test them against the academic research.  | N                 | SEM               | N               | GNA           | MaryLouFulton Teachers College | Educational Leadership & Innovation, Division | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student   |

| EPA     | 559         | Systematic Inquiry for Problem Solving | Trains participants to produce a policy analysis aimed at addressing a problem they identify within their own organizations. Participants identify a problem, gather, analyze data and evidence to draw conclusions, and clearly and succinctly report their findings and recommendations to policymakers.   | N                 | SEM               | N               | GNA           | MaryLouFulton Teachers College | Educational Leadership & Innovation, Division     | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student |
| EPA     | 565         | Critical Topics in Education Policy    | Critical topics in contemporary educational policy debates in the USA. Explores the dominant ideological and theoretical perspectives about what should be the purposes of schooling. Students analyze the humanist, core-curriculum, vocational, pragmatic as well as the standards-based, market-driven, professionally led, and networked models of reform, theories of change, implementation challenges, and the critiques leveled against these approaches. Students analyze critical topics such as policy formation, leadership, teachers unions, academic performance and community involvement. Encourages students to learn critical "policy skills" and reach reflexive and research-based conclusions about what are the requirements to develop "good school systems" and what their their individual and collective contributions could be. | N                 | SEM               | N               | GNA           | MaryLouFulton Teachers College | Educational Leadership & Innovation, Division     | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student |

| ERM     | 432         | Sustainable Solid Waste Management                      | Addresses engineering and management principles associated with integrated solid waste systems. Follows the life of the solid waste from point of generation, reclamation and treatment to point of disposal. Emphasizes the functional units of a solid waste system and the relationships among them. Addresses the physical, chemical and biological transformations of the solid waste, together with the existing technologies and engineering practices for collection, management, treatment and disposal of the solid waste. Emphasizes the sustainable practices such as waste minimization, pollution prevention, reuse and reclamation of the solid waste. Also discusses existing domestic and foreign regulations guiding the proper solid waste management techniques, as well as planning and design of solid waste system operations and facilities. | N                 | LEL               | N               | GNA           | Ira A. | ERM     | 532         | Sustainable Solid Waste Management                      | Addresses engineering and management principles associated with integrated solid waste systems. Follows the life of the solid waste from point of generation, reclamation and treatment to point of disposal. Emphasizes the functional units of a solid waste system and the relationships among them. Addresses the physical, chemical and biological transformations of the solid waste, together with the existing technologies and engineering practices for collection, management, treatment and disposal of the solid waste. Emphasizes the sustainable practices such as waste minimization, pollution prevention, reuse and reclamation of the solid waste. Also discusses existing domestic and foreign regulations guiding the proper solid waste management techniques, as well as planning and design of solid waste system operations and facilities. | N                 | LEL               | N               | GNA           | Ira A. | ERM     | 533         | Water and Wastewater Treatment Technologies             | Covers the most essential elements of aquatic chemistry, water pollution and water and wastewater treatment technologies to graduates in environmental and resource management and other interested parties. Provides a fundamental basis for understanding sustainable water and wastewater treatment operations. Includes critical evaluation of contemporary issues concerning our water environment and the associated regulatory framework in the lectures to strengthen and emphasize the importance of adequate practices used in the management of engineered water and wastewater treatment systems. Incorporates lectures, field trips and professional guest speakers.  | N                 | LEL               | N               | GNA           | Ira A. | ETH     | 449         | Hate Speech, Manifestos, and Radical Writings                           | Examines writings, speeches and texts that provoke radical or even revolutionary social change. At its core, this course asks: What is the radical and what does it do? How do radical writings function as texts, speech acts, inspirational documents, testimonies, accounts of madness, frightening moments, calls to arms, peacekeeping entities or speaking truth to power? Examines injurious speech and provocative writings that span a range of social movements and topics, including radical feminism, radical queer, Black power, indigenous rights, art and performance, anti-technology, animal rights, violence, madness and revolutionary resistance.   | N                 | LEC               | N               | OPT           | New Interdis Arts & Sciences | School of Humanities, Arts, and Cultural Studies  | 3     | SB & C          | Prerequisite(s): minimum 35 hours; minimum 2.50 GPA; Credit is allowed for only AMS 449 or ETH 449 or WST 449 or WST 394 (Hate Speech and Manifestos)  |

Examines various schools of thought that have shaped social discourse and policies, develops a critical perspective on the social and political issues affecting education, and identifies issues--both historical and contemporary--affecting Chicanos in public education.  | N                 | LEC               | N               | GNA           | New Interdis Arts & Sciences | School of Humanities, Arts, and Cultural Studies  | 3     | C               | Prerequisite(s): minimum 45 hours; Credit is allowed for only AMS 450 or ETH 450 or LAS 450 or AMS 429 (Latino/a School & Social Inequity)   |
| ETH     | 469         | Abject Bodies and the Politics of Trash                                 | Examines the possibilities inherent in "theorizing from the gutter"; looking at the world not from a lofty "Ivory Tower" but from the slime, the muck, the dumpster, the trash heap, the wasteland, the discarded and the downtrodden. Takes its theoretical framework from a radical 1960s manifesto called SCUM Manifesto by Valerie Solanas and from the French feminist philosophies of Julia Kristeva, who theorized the abject as a relationship with the grotesque that reveals the deep-seated fear of death. Uses these theoretical positions to examine trash, both abstractly and literally. Works through a variety of concepts ranging from actual trash, garbage, waste, toxic sludge, pollution and dirt, and tackles more abstract notions of trash such as the knowledge produced on the fringe in circuses, amusement parks, "trailer trash" zones, freak shows and the bodies of those marked as "Other" or different. | N                 | LEC               | N               | OPT           | New Interdis Arts & Sciences | School of Humanities, Arts, and Cultural Studies  | 3     | SB & C          | Prerequisite(s): ENG 102, 105, or 108 with C or better; minimum 36 hours; Credit is allowed for only AMS 469 or ETH 469 or WST 469 or WST 494 (Trash, Freaks and SCUM) or JHR 598 (Trash, Freaks and SCUM) or MAS 598 (Trash, Freaks and SCUM) |

| EXW     | 554         | Planning and Implementation in Health Promotion                                    | Covers selected topics in health promotion across a variety of domains of health. Program planning concepts include the application of planning frameworks, needs assessments, and theory in health promotion program planning and development. Also focuses on practical issues related to health promotion program implementation such as implementation planning, resource management and program marketing. Also covers process evaluation and quality improvement strategies.  | N                 | LEC               | N               | GNA           | College of Health Solutions | School of Nutrition and Health Promotion | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| EXW     | 556         | Program Evaluation in Health Promotion   | Comprehensive and systematic introduction to the key concepts and methodologies of program evaluation, specifically related to health programs. Discusses approaches to program evaluation in relation to the program's stage of development, resources and informational needs for decision-making. Focus includes program evaluation literature related to physical activity and nutrition.   | N                 | LEC               | N               | GNA           | College of Health Solutions | School of Nutrition and Health Promotion | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only EXW 556 or EXW 598 (Program Evaluation)  |

| EXW     | 564         | Aging and Lifestyle Behaviors  | Provides an overview of health behaviors in older adults. Centers on the perceptions and behaviors of older adults in reference to illness prevention, health promotion and reactions to acute and chronic illness and the context in which these behaviors occur. Specifically examines the psychological, familial, cultural and contextual factors which influence older adults' personal health practices and illness behaviors. Considers the older person as an individual in a complex system, engaged in decision making and his/her subsequent actions to maintain or improve health status. Solidifies concepts through the use of in-class case studies and discussions. | N                 | LEC               | N               | GNA           | College of Health Solutions | School of Nutrition and Health Promotion | 3     |                 | Pre-requisite: EXW 542  |

| EXW     | 645         | Advanced Applied Methods and Data Analysis     | Heavily applied focus on implementing research methods and statistical modeling techniques in the health promotion sciences. Addresses practical issues in specifying, interpreting and presenting research findings using appropriate statistical techniques. Addresses reporting standards (e.g., CONSORT, STROBE, PRISMA) and practical issues related to manuscript submission. Covers analytical methods including multiple regression and logistic regression, ANOVA, mediation and moderation, exploratory factor analysis, multilevel models for hierarchical data and intensive longitudinal data, basic time-to-event analyses (i.e., survival), and meta-analysis; also remains flexible to address critical and emerging methodologies in the health promotion sciences. Covers statistical methods in a conceptual nature with a focus on the use of statistical software packages (primarily SPSS) and interpretation of outputs. | N                 | LEC               | N               | OPT           | College of Health Solutions  | School of Nutrition and Health Promotion     | 3     |                 | Prerequisite(s): EXW 640, 643   |

| FAS     | 510         | Bayesian Analyses in the Social Sciences                                  | Discusses principles and practices of Bayesian approaches to statistical inference and modeling. Topics include: philosophical underpinnings of Bayesian inference; associated interpretations of probability; univariate and multivariate models prevalent in the social sciences; Markov chain Monte Carlo estimation; data-model fit; model comparisons procedures; missing data analyses. Course consists of lectures, demonstrations of software, reading assignments, homework assignments and a project. Exposes students to key concepts in Bayesian methods and gains technical foundations necessary to be consumers and contributors to applied and methodological research. Assumes previous knowledge of statistics through multiple regression, and recommends additional topics: multivariate statistics, latent variable modeling, probability theory. | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences    | Sanford School of Social and Family Dynamics | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only CDE 591 (Bayesian Analyses in the Social Sciences) or CDE 591 (Introduction to Bayesian Analyses) or FAS 510 or SOS 510 |

| FIS     | 111         | Welcome to the Future            | Explores the ways in which the future inspires, shapes and motivates the present. Illustrates how possible futures are used by people and institutions to advance agendas, shape conversations and sell products. Examines how science, technology and other forces are mobilized to create change. Empowers students to play a role in shaping our collective future.   | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     |                 |                                   |
| FIS     | 201         | Innovation in Society            | In the modern age, governments, multinational corporations and civil society movements have rallied around the idea that innovation is necessary for the maintenance of health, prosperity and the good life in general. Examines the vast implications of this promise, the reasons why it is so powerful and explanations for why it falls short. Also examines what innovation is, who funds it and why some innovations succeed while others fail. Links innovation with society to see how change happens differently in different places and how diverse populations are impacted.   | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | H               |                                   |

| FIS     | 305         | Ways of Knowing                  | Students research, beginning with the concept of research itself and its various purposes, highlighting knowledge and how it is created in different disciplinary approaches. Exposes historical and philosophical underpinnings of how research is conceptualized, presented and implemented, including what constitutes information, knowledge and evidence. Introduces material that is in a traditional research design and methodology course; however, the emphasis uniquely focuses on knowledge creation, innovation, the nature of disciplinary knowledge and its impact on society. Explores the epistemological differences in problem identification and approaches to inquiry in the disciplinary perspectives of engineering, the sciences and in the social sciences.                             | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | L               | Prerequisite(s): minimum 45 hours |
| FIS     | 307         | Navigating Futures               | Foresight methods and their potentials as entry-points into public discussions about near- and mid-range technoscientific developments. Four elements constitute the organizing axis of the course: (1) the history of foresight exercises in government agencies and business organizations; (2) the methods of four forms of foresight exercises (technology foresight, science and technology studies, anticipatory governance and scenario development); (3) a comparative assessment of these dominant forms; and (4) a group-based application exercise using one of the foresight methods.  | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | SB              | Prerequisite(s): minimum 45 hours |
| FIS     | 308         | Politics, Markets and Innovation | Studies the roles that governments, markets and other factors play in promoting, disseminating and regulating science-based technological innovation. Includes examining the theoretical literature on factors that structure markets and shape diffusion, as well as case studies that illustrate the processes and mechanisms that govern innovations in society. In addition to studying the role of governments, firms and universities, also considers the role of publics as consumers who adopt innovations but also as citizens who may be skeptical of them. Includes case studies in agriculture, health care, biotechnology and digital rights.   | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | SB              | Prerequisite(s): minimum 45 hours |
| FIS     | 331         | Technology and the Modern World  | Explores how technological systems are developed and embedded in the modern world with an eye to playing a role in creating better futures. Examines how machines and techniques can shape institutions, relationships and values. Challenges students to envision futures that they want and work to develop strategies for moving us (and our systems) toward those futures. Analyzes technologies past, present and imagined, and describes the ways in which technologies shape our world and the ways in which we shape those technologies. Through repeated practice in class students play a productive role in and even facilitate conversations that tease out the relationships between values and technological systems.  | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     |                 | Prerequisite(s): minimum 45 hours |
| FIS     | 332         | Risk and the Future              | Examines the evolving global risk landscape that is resulting from rapidly increasing global connectivity, tight coupling and massive complexity. Develops an understanding of how innovation in society is changing the risk landscape and considers how innovation in approaches to risk can help navigate this emerging landscape. Topics include technological risk, sociopolitical risk, catastrophic risk, existential risk, converging technologies, perception and uncertainty, anticipation, precaution, uncertainty and risk innovation.   | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | L               | Prerequisite(s): minimum 45 hours |
| FIS     | 333         | Governing Emerging Technologies  | Examines the variety of ways in which societies make collective decisions or govern science and technology. Focuses on a particular category of science and technology: the set of emerging technologies like nanotechnology, artificial intelligence and robotics, genetic modification and synthetic biology, cognitive science and neurotechnology, geoengineering, and others that pose particular problems of high stakes, high uncertainty and ambiguous novelty. Closely allied with the research agenda of numerous faculty in the School for the Future of Innovation in Society, especially those in the Center for Nanotechnology in Society, the Risk Innovation Lab, and others; exposes students to inquiry and skills directly from the research front. Students perform numerous research tasks. | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | SB              | Prerequisite(s): minimum 45 hours |

| FIS     | 334         | Science, Technology and Inequality                     | Conceptual and theoretical frameworks; provides empirical case studies that contribute to understandings of science and technology as they are used in society. The applications of science and technology in society need to be understood as instrumental to the creation and maintenance of inequality within and between societies. Science and technology does not merely cause or alleviate inequality, but are more profoundly implicated in social relations regarding distribution and access to the benefits of different technologies as well as exposure to risks from science and technology projects in society. The more pervasive and obdurate sources of social distribution are enshrined and entrenched in these scientific and technological systems.   | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | C               | Prerequisite(s): minimum 45 hours; Credit is allowed for only FIS 334 or JUS 334  |
| FIS     | 335         | Designing Knowledge                                    | Provides a foundational understanding of how social organizations make and use knowledge. From research laboratories to biotechnology companies to statistical agencies, many organizations are specifically designed to be knowledge enterprises, enterprises whose primary purpose is to produce knowledge. All organizations in modern societies also operate knowledge systems: systems whose purpose is to create, validate, circulate, communicate and apply knowledge in the making of decisions. Examines how these forms of organization work and contribute to modern societies.  | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | SB              | Prerequisite(s): minimum 45 hours   |
| FIS     | 336         | Science and Technology Policy                          | Science and technology are powerful forces in the modern world. They have been hailed as a way to address everything from world hunger to old age. This does not, however, happen automatically, nor does it always work out the way one presumes. Governments make numerous decisions that affect the direction and application of science and technology, and government policies are affected by a myriad of social, political, and cultural factors. This class will explore the variety of ways in which governments make these policies, how the policies shape the development of science and technology and their applications, and how policy may be shaped to create better futures. Governments around the world have coalesced around the idea that science and technology are necessary for the promotion of the good life. We will examine how they put this idea into action by looking at five interrelated topics: Food, Security/Military, Health, Economy, and Sustainability. | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     |                 |   |
| FIS     | 337         | Innovation and Global Development                      | International development, the role of technology and innovation, and the current era of globalization. Focuses primarily on socioeconomic development. The globalization of the world economy, with the end of the Cold War, and the advent of global information and communications technologies, has had significant implications for development around the globe. While wealth is rising in many countries and among certain social classes, there is still overwhelming poverty, lack of access to clean water, adequate nutrition, and health services for the majority of people in the world. This is not a new situation; however the advent of the recent era of globalization, which includes both political and technological changes, is a variable that influences development in complex ways.  | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     | G               | Prerequisite(s): minimum 45 hours   |

Grounded in a use-inspired framework with a focus on transforming society, engages innovation for impact with a focus on imagining, designing, developing and optimizing a particular innovation such that it is likely to realize impact goals. Beyond product-centric perspectives that locate change within the innovation, this journey emphasizes an ecological perspective that positions innovation as a shared accomplishment distributed across the designed innovation, engaged participants, prepared facilitators and a responsive ecosystem.   | N                 | SEM               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 1     |                 | Prerequisite(s): minimum 45 hours   |

| FIS     | 431         | Technology, Security and Insecurity in Global Politics | Focuses on the international political aspects of technological change; examines the impact of technological innovation and political change on the international political system. The overall goal is to create an awareness of and ability to analyze and synthesize world events, the particular role of technology, and consider the myriad ways that globalization and technology as a main driver could be changing the international system of nation-states. Technological innovation often takes place within a political context, including international politics, as nation-states and other entities develop technologies within the context of competition and power. There are several issues that run throughout the course as major themes. One is the role of technology in political and social change, and the impact of the latter on the former.   | N                 | LEC               | N               | GNA           | Future of Innovation in Society | School for the Future of Innovation in Society | 3     |                 | Prerequisite(s): minimum 45 hours   |

| FIS     | 480         | Innovation in Society Studio                   | Facilitates experiential learning and allows students to work with clients in the field of technology, innovation and sustainability. Through team projects with identified stakeholders, students engage, plan, design, implement and assess projects while learning interpersonal skills and managing client relationships. Students gain real-world experience and develop skills in project management, including planning, implementing and evaluating a complete project cycle. Allows students to manage both client-based projects and team relationships to complete projects. Students carry out project-based research, conduct interviews and meetings, make site visits, develop work plans and scope of works, negotiate clear deliverables with clients, implement projects and give public presentations. | FMP     | 225         | Introduction to Visual Effects                 | Introductory look into the theory and practice of creating visual effects for film, television and games. Focuses on principles of 2D visual effects as derived and modernized from traditional special effects practices as seen in pre-digital film making. Students view, discuss and critique effects from films in the 20th and 21st centuries and engage in the creation of visual effects shots in a variety of styles employing a number of standard techniques. Covers the use of Adobe Photoshop and After Effects; however, considers some use of 3D applications in the second half of the semester. At the heart of good visual effects is a critical eye and attention to detail that is gained through critique of professional and student works on a weekly basis.   | N                 | LEL               | N               | GNA           | Herberger Inst Design & Arts    | School of Film, Dance and Theatre              | 3     |                 | Credit is allowed for only FMP 225 or FMP 394 (Introduction to Visual Effects)  |

| FMP     | 320         | Film and Media Post-Production II                        | In-depth analysis of editing theory, storytelling, nonlinear editing techniques and equipment, basics of visual and audio effects and color grading using the Avid Media Composer editing program and supporting software with an emphasis on storytelling and aesthetics. Part of the Avid Learning Partner program, taught by a Certified Avid Instructor. Satisfies the Media Composer 200-level certification as part of Avid's official curriculum. Upon completion of this course, students take an exam to become an Avid Certified Professional.   | N                 | LEL               | N               | OPT           | Herberger Inst Design & Arts | School of Film, Dance and Theatre | 3     |                 | Prerequisite(s): Film (Film & Media Production) BA major; FMP 220 with C or better; FMP 300 (Film Production Part 1 or Film Production: Film & Media Part 1 or THE 400) with C or better   |
| FMP     | 325         | Guerilla VFX   | Offers the opportunity to work with a broad variety of projects with assets ranging from excellent quality to those that are more difficult to work with. In addition to work with pre-prepared assets, students also get the opportunity to create their own effects sequences from scratch (including capturing footage). Students learn best practices for capturing all needed elements on the day of the shoot as well as planning the sequence before recording. Covers work in both 2D and 3D visual effects including: matte painting (2D and 3D), set extensions and additions, blue/green screen compositing, and 3D animation for the addition of elements into a shot. The first section of the class consists of short individual assignments aimed at teaching basic core VFX skills, finishing with the production of a class-produced VFX short film. Class member assignments are based off of individual skill and interest. | N                 | LEL               | N               | GNA           | Herberger Inst Design & Arts | School of Film, Dance and Theatre | 3     |                 | Prerequisite(s): FMP 225 with C or better; Credit is allowed for only FMP 325 or FMP 294 (Guerilla VFX)  |

| FMS     | 349         | Israeli Wars in Israeli Movies                 | From its first day, the State of Israel has been in a state of war with the Arab countries. Every few years, the fighting erupted into an open war. At the beginning of the country, there was a consensus that the wars were forced on the Israelis, and therefore, the heavy toll on human life was unavoidable. Since the Six Day War, 1967, and the political change in 1977, Israeli society is split in attitude toward war. The absolute belief in the political and military leaders was shaken, and new political agendas entered the political arena. To this divided society, the Intifadas occurred with the waves of terrorism. These events added fire to the heated debates in Israel. One means of expression is through the cinema. In this course, students watch, analyze, and discuss selected movies on the Israeli wars and terrorism in the streets of Israel. Through these movies, produced by Israelis, we'll try to understand the mood and attitude of the Israelis toward war, enemies, and political and military leaders. | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences    | Department of English             | 3     | HU & G          | Prerequisite(s): ENG 101, 105, or 107 with C or better; Credit is allowed for only FMS 349 or HEB 349 or Israeli Wars in Israeli Movies)                      |

| FMS     | 508         | Race and Gender in American Film                      | Investigates the diverse ways in which race and gender are represented in American film history and culture. In a broader context, also analyzes how the meaning of race and gender, and their intersectionality, has shifted and changed across time and space, and how cinema has contributed to these shifts. Gives attention to the relationships among visual style, narrative structure, generic convention and identity. Students become more literate about the power of film to reflect and refract ideologies of race and gender, and to analyze how these identities impact the experiences of individuals and groups in our society. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences | Department of English | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only FMS 508 or FMS 598 (Race and Gender in American Film)   |
| FMS     | 511         | Fundamentals of Cinema & Television Narrative Online  | Studies the creativity and the technique of screenwriting for the conventional narrative film and for television. Student writing exercises culminate in a script for micro-cinema. Seminar. Pre-requisite: online student in MAS American Media and Popular Culture   | N                 | SEM               | N               | OPT           | Liberal Arts and Sciences | Department of English | 3     |                 | Prerequisite(s): American Media and Popular Culture MAS students   |

| FMS     | 523         | Film Authorship                                | Explores the notion of authorship in film, television, and digital media by engaging with a number of critical methodologies such as auteurism, structuralism, post-structuralism, feminism.   | N                 | SEM               | N               | OPT           | Liberal Arts and Sciences    | Department of English                       | 3     |                 | Prerequisite(s): American Media and Popular Culture MAS students  |
| FMS     | 527         | Identity and World Film                        | Examines how films around the world represent gender, race, ethnicity, and sexual orientation through the lens of genres and their variations and how genres reinforce or critiques stereotypes.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences    | Department of English                       | 3     |                 | Pre-requisites: Graduate student (degree seeking or nondegree seeking); Credit is allowed for only ARS 540, FMS 527 or (ARS 494, ENG 465, FMS 494 or ARS 598 Identity and World Film)               |
| FMS     | 535         | Comedy as Social Discourse                     | Focuses upon the way that comedy can speak with particular clarity to the American condition from behind the microphone and, by extension, on the big and small screens. By examining how comic conventions, personae and sensibilities in stand-up respond to change in social and political sensibilities at specific historical moments, we tease out why comedy, perhaps more than any other genre, can get people to engage (and to think about) a variety of human experiences--often in spite of themselves.  | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                       | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only FMS 535 or FMS 598 (Comedy as Social Discourse)  |
| FMS     | 543         | Artists in Film: Artists' Biopics              | Examines artists' "biopics," biographical films about artists, chronologically from the subgenre's first appearance in 1936 to recent films. Explores relationships between film and history and between film and myths of creativity; major directors' attraction to artists' biopics; stereotypes of artists (genius, deviant, etc.); and how notions of creativity are inflected by gender, race and national identity. Assignments include weekly readings and film viewings and one short paper; optional documentaries and films are also available.   | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | Department of English                       | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only ARS 443 or ARS 543 or FMS 430 or FMS 543 or ARS 598 (Artists in Film: Biopics)                           |

| FOR     | 456         | Studies in Forensic Linguistics              | Focuses on the three main aspects of that branch of applied linguistics, namely language and the law, court cases where language is the central dispute, and linguistic evidence.   | N                 | LEC               | N               | OPT           | New Interdis Arts & Sciences | School of Mathematical and Natural Sciences | 3     |                 | Prerequisite(s): ENG 102, 105, or 108 with C or better; Credit is allowed for only ENG 456 or ENG 494 (Studies in Forensic Linguistics) or FOR 456 or FOR 494 (Studies in Forensic Linguistics) or PAX 456    |
| FOR     | 475         | Principles of Toxicology                     | Presents the fundamental principles of toxicology and its application to both human and environmental situations. Starts with the means of defining and quantifying toxic effects through dose response curves (e.g. LD50, EC50, LOEL, NOEL). Then focuses on absorption pathways for toxicants as well as the degradation metabolism pathways for toxicants. Finally focuses on the mechanism of toxic action for common poisons and environmental pollutants. Emphasizes toxicants that students are likely to encounter in forensics and environmental fields. | N                 | LEC               | N               | GNA           | New Interdis Arts & Sciences | School of Mathematical and Natural Sciences | 3     |                 | Prerequisite(s): BCH 361 or 371 with C or better; Credit is allowed for only FOR 475 or LSC 475 or PTX 475  |
| FOR     | 480         | Advanced Topics in Human Forensic DNA Typing | Examines the science of current forensic DNA typing methods by focusing on the technology behind STR, Y-STR and mtDNA typing, real-time PCR, serology tests, capillary electrophoresis, expert systems and statistics.  | N                 | LEC               | N               | GNA           | New Interdis Arts & Sciences | School of Mathematical and Natural Sciences | 3     |                 | Prerequisite(s): BIO 181; BIO 182; LSC 347; Credit is allowed for only FOR 480 or FOR 494 (Advanced Topics in Human Forensic DNA Typing) or LSC 480 or LSC 494 (Advanced Topics in Human Forensic DNA Typing) |

| FRE     | 414         | French and Italian Popular Culture       | Popular culture no longer holds the ancillary role traditionally reserved for whatever does not carry the definition of high culture. That popular culture is instead able to provide us with very relevant insights on the identity of a nation and a people is now widely accepted. As a consequence, this class aims at examining popular culture-related artifacts in Italy and France in order to shed a light on crucial issues such as the culture of food and its historical and social significance; the meaning of fashion and design within an urban context, with a special attention to gender roles; the importance of the comics, given in particular the exceptional success the bande dessinée genre is currently enjoying in France throughout the whole age range of the population; the show business with a particular attention to music; and the social function and role of sport with respect to the two dominant sports in both countries (soccer and cycling). | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of International Letters and Cultures | 3     | HU & G          | Prerequisite(s): ENG 200 with C or better OR minimum 45 hours; Credit is allowed for only FRE 414 or FRE 494 (French and Italian Pop Culture) or ITA 414 or ITA 494 (French and Italian Pop Culture) or SLC 414 or SLC 494 (French and Italian Pop Culture) |

| FSH     | 202         | Fashion Construction                              | Prepares students for a career in the apparel industry or for continued study in graduate school. Introduces core concepts of fashion materials and construction: cutting, sewing and finishing techniques for creating garment prototypes. Focuses on the fashion industry as well as apparel construction and production.   | N                 | STO               | N               | GNA           | Herberger Inst Design & Arts | School of Art | 3     |                 |   |
| FSH     | 203         | Fashion Illustration                              | In this studio setting, students practice drawing the fashion figure from a live model, both in leotard and in clothing, facilitating understanding of drape, shape, shadow, silhouette and how it relates to fashion design. Demonstrates and practices fundamental skills of visual communication and problem solving, including fabric rendering and proportion and how it relates to the fashion designer's sketch. Brief lectures, demos and critiques are an integral component of each class. Materials used in class include, yet are not limited to, charcoal and gouache.   | N                 | STO               | N               | GNA           | Herberger Inst Design & Arts | School of Art | 3     |                 | Prerequisite(s): ART 110 or ART 111; Credit is allowed for only FSH 203 or FSH 294 (Fashion Illustration) |
| FSH     | 204         | Social Aspects of Fashion                         | Introduces ways of examining clothing and fashion in context. How do we read images and representations of clothing and how do they manipulate the meaning of the garment and its wearer? In what ways is this visual language used to select and produce fashion? What influences how we dress on a daily basis and over time? These are just some of the questions about appearance, clothing and culture that are used to embark on a participatory research project and as a point of departure for class discussions and related readings.   | N                 | LEC               | N               | GNA           | Herberger Inst Design & Arts | School of Art | 3     | HU              | Prerequisite(s): ENG 101, 102, 105, 107, or 108; FSH 125  |

| GCU     | 171         | The Thread of Energy                              | Follows the thread of energy through every aspect of our lives. Discusses the technical, social, legal, and policy contexts of all energy resources, including present and unconventional fossil fuels, nuclear power, and renewable resources. Addresses energy use throughout history, the influence of energy on quality of life, the role it plays in political strategies and environmental quality, how it shapes our neighborhoods and cities, its contribution to our personal comfort and national security, and how its importance is reflected in the worlds of business and the humanities. Its dual role is as a stand-alone introduction to energy, and as a first step to more advanced studies of energy in the natural, technical, and social sciences. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences    | School of Geographical Sciences and Urban Planning | 3     | SB & G          | Credit is allowed for only GCU or SOS 171   |

| GCU     | 585         | Geographic Research Design and Proposal Writing | Prepares students to undertake creative geographic research culminating in the generation of new knowledge. Serves as a foundation for the student in achieving the objective of a productive and successful degree. To accomplish this, instruction stresses a research framework, ethical practice, and the generation of an original research proposal. Specific learning objectives are: to produce an area of specialization statement, literature review, problem statement, description of methods and final proposal; to develop the skills needed to conceive and plan a research project; to communicate ideas effectively in written and oral form; to develop and articulate informed opinions about research designs; to learn about academic publishing format and process; and to understand and engage in ethical research practices. | N                 | SEM               | N               | OPT           | Liberal Arts and Sciences    | School of Geographical Sciences and Urban Planning | 3     |                 | Pre-requisite: Graduate student   |

| GIS     | 412         | Spatial Decision Support Systems                                       | Theoretical and technical requirements for implementing spatial decision support tools.  | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     |                 | Prerequisite(s): GIS 222 with C or better; GIS 311 with C or better  |
| GIS     | 431         | Spatial Databases  | Covers data modeling concepts, the relational data model for the storage and retrieval of spatial and nonspatial information. The data retrieval emphasizes the industry-standard query language SQL and Spatial Query Languages.  | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     |                 | Pre-requisite: GIS 311; GIS 322  |
| GIS     | 441         | Geographics: Interactive and Animated Cartography and Geovisualization | Advanced cartography, stressing influence and application of the computer on geographic representation. Emphasizes creation of maps for the Internet.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     | CS              | Prerequisite(s): GIS 222 with C or better  |
| GIS     | 461         | Optimization Fundamentals for Spatial Analysis                         | Covers the fundamentals of optimization for spatial analysis. Reviews elements of calculus, matrices, and basic linear algebra. Introduces linear programming, integer programming and branch and bound, and heuristics. Provides the basics for use and application of GIScience and spatial analysis methods. Objectives include: reviewing basics of math, calculus and linear algebra; introducing optimization approaches, including linear programming, integer programming and heuristics; and applying these methods to structured problems.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     |                 | Prerequisite(s): MAT 270, 271 or 272 with C or better; Credit is allowed for only GIS 461, 561, PUP 481, 581, GCU 494 (Optimization Fundamentals) or GCU 598 (Optimization Fundamentals) |
| GIS     | 462         | Location Analysis and Modeling   | Provides a technical overview of location theory in the context of GIScience, focusing on analysis and modeling issues. Relies upon applications associated with emergency service planning, natural resource management, retail site selection, among others, to make connections among models, spatial information, and interpretation of findings. Explores utilization and implementation considerations using GIS. Objectives include: exposing a range of location analysis and modeling approaches; applying approaches in combination with GIS and optimization software; and carrying out an application-oriented study relying on acquired skills. | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     |                 | Prerequisite(s): GIS 211 with C or better; GIS 461 with C or better; Credit is allowed for only GIS 462 or GIS 562 or PUP 482 or PUP 582 or PUP 598 (Location Modeling)                  |
| GIS     | 470         | Advanced Statistics for Geography and Planning                         | Statistical techniques applied to the analysis of distributions and relationships. Introduces models and theory in geography.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     | CS              | Prerequisite(s) GIS 270 with C or better   |
| GIS     | 471         | Spatial Statistics for Geography and Planning                          | Basics of spatial data analysis. Topics include point pattern analysis, spatial autocorrelation, spatial regression, and kriging.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     |                 | Pre-requisite: GIS 470   |
| GIS     | 472         | Spatial Regression Analysis  | Students gain insight into the scope of spatial regression methods, apply them in an empirical setting, and properly interpret the results of spatial regression analysis.   | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     |                 | Pre-requisite: GIS 471; Credit is allowed for only GIS 472 or GPH 598 (Spatial Regression)   |
| GIS     | 484         | Internship   | Structured practical experience following a contract or plan, supervised by faculty and practitioners.   | Y                 | LEC               | Y               | Z1            | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 |  |

| GIS     | 580         | Practicum  | Structured practical experience in a professional program, supervised by a practitioner and/or faculty member with whom the student works closely.  | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 583         | Fieldwork  | Structured, supervised field experience in a field science or other discipline requiring experience in field techniques.  | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 584         | Internship   | Structured practical experience following a contract or plan, supervised by faculty and practitioners.  | Y                 | LEC               | Y               | Z1            | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 590         | Reading and Conference                             | Independent study in which a student meets regularly with a faculty member to discuss assignments. Course may include such assignments as intensive reading in a specialized area, writing a synthesis of literature on a specified topic, or writing a literature review of a topic.   | Y                 | LEC               | Y               | Z1            | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 591         | Seminar  | A small class emphasizing discussion, presentations by students, and written research papers.   | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 592         | Research   | Independent study in which a student, under the supervision of a faculty member, conducts research that is expected to lead to a specific project such as a thesis or dissertation, report, or publication. Assignments might include data collection, experimental work, data analysis, or preparation of a manuscript.  | Y                 | LEC               | Y               | Z1            | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-15  |                 |   |
| GIS     | 593         | Applied Project                                    | Preparation of a supervised applied project that is a graduation requirement in some professional majors.   | Y                 | LEC               | Y               | Z1            | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 594         | Conference and Workshop                            | Topical instruction, usually in compressed format, leading to academic credit. Often offered off campus to groups of professionals.   | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 595         | Continuing Registration                            | Used in situations where registration is necessary but where credit is not needed. Replaces arbitrary enrollment in reading and conference, research, thesis, dissertation, etc. Used by students when taking comprehensive examinations, defending theses or dissertations, or fulfilling the continuous enrollment requirement in doctoral programs. Credit is not awarded, and no grade is assigned.   | Y                 | RSC               | Y               | Z3            | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 598         | Special Topics                                     | Topical courses not offered in regular course rotation--e.g., new courses not in the catalog, courses by visiting faculty, courses on timely topics, highly specialized courses responding to unique student demand.  | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-4   |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 600         | Research Methods                                   | Course on research methods in a specific discipline.  | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student  |
| GIS     | 601         | Introduction to Geographic Information Systems     | Introduces GIS theory and practice for professionals.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 2     |                 | Prerequisite(s): Geographic Information Systems MAS student   |
| GIS     | 602         | Intermediate GIS                                   | Introduces visualization, spatial analysis and open source tools.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 2     |                 | Prerequisite(s): Geographic Information Systems MAS student   |

| GLG     | 301         | Earth Science in Arizona and the Southwest | Place-based application of geology and allied Earth system sciences to explore and interpret the landscapes, rocks, geologic history, climate, resources, and natural hazards of Arizona and the Southwest. Integrates case studies of the interactions of Southwest cultures and societies (past and present) with Earth systems, and inquiry into the future sustainability of Southwestern communities and lifeways.   | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): ENG 101, 105 or 107 with C or better; GLG 101, 102, 110, GPH 111 or SES 121; MAT 117 or higher; Credit is allowed for only GLG 301, 394 (Earth Sci in AZ & SW) or SOS 372  |
| GLG     | 304         | Minerals, Energy, and Society              | Studies the science and technology of the minerals and energy industries, how these industries interact with society, and how these interactions may change in the future.  | N                 | LEC               | N               | GNA           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): ENG 101, ENG 105 or ENG 107 with C or better; GLG 101, GLG 102, GLG 110, GPH 111, SES 121, or minimum junior standing; Credit is allowed for only GLG 304, GLG 394 (Minerals, Energy & Society) or SOS 373                   |
| GLG     | 305         | Dynamic Earth                              | Emphasizes the link between Earth's interior and surface, focusing on Earth systems and cycles, such as observation and modeling of the geometry and motions of Earth's rigid outer shell, the tectonic plates, and how they are coupled to the geologic record, the nature of Earth's internal structure, and convective motions within the planet. Specific topics include: (1) essentials of Earth's dynamic interior (models for physical and chemical evolution); (2) essentials of lithosphere evolution (cooling of oceanic plates, the age of the Earth, and continent formation); (3) multi-scale tectonics (plate tectonics, continental deformation, mountain building, tectonic context of metamorphism); (4) essentials of volcanism in a tectonic context; (5) geodynamic context of plate boundaries; and (6) chemical cycles (role of the solid crust and mantle for transporting, storing, and cycling water and minerals). Provides an essential global context for studies of Earth and Environmental Science. | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): BIO 100 or CHM 101 (or higher) or PHY 101 (or higher) with C or better; GLG 101 or SES 121 with C or better; MAT 170 or 210 or 251 with C or better  |

| GLG     | 327         | Earth's Critical Zone                      | The Earth's near surface environment (the "critical zone") supports most life and is the dynamic interface between the solid Earth and its fluid envelopes where much of the geologic record is produced. We now know that we face rapid climate change and the consequences of changes in land use, water resources, and ecosystems. Critical to planning a response to, or mitigation of, environmental change is understanding how the Earth surface works. Focuses on how changes to the environment manifest themselves in the critical zone--in the form and function of the Earth's surface (landforms, water resources, soils, ecosystems). Offers a quantitative introduction to the form and function of the processes impacting the Earth's critical zone to build an understanding of the interactions of physical, chemical and biotic processes in shaping the surface and determining fluid, solute and sediment fluxes.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s) with C or better: GLG 101 & 103 or SES 121 & 123; MAT 170, 171, 210, 251, 265 or 270; PHY 101, 111, 121, or 150 or CHM 101, 107, 113, or 114 or BIO 100, 181, 182, 281, or 282; Credit is allowed for only GLG 327 or SOS 374 |

| GLG     | 455         | Advanced Field Geology              | Geologic mapping in igneous, sedimentary, and metamorphic terrains of the Basin and Range province of Arizona.   | Y                 | PRA               | Y               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3-4   |                 | Prerequisite(s): GLG 310 with C or better; Pre- or corequisite(s): GLG 451 with C or better if completed  |
| GLG     | 460         | Astrobiology                        | Origin, early evolution, distribution, and future of life on Earth and elsewhere in the cosmos.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): AST 112 or BIO 182 or BIO 282 or GLG 102 or SES 122 with C or better; one 300-level course in AST or BIO or CHM or GLG or MIC or PHY or SES with C or better; Credit is allowed for only AST 460 or GLG 460                                  |
| GLG     | 461         | Geomicrobiology                     | Past and present interactions among microbial life, geological materials, and biogeochemical cycles involving carbon, sulfur, phosphate, nitrogen, and minerals.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 |   |
| GLG     | 464         | Solving Environmental Problems      | Capstone course intended primarily for seniors in the Earth and Environmental Studies degree program. Hybrid self-study design project workshop guided by faculty, in which student teams research and develop plans for a viable solution to a real environmental problem in the American Southwest.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): Earth and Environmental Sciences BA seniors; GLG 305, 325 or 327 with C or better  |
| GLG     | 470         | Hydrogeology                        | Geology of groundwater occurrence, aquifer and well hydraulics, water chemistry and quality, contaminant transport, remediation. Emphasizes quantitative methods.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 |   |
| GLG     | 471         | Hydrology                           | Descriptive and quantitative hydrology; hydrologic cycle, models, and systems. Rain-runoff models. Hydrologic design. Concepts, properties, and basic equations of groundwater flow. Emphasizes quantitative methods.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): CEE 341 or MEE 340 or GLG 362 with C or better; Credit is allowed for only CEE 440 or CEE 545 or CEE 598 (Hydrology) or GLG 471 or GLG 490 (Hydrology)   |
| GLG     | 476         | Climate Science for Sustainability  | Dynamic interactions among the oceans, earth surface and atmosphere that control Earth's climate in its present state, in the context of past climates and projections for future climates. Assesses the factors that affect the trajectory of future climate change, and the sources and measurement of the critical climate parameters that are essential for guiding decisions for a sustainable future. Also considers recent climate science-related controversies, as well as assessments of scientific statements related to these controversies. | N                 | SEM               | N               | GNA           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisites with C or better: Sust or Bus (Sust) major: SOS 110, PUP 190 or SOS 111 OR non-Sust major with 2 of these: PUP 190, SOS 100, SOS 110, SOS 111, SOS 300; Credit allowed for only GLG/SOS 476 or 576 or GLG/SOS 494 or 598 (Climate Sci for Sust) |
| GLG     | 481         | Geochemistry                        | Origin and distribution of the chemical elements. Geochemical cycles operating in the Earth's atmosphere, hydrosphere, and lithosphere.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): BCH 341, CHM 341, CHM 346, or GLG 321 with C or better; Credit is allowed for only CHM 481 or GLG 481  |
| GLG     | 484         | Internship                          | Structured practical experience following a contract or plan, supervised by faculty and practitioners.   | Y                 | LEC               | Y               | Z1            | Liberal Arts and Sciences | School of Earth and Space Exploration | 1-12  |                 |   |
| GLG     | 485         | Meteorites and Cosmochemistry       | Chemistry of meteorites and their relationship to the origin of the Earth, solar system, and universe.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): CHM 341, CHM 346, or GLG 321 with C or better; Credit is allowed for only GLG 485 or CHM 485   |
| GLG     | 489         | Field Geochemistry                  | Explores basic field measurements and sampling techniques for environmental systems, with a focus on carbon cycling in the Colorado River. Surveys a variety of geochemical principles, including: equilibrium aqueous speciation, acid-base chemistry, solution-mineral equilibrium systems, oxidation-reduction reactions, organic and environmental geochemistry and biogeochemical cycles. Applies chemical principles and analytical techniques to answer questions about environmental systems and processes.                                      | N                 | LEL               | N               | GNA           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     | L               | Prerequisite(s): CHM 302 or GLG 321 or GLG 481 with C or better; Credit is allowed for only CHM 489 or GLG 489 or GLG 490 (Field Geochemistry)  |

| GLG     | 497         | Honors Colloquium                   | A class emphasizing discussion, written and/or oral presentation by students, and active participation.  | N                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 1-6   |                 | Prerequisite(s): Barrett Honors student   |
| GLG     | 498         | Pro-Seminar                         | Small-group study and research for advanced students within their majors. Major status in the department or instructor approval is required.   | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 1-7   |                 |   |
| GLG     | 499         | Individualized Instruction          | Provides an opportunity for original study or investigation in the major or field of specialization on an individual and more autonomous basis. Neither a substitute for a catalog course nor a means of taking a catalog course on an individual basis. Requires application well in advance of regular registration with the student's advisor, the advisor's signature, and approval by both the instructor with whom the student will work and the chair of the department offering the course.  | Y                 | LEC               | Y               | Z1            | Liberal Arts and Sciences | School of Earth and Space Exploration | 1-3   |                 |   |
| GLG     | 546         | Advanced Watershed Hydrology        | Watershed processes leading to runoff generation and the transformation of meteorological forcing through a hydrologic system. Emphasizes physical mechanisms and their treatment in numerical models. Quantification of uncertainty in hydrological modeling through probabilistic methods. Provides hands-on experience with data analysis and hydrologic models.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only GLG 546 or GLG 598 (Advanced Watershed Hydrology) or CEE 546   |
| GLG     | 549         | Ecohydrology of Semiarid Landscapes | Interactions between terrestrial plants and limiting resources in arid and semiarid environments. Temporal and spatial aspects of plant-water relations. Process-oriented discussion and examples using simple and complex numerical models. Provides experience with data analysis and instrumentation.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 3     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student; Credit is allowed for only CEE 549 or CEE 598 (Ecohydrology of Semiarid Landscapes) or GLG 549 or GLG 598 (Ecohydrology of Semiarid Landscapes)   |
| GLG     | 576         | Climate Science for Sustainability  | Dynamic interactions among the oceans, earth surface and atmosphere that control Earth's climate in its present state, in the context of past climates and projections for future climates. Assesses the factors that affect the trajectory of future climate change, and the sources and measurement of the critical climate parameters that are essential for guiding decisions for a sustainable future. | GLG     | 790         | Reading and Conference  | Independent study in which a student meets regularly with a faculty member to discuss assignments. Course may include such assignments as intensive reading in a specialized area, writing a synthesis of literature on a specified topic, or writing a literature review of a topic.   | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GLG     | 791         | Seminar   | A small class emphasizing discussion, presentations by students, and written research papers.   | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Earth and Space Exploration | 1-12  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GLG     | 792         | Research  | Independent study in which a student, under the supervision of a faculty member, conducts research that is expected to lead to a specific project such as a dissertation, report, or publication. Assignments might include data collection, experimental work, data analysis, or preparation of a manuscript.  | Y                 | LEC               | Y               | Z1            | Liberal Arts and Sciences | School of Earth and Space Exploration | 1-15  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GLG     | 795         | Continuing Registration                                       | Used in situations where registration is necessary but where credit is not needed. Replaces arbitrary enrollment in reading and conference, research, thesis, dissertation, etc. Used by students when taking comprehensive examinations, defending theses or dissertations, or fulfilling the continuous enrollment requirement in doctoral programs. Credit is not awarded, and no grade is assigned.   | Y                 | LEC               | Y               | Z3            | Liberal Arts and Sciences | School of Earth and Space Exploration | 1     |                 | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GLG     | 799         | Dissertation  | Supervised research focused on preparation of dissertation, including literature review, research, data collection and analysis, and writing.   | Y                 | LEC               | Y               | Z2            | Liberal Arts and Sciences | School of Earth and Space Exploration | 1-15  |                 | Prerequisite(s): degree- or nondegree-seeking graduate student |
| GPE     | 10          | English Verbal Skills for International Scholars              | Helps international graduate students (prospective ITAs) as well as other graduate students or visiting scholars at ASU improve their spoken English (pronunciation and fluency). Helps familiarize students with American classroom culture and helps them become effective classroom teachers. Each student receives an individual pronunciation assessment to help him or her focus on areas needing improvement. There is direct instruction and practice of pronunciation (e.g., sound, stress, rhythm, intonation). By participating in and leading class discussions, by working in small groups or pairs and by preparing for videotaped presentations, students improve English fluency. | N                 | LEC               | Y               | YGB           | Office of the Provost     | Global Launch                         | 3     |                 |  |
| GPE     | 11          | International Scholar Teacher Training                        | Familiarizes international graduate students (prospective ITAs) at ASU with American classroom culture and helps them become effective classroom teachers. Exposes various methods of teaching commonly used in the American university classroom.  | N                 | LEL               | N               | YGB           | Office of the Provost     | Global Launch                         | 3     |                 |  |
| GPE     | 90          | Business Presentation Skills                                  | Develops ability to verbally persuade, inform and motivate an audience. Covers integral key competencies such as: identifying audience, researching and organizing information, preparing and delivering effective visuals, and communicating concisely in English. Coupled with activities which include impromptu business-themed presentations, evaluations by the professor and feedback from peers.  | Y                 | LEC               | Y               | YGB           | Office of the Provost     | Global Launch                         | 6     |                 |  |
| GPE     | 91          | Academic and Business Writing Skills                          | Develops the skills needed to write clearly and effectively, in both academic and business settings, through the exploration of efficient techniques and writing processes for targeting specific audiences with impactful content.   | Y                 | LEC               | Y               | YGB           | Office of the Provost     | Global Launch                         | 6     |                 |  |
| GPE     | 92          | Critical Thinking Through Case Studies and Reading Strategies | Teaches international students reading and critical thinking strategies required for a master's-level program. Teaches how to read and understand dense textbooks, articles and magazines in a timely fashion and identify the important information.   | Y                 | LEC               | Y               | YGB           | Office of the Provost     | Global Launch                         | 6     |                 |  |

| GPE     | 93          | American Business and Cross-Cultural Communication | Improves international students' ability to compare and contrast aspects of American business culture with other cultures in order to understand similarities and differences.   | Y                 | LEC               | Y               | YGB           | Office of the Provost     | Global Launch                                      | 6     |                 |   |
| GPE     | 94          | Business Listening and Conversation                | Improves the student's ability to effectively communicate orally at a master's level. Covers speaking and listening strategies and skills necessary to participate in discussions related to business topics. Students learn to control the input they receive and produce coherent and appropriate responses.   | N                 | LEC               | N               | YGB           | Office of the Provost     | Global Launch                                      | 6     |                 |   |
| GPH     | 111         | Introduction to Physical Geography                 | Spatial and functional relationships among climates, landforms, soils, water, and plants. Both GPH 111 and GPH 112 must be taken to secure SQ General Studies credit.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     | SQ              |   |
| GPH     | 112         | Introduction to Physical Geography Lab             | Includes some local or virtual field trips. Both GPH 111 and GPH 112 must be taken to secure SQ General Studies credit.  | N                 | LAB               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1     | SQ              | Pre- or corequisite(s): GPH 111   |
| GPH     | 191         | First-Year Seminar                                 | Small course emphasizing student-faculty discussion and interaction. Required for first-year students. Must have taken 25 or fewer credit hours. Consulting an academic advisor before enrolling is recommended.   | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-3   |                 | Pre-requisites: Freshman standing; Maximum 25 hours   |
| GPH     | 194         | Special Topics                                     | Covers topics of immediate or special interest to a faculty member and students.   | Y                 | LEC               | Y               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1-4   |                 |   |
| GPH     | 210         | Society and Environment                            | Examines the interaction among social processes, key environmental issues, and nature's role as a resource at global and regional scales.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     | G               |   |
| GPH     | 211         | Landform Processes                                 | Laboratory science class on earth-surface processes, with exercises emphasizing how erosion, transportation, and deposition modifies landforms.  | N                 | LEL               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 4     | SQ              |   |
| GPH     | 212         | Introduction to Meteorology                        | Fundamentals of weather and climate, including basic atmospheric processes and elements. Students whose curricula require a lab course must also register for GPH 214. Both GPH 212 and 214 must be taken to secure SQ General Studies credit.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     | SQ              |   |
| GPH     | 213         | Climate and Weather                                | Fundamentals of meteorological/climatological analysis, including terminology and symbology. Recommended for meteorology/climatology program students. Both GPH 213 and GPH 215 must be taken to secure SG General Studies credit.   | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     | SG              |   |
| GPH     | 214         | Introduction to Meteorology Laboratory             | Introduces basic meteorological/climatological data and measurements. Suggested concurrent enrollment in GPH 212. Both GPH 212 and 214 must be taken to secure SQ General Studies credit.  | N                 | LAB               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1     | SQ              |   |
| GPH     | 215         | Climate and Weather Laboratory                     | Fundamentals of meteorological/climatological map analysis and interpretation. Recommended for meteorology/climatology program students. May be taken concurrently with GPH 213. Both GPH 213 and GPH 215 must be taken to secure SG General Studies credit.   | N                 | LAB               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 1     | SG              |   |
| GPH     | 267         | Extreme Weather                                    | Introductory survey of extreme weather and climate processes and the often disastrous consequences at the intersection of human operations.  | N                 | LEC               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     | L               | Prerequisite(s): ENG 101, ENG 105, or ENG 107 with C or better  |
| GPH     | 275         | Geography of Cyberspace                            | Focuses on the relationship between geography and human's use of (and creation of) Internet and communications technologies to interact with each other over space and time. Studies the cyberspaces that they produce and their impacts on the information society. Topics include cyberpunk and space in popular culture; computer spaces, virtual worlds, and gaming; mapping cyberspace; bots, crawlers, and viruses; cyberspace law; cyberspace as social media; historical cyberspaces; the Digital Divide; geographies of e-commerce; mobile cyberspaces; cyberspace; and code/space. | N                 | LEL               | N               | OPT           | Liberal Arts and Sciences | School of Geographical Sciences and Urban Planning | 3     |                 |   |
