IPI	296	Inquiry	To be most effective in work and life, we need to learn how to recognize and solve problems, and to work in teams. Students work together to reach understanding on a large goal associated with human society and space exploration. An example from a previous class is, "What will the Moon be like after human settlement?" As a class, uses a weekly inquiry cycle to step toward the goal: read some content, ask a "natural next question" that takes us one step further toward the goal, seek content to help answer that question, and repeat. Students learn how to understand a complex problem through multiple steps, to approach challenging primary content, to productively critique each other's work, and to think critically. Students meet for 2 hours per week but work extensively outside of class.	Y	LEL	Y	GNA	The College of Liberal Arts and Sciences	Dean, The College of Liberal Arts and Sciences	3

IPI	496	Advanced Inquiry	To be most effective in work and life, we need to learn how to recognize and solve problems, and to work in teams. Students work together to reach understanding on a large goal associated with human society and space exploration. An example from a previous class is, "What will the Moon be like after human settlement?" As a class, uses a weekly inquiry cycle to step toward our goal: read some content, ask a "natural next question" that takes us one step further toward the goal, seek content to help answer that question, and repeat. Each student runs an independent research project using the techniques taught throughout the course. The research project requires some knowledge creation--that is, development of ideas, supported hypotheses, observations and the like, that add to the mass of human knowledge rather than just restating it. IVD	525	Fundamentals of Entrepreneurial Leadership	"Experiential" course for students to practice "being" a leader at the personal, interpersonal and community levels. While typical leadership classes leave one knowing about leaders and leadership, this class leaves students being leaders as part of their natural self-expression. The program follows an ontological pedagogy, rather than epistemological one. Ontology is the study of the nature and function of being "as lived" in real time. Epistemology by contrast deals with the varieties, grounds, and validity of knowledge. Leadership skills include mastery of communication at each of the three levels, from personal relationships to large-scale messaging for media and branding; and looking beyond the personal and interpersonal sociological level of analysis to incorporate principles of social and environmental justice into their relationships and the enterprises they lead.	N	LEC	N	GNA	Herberger Institute for Design and Arts	The Design School	3		Prerequisite(s): Innovation and Venture Development MS student; Corequisite(s): IVD 560; IVD 561
IVD	560	Innovation Studio I: Discovery and Insight	A prerequisite for successful innovation and venture development is a deep understanding of the multidimensional context in which the innovation will be situated, and in which the venture will compete, whether a commercial enterprise or nonprofit. This course gives students the design, business and engineering research and evaluation tools and experience to investigate and immerse themselves in industry or sector customer needs, the competitive landscape and cultural context, as well as ways to predict and mitigate the unintended consequences of their innovation on society and the environment. Teaches students where to begin, how to inquire, how to evaluate information they uncover, and how to use critical thinking and analysis to develop the insights that become the foundation of their venture-development journey.	N	STO	N	GNA	Herberger Institute for Design and Arts	The Design School	3		Prerequisite(s): Innovation and Venture Development MS student; Corequisite(s): IVD 525
IVD	561	Innovation Studio II: Problem Reframing	Problem reframing is essential to the innovation process, and to properly diagnosing problems so they can be investigated from multiple perspectives. It entails pushing past conventional assumptions about barriers to success, to find root causes--sometimes different problems altogether--that inspire novel, diverse approaches. Problem reframing is a powerful tool that increases the options and resources available in addressing any challenge. Students learn the difference between root causes and symptoms, understand the systems affected by and affecting their challenge, and learn to see and act on problems as opportunities for breakthrough solutions.	N	STO	N	GNA	Herberger Institute for Design and Arts	The Design School	3		Prerequisite(s): Innovation and Venture Development MS student; IVD 560; Corequisite(s): IVD 525
IVD	562	Innovation Studio III: Explore, Fail, Solve	In this iterative, creative "make-to-learn" phase of venture development, students explore prototyping and testing with audiences or end-users to develop feedback loops for real-time evaluation of their ideas, then synthesize learning from both successes and failures to progress toward a solution. Key components include mastery of ideation and creative development, framing strategic questions and success indicators for prototyping of services or products, evaluation of feedback and iteration of progressively more promising ideas, and evaluation of their innovations measured against the success indicators they developed. Students learn and practice prototyping service interactions as well as product innovations. IVD	630	Scaling Entrepreneurial Leadership	The personal skills required to succeed in a small start-up environment are different from those required to run a successful enterprise or nonprofit. Many entrepreneurs do not have access to the learning that prepares them to both launch and successfully scale their venture. Complexities of board management, fostering a creative culture, codifying a communication system that becomes a source of energy and a north star for the organization, inculcating values of social and environmental justice into a culture and translating them into daily behavior are required capacities which cannot be learned in theory, only in practice. Students master the skills to lead an enterprise through the challenges of the 21st century.	N	LEC	N	GNA	Herberger Institute for Design and Arts	The Design School	3		Prerequisite(s): Innovation and Venture Development MS student; GRA 562 with C or better; Corequisite(s): IVD 562; IVD 660
IVD	660	Innovation Studio IV: Business Model	Faced with the challenge of business model generation and prototyping, students need to define the starting points of value proposition, supply chain and customer segments. Later in the process, a clear description of the revenue model, customer relationship, key resources, key activities, key partners and cost structure complement the original value proposition design. The refinement of the newly created business model is made through a process of iteration. Students have an overall comprehension of the strategic innovation process made of (a) strategy, (b) execution, (c) tools and (d) metrics before moving to the stages of scaling and growth of the business. In order to develop a viable business model, students need to understand the costs of development, manufacturing and getting their goods or services to customers.	N	STO	N	GNA	Herberger Institute for Design and Arts	The Design School	3		Prerequisite(s): Innovation and Venture Development MS student; IVD 525; IVD 560; IVD 561; IVD 562; Corequisite(s): IVD 630

IVD	661	Innovation Studio V: Scale	SCALE is translated as proportional growth of production and profit aiming at a larger market position. Understanding the timing to scale a business model is crucial to its success and scaling can be discussed in terms of market, process and team. Faced with scaling issues of their business models, students need to build their own framework—or tools—in order to make decisions concerning the whens (time) and hows (market, process, tools) of scaling. Topics covered also include, but not limited to, venture funding strategies, budgeting capital needs, developing e-commerce, CRM analytics, supply chain and operations. At the end of this semester, students present a fully developed venture, with clearly articulated market need, viable innovation based on end-user feedback, business model and plan for scale. Where relevant, students register their intellectual property through ASU, using the university's published guidelines and procedures. JST	346	Israeli Wars in Israeli Movies	From its first day, the State of Israel has been in a state of war with the Arab countries. Every few years, the fighting erupted into an open war. At the beginning of the country, there was a consensus that the wars were forced on the Israelis, and therefore, the heavy toll on human life was unavoidable. Since the Six Day War, 1967, and the political change in 1977, Israeli society is split in attitude toward war. The absolute belief in the political and military leaders was shaken, and new political agendas entered the political arena. To this divided society, the Intifadas occurred with the waves of terrorism. These events added fire to the heated debates in Israel. One means of expression is through the cinema. In this course, students watch, analyze, and discuss selected movies on the Israeli wars and terrorism in the streets of Israel. Through these movies, produced by Israelis, we'll try to understand the mood and attitude of the Israelis toward war, enemies, and political and military leaders. Examines the concepts of feminism through a Mexican framework, starting from the point of view of Mexican women theorizing about their own. This is not a history of feminism, but it does aim to highlight certain fundamental texts and key concepts of Mexico's history from the position of women writers, including feminism's critique of social structures beyond the bounds of gender relations. LAS	404	Conquest and Encounters in Colonial Latin America	How did Hernan Cortés and Francisco Pizarro defeat the Aztec and Inca Empires? Despite numeric inferiority, limited provisions, and little knowledge about the Americas, Cortés and Pizarro defeated advanced civilizations that had experienced warriors and millions of inhabitants. Possible explanations include the conquistador's valor, advanced weaponry, superior military strategy, Indian allies, and biological attacks. In their encounters with native peoples of the Americas, Europeans were not always conquerors. Alvar Núñez Cabeza de Vaca and Lope de Aguirre failed both in their attempt to conquer a large Indian civilization and in their effort to find mineral wealth. A few Europeans such as Bartolomé de Las Casas spoke out against the abuses committed against the Indians during the conquest. Explores these issues from the perspective of both Europeans and native peoples and looks at the long-term impact for Latin America and its peoples. LAW	681	Construction Law	The construction of an actual project serves as the "laboratory" for the course. Many of the problems presented in class each week are based on "real time" events occurring on that project and the class visits the actual construction site during one of the classes. Focuses on practical construction law issues taught by an experienced practicing lawyer. Topics include: types of construction contracts; the basic relationships among the owners, architects/engineers, general contractors, subcontractors and material suppliers on a project; express and implied warranties; the role of the schedule and claims related to scheduling; change orders and concealed site condition claims; the Economic Loss Doctrine; mechanics' liens, stop notices and other payment remedies; proving damages; and the trial of a construction case and the use of expert witnesses. But the extent to which the State should regulate who can reproduce and under what circumstances raises a host of difficult questions. This course searches for answers to those questions by considering the role the Constitution, tort, contract, property and criminal law have traditionally played in advancing the State's interest in reproduction and discussing how those doctrines should adapt to new technologies and family configurations. Bad actors are using powerful tools and techniques to infect our information supply, sowing confusion and discord. While there are laudable efforts to staunch the flow of misinformation, media users need help in deciding what information to trust. Examines the evolution of misinformation and the range of content types that fall under its umbrella. Explores tools, techniques and tactics that individuals can employ to identify misinformation, and gives them a head start on making informed decisions on what, and whom, they can trust. Students learn and adopt a minimum new language to help express the elements of music they experience and listen to and develop strategies for writing and communicating about what they hear and put words to how they respond to it. Because experiencing music performed live is an integral part of the learning process, students are required to attend concerts outside of class and submit critical reviews of what they hear. OGL	520	Organizational Leadership: Social Psychological Perspectives	Social psychology is defined by the social influence that all people have on the beliefs, feelings and behavior of others. Studies social influences, the behavioral ramifications associated with the psychology of social processes and the ramifications for organizations and organizational leadership. The foundations of the field of social psychology, methodological approaches, interdisciplinary perspectives and application-oriented ideas and innovations form the basis for this course that integrates scholarship and applied social psychology to gain an enhanced perspective on the social influences associated with organizational and interpersonal behavior. N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	530	Critical Perspectives in Leadership Theory	Engages the normative and epistemological underpinnings of many of the theories of organizational leadership studies. This critical engagement explores how assumptions about leadership and leadership theories may challenge or reinforce, overtly or not, oppressive social relations. Places leadership studies as an academic field in a broader social, political, cultural and ethical context to best address the embedded assumptions in leadership relations.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	540	Evidence-Based Inquiry in Organizational Leadership	Provides a broad understanding of the methodological issues involved in leadership research. As such, exposes students to the assumptions, principles and applications of a selected set of research methods, whether inductive, deductive or abductive. Largely hands on with a focus on discussion and exercises.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	550	Leading Organizational Change	Organizations are a combination of structures, processes and relationships that bring people together to achieve a common goal. However, organizations do not operate in isolation—they are embedded in complex social, political and financial contexts. Leadership requires individuals to discern and balance competing demands and tensions inherent in organizations. Provides an overview of organizational theories to help leaders understand and be effective in these contexts. By looking at organizations through metaphorical lenses such as machines, brains and organisms, students learn how to create new options for organizational success in ever-changing operating environments. Applies theories to case studies to develop insights and innovative approaches to organizational change. A student deliverable is the creation of a plan to map out the student's capstone project in preparation for the applied project.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	551	Developing Leadership Through Emotional Intelligence	Encourages greater knowledge of self through personal reflection, participation in experiential activities and numerous opportunities to make sense of discoveries. All of this occurs within the context of expanding knowledge of leadership skills and abilities. Encourages students to take every opportunity to learn about and bring insights to bear in classroom discussions. Shapes the leader within so that students are best positioned to lead in all areas of life. Over the next few weeks, explores the essential knowledge, abilities and values relevant to effective leadership. By the end of this course students have a greater understanding of their own leadership style and developmental plan for acquiring new leadership-related knowledge and abilities throughout their careers.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	552	Leading Diverse Teams	Helps students build more effective working relationships and improve their ability to lead, influence, cooperate and work effectively with others in today's increasingly team-oriented organizations. This course may differ from previous courses taken. At the center of the course is an intensive, unstructured learning group experience. The primary educational tool in this class is experience in a group (in this class referred to as a T-Group or Training Group). Other educational resources are readings, brief theory discussions, personal journals and a personal reflection paper after the class sessions conclude. These are fundamental for helping students to frame learning group experience and for facilitating learning. Emphasizes learning about oneself in the context of others based on the here-and-now experience of the group.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	553	Intercultural Leadership	In today's increasingly global and interconnected world it is important for leaders to understand the role that culture plays in one's leadership and communication style. Students obtain the knowledge and skills necessary to lead in culturally diverse environments. Through readings, discussions, video and interactive simulations, students gain a concrete understanding of a variety of leadership and communication styles that are found throughout the world. Students also increase their intercultural competencies and global awareness. OGL	554	Learning and Development in Organizations	Focuses on adult learning interventions and professional development within the context of a learning organizational setting. Integrates motivation and adult learning, current neuroscience, Bohm dialogue and instructional design. Develops the knowledge and skills needed to plan, design, develop, implement and evaluate adult learning interventions (materials, courses, curricula, programs) within different forms of organizations.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	555	Leading Beyond Conflict	Today's leaders are increasingly confronted with conflicts that escalate into issues that could result in costly litigation. Comprises a review and analysis of contemporary methods of alternative dispute resolution, including arbitration, negotiation and mediation, with a strong focus on mediation. Students learn about the alternatives to costly litigation and develop working strategies to take advantage of these alternatives.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	556	Leadership for Wicked Environmental Problems	Environmental leadership promotes a societal change such that we move away from the perspective where economic growth is valued and takes precedence above all to one that both recognizes the limits and value of natural resources in our environment and embraces just conservation practice. The environmental challenges we are faced with today (e.g., climate change, renewable energy) are described as "wicked." Wicked problems are difficult to explain, plainly define, have no one solution, and are often the result of other indefinable problems. Environmental leadership focuses on engaging followers to jointly and creatively confront wicked challenges and promotes environmental justice addressing the relationship between social inequality and environmental quality among various stakeholders. Course critically evaluates these leadership dimensions. This examination is not limited to Western ideals found in corporate organizations but also extends to conservation practice in the developing world.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	558	Leading Organizational Innovation	Every modern organization, regardless of sector or mission, needs leaders who understand the impacts of continuing innovation on organizational success and sustainability. Examines how leadership can facilitate innovative activities within every level of an organization. Students conduct independent research for integration into a collaborative team project in the development of a graphical conceptual model that includes factors such as culture, structure and collaborative activities that enhance organizational innovation.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	559	Modeling Systems and Stakeholders	Studies how leaders can use systems theory and stakeholder theory to assess the inputs from external stakeholders and their impacts on internal organizational systems. Using current literature, students work independently and in teams to build and apply a conceptual model of the significant relationships among organizational systems and stakeholders. Results highlight relationships among variables that can be tested using quantitative and/or qualitative research methods.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		
OGL	561	Collaborative Governance: NGOs and Private-Public Partnerships	Exposes students to the opportunities and challenges of the non-market, non-state realm of nongovernmental organizations and how they facilitate private-public partnerships. Assesses the realm of action, appropriateness of their missions and where they find their limitations. Requires students to think globally and consider the roles of various actors of civil society with a critical eye.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	562	Resource Development in Organizations: A Multiple Capitals Approach	Many types of resources are needed for organizations to achieve long-term sustainability. Surveys various capital resources firms need to succeed. Covers tools such as the International Integrated Reporting Council's six capitals framework (financial, manufactured, intellectual, human, social, natural) and theories that undergird these models. Through readings, case studies, and assignments, students learn about the process of value creation; the relationship between resources and an organization's business model; how the various forms of capital can be measured and reported; and what leaders can do to intentionally develop multiple forms of capital in a way that creates financial returns for the organization.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	563	Leading Social Change: Community Activism	Focuses on methods used to reform social, cultural or political norms, beginning at the local level and connecting with movements for broader social change. Grassroots movements arise on all sides of the political spectrum, and local movements can unite activists around common goals despite larger ideological differences. The term "grassroots" is a misnomer, however, in that it implies the lack of leaders or of institutional support, whereas in reality, leaders attempting to change society must learn to network with a variety of stakeholders, from the level of individual neighbors to political leaders and large institutions. Students look critically and creatively at the ways local leaders have worked on a daily basis to promote community-based causes, in order to become more effective local activists, organizers, and civic and community leaders.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	565	The Future of Work and Organizations	Focuses on the dynamic nature of work, labor and occupations related to social and technological change; the impacts on workers, management and society. Also addresses new and changing occupations and leadership roles related to new economies of scale.	N	LEC	N	GNA	College of Integrative Sciences and Arts	College of Integrative Sciences and Arts	3		Prerequisite(s): degree- or nondegree-seeking graduate student
OGL	569	Indigenous Leadership and Diplomacy	Offers critical insights into how indigenous peoples around the world have responded to challenging issues in both historical and contemporary contexts by drawing from case studies, primary source materials, and emerging scholarship on indigenous leadership and diplomacy. PAF	570	Microeconomics of Public Policy II	Provides the policy tools to solve economic problems such as market concentrations, market failures and externalities, and asymmetric information. Increasingly, government interventions are moving away from a command-and-control-style of direct provision of goods and services and toward a large menu of indirect approaches implemented through a complex system of third-party actors. Government intervention in private markets now entails loans and loan guarantees, grants-in-aid, contracts, vouchers, social and economic regulation, and many other policy tools. Each of these instruments involves vastly different behavioral distortions, policy technologies, political considerations and technical sophistication. Analyzes the economics of four policy interventions: grants, tax expenditures, social regulation and vouchers. Provides an overview of each tool (including its key design features) and combines economic theory with background information on how public policies actually operate. By the end of the course, managers have experience with tools (including Wikis, Blogs, search engines, collaboration tools, reputation systems, social networks, virtual worlds); are familiar with current information issues (transparency, privacy, equal access, governance); and explore how they are relevant to a variety of contexts (local government, non-profits, public service). Discusses data visualization techniques and engages students with Tableau software. Also explores the social, political and ethical considerations associated with building and managing data analytics programs in the public sphere. Explores issues-critical dilemmas when it comes to issues such as data privacy, data protection, predictive analytics, personalized service delivery and resource provision, algorithmic regulation, and large-scale data analytics for administrative efficiencies and resource management optimization, among others. Increasingly, however, public officials at all levels of government must confront challenges and opportunities that exist across borders. Whether the issue is immigration, national security, trade and finance, or the environment, public managers must be aware of global pressures and, in many cases, respond to them. This course gives managers the analytical tools to understand how global issues are currently being managed and what they might do to make the most of global opportunities. PBH	455	Public Health Program Evaluation	Federal, state and local policies shape the nature of the public health programs implemented in communities. Public health professionals are often responsible for evaluating, at multiple levels, the programs that result from such policies. Provides public health students with the analytical tools necessary to manage the implementation and evaluation of public health programs. Program evaluation serves many important functions. It supplies information to managers who are charged with implementing public health programs and to policymakers who face decisions about which programs to fund, scale back, expand, modify or eliminate. Evaluation is an accountability tool: when a public health agency decides to finance a program, they have a right to ask what their funds bought. Evaluation is also a vehicle for improving public health programs. By identifying what works and what does not—and how new programs fare relative to existing practice—policymakers and managers can improve program designs. POS	475	Morality and Politics	Should morality play a role in politics? Machiavelli gives us one sort of answer, urging politicians to be dishonest, deceptive and even cruel. Kant disagrees, arguing instead that politicians should adhere to their personal morality over political calculations. Explores this question in two ways. First, looks more at the disagreement between great thinkers in the Western political tradition. Second, investigates contemporary political actors who bring moral concerns to the fore, including dirty politicians and extremist citizens (for example, radical animal rights activists, militant environmentalists or global poverty zealots). Seminar course that incorporates in-class discussion and writing, options-based grading and creative assignments. Reviews research-based practical strategies for assessing the clinical symptoms, treatment needs and clinical outcomes of individuals who have problems with substance use. Students examine and explore how sociocultural views of substance use relate to patterns of use, and impacts individuals with substance use disorders, and their families. Uses a biopsychosocial approach to discuss the processes involved in addictive behaviors. Addresses how to weave assessment through the entire process of care, from initial screening, through treatment, to relapse prevention. Examines various screeners and assessments, and diagnostic interviews used to detect substance use disorders, along with the strengths and limitation of each. Although the current evidence base for the effects of psychosocial interventions is sizable, subsequent steps in the process of bringing a psychosocial intervention into routine clinical care are less well defined. This course details the reasons for the gap between what is known to be effective and current practice and offers recommendations for how best to address this gap by applying a framework that can be used to establish standards for psychosocial interventions. Legends about Dracula and the Count himself may be "untrue," but events that took place during the life and reign of the Wallachian Voevode Vlad Tepes, better known as Vlad the Impaler, are nonfictional. He ruled during the time of the Ottoman Empire extension to Europe and his fight against the Turks give us thought on the altered understanding of Vlad as a vampire figure. Occurring and recurring in continuously changed environments, Count Dracula affects everyone to the same degree, but still remains as secret and elusive as before, pitted against a vision of mysterious spaces that evoke the faraway castles from Whitby, UK (the origin of Stoker's Dracula), from Bran and Poenari Castles in Transylvania as well as the visions of Jules Verne's Castle of the Carpathians	N	LEC	N	OPT	The College of Liberal Arts and Sciences	School of International Letters and Cultures	3	HU	Prereq(s): ENG 101, 105 or 107 w/C or better; Credit allowed for only ROM 442 or SLC 442 or SLC 494 (Dracula&Vampire Belief in the World) or SLC 494 (Dracula&Vampire Castles) or SLC 494 (Dracula&Vampire Lore) or SLC 494 (Dracula:Between Myth&History)

The scandalous success of Lolita (1955) allowed Vladimir Nabokov to retire from teaching at Cornell University and move to Switzerland to devote himself to fiction, translation, criticism and lepidoptery. This was only one of the many metamorphoses that Nabokov, a Russian noble, underwent while in exile, moving from Russia to the Crimea, Cambridge UK, Berlin, Paris, Cambridge MA, Ithaca, Hollywood and finally Montreux. Examines the Russian roots of Nabokov's Russian (in translation) and American novels about exile: his first novel, Mary (1926), The Defense (1929), Glory (1932), and his tribute to 19th-century Russian literature, The Gift (1938), which he considered his greatest Russian novel. These are followed by Lolita (1955), Pnin (1957) and Pale Fire (1962), his memoirs, Speak, Memory (1966), and some essays and short stories. Films include Lolita by Stanley Kubrick (1962) and Adrian Lyne (1997). SBS	460	Global Cities	This close look at megacities in the global south decisively challenges the outdated impression that the rest of the world's cities still lag way behind the U.S. and Europe. The social sciences' debate over "global cities" anchors our examination of the reorganization of metropolitan social space under impact of neoliberal globalization since the 1970s. Explores urban inequalities of slums and dreamworlds; compares vernacular and transnational styles of urbanism (in architecture, design, markets, consumerism, jobs, ads, ways of living); and asks how transnational flows of people, capital and culture have reconfigured ethnic relations and national identities rooted in global cities. Students become virtual transnational flâneurs, tacking between the slums and skyscrapers of global cities, and conduct guided research on a global megacity to investigate how the production of the global city changes the lived space and urban culture of local residents, and how they respond. We ask, whose city is it? SES	106	Habitable Worlds	Are we alone in the Universe? If so, why? If not, where are our cosmic cousins? Such questions, once the domain of science fiction, are on the verge of being answered with science facts. Astronomers are discovering planets around other stars. Planetary scientists are exploring the worlds in our solar system. Biologists are unlocking the secrets of metabolism and evolution. Geoscientists are determining how the Earth supports life. And as we struggle to build a sustainable future for ourselves, all of us are finding out how technologically advanced civilizations rise and how they might fail. This course surveys these topics. In the process, students master basic concepts from across the major areas of science and learn what makes the Earth a habitable world. SES	121	Earth, Solar System and Universe	The Earth, solar system and universe are diverse and dynamic, featuring galaxies, solar systems, suns, planets and moons. Each type of feature is characterized by a suite of processes and features, such as volcanoes, landslides and climate. As scientists and engineers, we want to understand what is going on in our world. Understanding past events helps begin to predict future events. With the Earth, we examine past events and current natural processes to understand how this past and these processes affect humans. Accordingly, this course examines the processes, materials and features observed and inferred on the Earth, in the Solar System, and in the Universe. The course is purposely designed to be rather holistic, exploring concepts from stellar evolution, atmosphere and oceans on Earth and in extraterrestrial objects, plate tectonics, volcanoes and mountain building. Both SES 121 and SES 123 must be taken together to secure SQ General Studies credit.	N	LEC	N	OPT	The College of Liberal Arts and Sciences	School of Earth and Space Exploration	3	SQ	
SES	122	History of the Earth and Solar System	The Earth and solar system have a long and interesting history, spanning nearly five billion years. Earth and other objects in the solar system have evolved over time, punctuated by a series of events, such as mountain building, volcanic eruptions, impacts and extinctions. As scientists and engineers, we want to understand what events have occurred in our world and which aspects directly affect us or are most interesting. Understanding past events helps us comprehend what has happened and begin to predict future events. With the Earth, examines past events and current natural processes to understand how this past and these processes affect humans. Accordingly, examines the history of the Earth and solar system in the context of the processes, materials and features that can be observed and inferred. Explores the history of the Earth and solar system from a broad, interdisciplinary, perspective. SES	126	Exploration of the Universe	Introduces the basic principles of modern astronomy, with a focus on "Exploration Science," or the methods by which we explore our planet, our solar system, other stars, and even other galaxies. How do we explore? What is the "scientific method"? How is modern science carried out? Study of such questions helps form a solid foundational core for a major in the science of astrophysics--a major that spans many aspects of the universe as a whole. Don't be surprised if class includes stories about how ASU research is proceeding, or how a lesson in class is relevant to some research experience. A key goal is for you to be excited and informed about the incredible era of Earth and space exploration that we're all a part of! SES	141	Energy In Everyday Life	Energy is a concept that threads throughout science and engineering and is at the heart of understanding how the world around us works. What is energy? How is energy used in biological, chemical, electrical, mechanical, nuclear systems that impacts our daily lives? What would our world be like if there was a nearly infinite supply of inexpensive energy? Serves the needs of undergraduate students and future K-8 teachers of mastering basic concepts of energy generation, delivery, conversion, efficiency and what makes energy universal. This transdisciplinary online survey course helps students understand concepts and develop skills that crosscut scientific disciplines, such as the ability to observe, think critically and gather data to make order-of-magnitude estimates. SES	220	Biology of a Changing Earth	Offers a broad survey of basic biological principles, with an emphasis on aspects of biology that are particularly important in the context of interdisciplinary Earth and environmental sciences. Explores how life on Earth has emerged and diversified and how the ubiquity of this life affects the Earth's chemistry, land surface and climate. As many of our current environmental issues are a direct consequence of human impacts on organismal physiology, biodiversity patterns, or ecosystem processes, strongly focuses on application of biological knowledge. To name only a few examples, it is present in the ways that NGOs operate in conflict zones, in global health advocacy and awareness, in media coverage of distant catastrophes and seemingly imminent risks, and in disaster management and emergency response plans. Scholars in this field study topics such as war, diplomacy, conflict, migration, religious strife, terrorism and similar fields. SLC	439	Art in Exile: Vladimir Vladimirovich Nabokov	In English. The scandalous success of Lolita (1955) allowed Vladimir Nabokov to retire from teaching at Cornell University and move to Switzerland to devote himself to fiction, translation, criticism and lepidoptery. Examines the Russian roots of Nabokov's Russian (in translation) and American novels about exile: his first novel, Mary (1926), The Defense (1929), Glory (1932), and his tribute to 19th-century Russian literature, The Gift (1938), which he considered his greatest Russian novel. These are followed by Lolita (1955), Phin (1957) and Pale Fire (1962), his memoirs, Speak, Memory (1966), and some essays and short stories. SLC	442	Dracula and Vampire Lore	Vampire stories are not only local phenomena placed in Transylvania, as the common stereotype is incessantly spread. Legends about Dracula and the Count himself may be "untrue," but events that took place during the life and reign of the Wallachian Voevode Vlad Tepes, better known as Vlad the Impaler, are nonfictional. He ruled during the time of the Ottoman Empire extension to Europe and his fight against the Turks give us thought on the altered understanding of Vlad as a vampire figure. Occurring and recurring in continuously changed environments, Count Dracula affects everyone to the same degree, but still remains as secret and elusive as before, pitted against a vision of mysterious spaces that evoke the faraway castles from Whitby, UK (the origin of Stoker's Dracula), from Bran and Poenari Castles in Transylvania as well as the visions of Jules Verne's Castle of the Carpathians.
