- Civil Government (Andrews)
- School Law
- Geometry (Robinson)
- Political Economy
- Methods of Teaching (Brooks)
- General Review

GENERAL INFORMATION

The first term of the school year will commence on Monday, September 2, 1889, and continue sixteen weeks; the second term will open January 6, 1890, and continue twenty-four weeks.

LOCATION

The TERRITORIAL NORMAL SCHOOL is located at Tempe, Maricopa county, on the line of the Maricopa & Phoenix Railroad. Its situation is in a healthy locality, and in the midst of a farming community. The building is situated on a twenty-acre tract of land, and is a brick structure 60 x 70 feet in size and one-story high. A ten-foot hall extends through the building from north to south. Four rooms are provided, each thirty feet square. The entrance to the hall at each end is by double doors; and French windows placed at regular intervals of a few feet around the rooms afford ample light and ventilation. The building is surrounded by a hip roof, leaving a space of about eight feet between the roof and the ceiling. The entire structure is surrounded by a veranda twelve feet wide. Ventilators admit the passage of air from every direction, thus providing as cool a building as can be devised for this climate.

QUALIFICATIONS FOR ADMISSION

Applicants for admission must not be less than fifteen years of age, and will be

admitted on examination only. They must be of good morals and industrious habits. They must be able to pass an examination showing their ability to parse the words of any ordinary sentence; to solve any problem in arithmetic up to and including common and decimal fractions; in geography, to bound any State or territory, and locate the principal rivers, cities, etc., of the world; to write a legible hand, and to read intelligently.

GRADUATION

In order to graduate, the student must be at least eighteen years of age; must have attended the school for a period of twenty-two weeks, and must pass an examination in all the studies of the required course in the following manner: When the class is ready for graduation, the Principal will notify the Board; and at least one member of said Board shall be present at the examination. The examination will be conducted in writing; and the Principal shall forward to the Board, for their consideration in June, all papers containing the answers to all questions propounded at the examination. If it appears from the papers that the applicants for graduation have passed the required examination and possess the learning and other qualifications necessary to teach a good common school, said persons shall receive certificates which shall be evidence of graduation, and which shall entitle the holders to teach a grammar school in any county of the Territory for the period of four years. Such certificates shall be dated from the time the Board meets in June of that year, and shall be signed by the President of the Board and attested by the Secretary.

EXPENSES

Tuition is free to those who obtain an appointment from a member of the Legislature, and to those who sign a declaration that they attend the school for the purpose of preparing themselves for teaching in the public schools of Arizona. All others are charged four dollars per month. Board, including room, light, fuel, etc., can be obtained at from twenty to thirty dollars per month.

APPARATUS, ETC.

The school is supplied with most of the apparatus needed in illustrating the subjects taught. The Board has recently purchased a full set of the Encyclopoedia Brittanica, and also a number of instruments for illustrating the laws of physics.

DISCIPLINE

There should be no need to refer to the matter of discipline in a Normal School. Only those will be admitted who have well-formed and correct habits. This is in no sense a reform school; and young ladies and gentlemen who are not disposed to cheerfully submit to all the wholesome restrains found necessary for the good reputation of the school will be promptly dismissed.

Those only who do the work of the class creditably, and show an ability to continue, will be promoted with the class.

No student will be permitted to pass over the work of any term more than twice.

The Principal of the School represents the authority of the Board, and is held responsible for the enforcement of the regulations made by the Board for the government of the school. He shall have control of the building, apparatus, books, etc., as well as the grounds.
