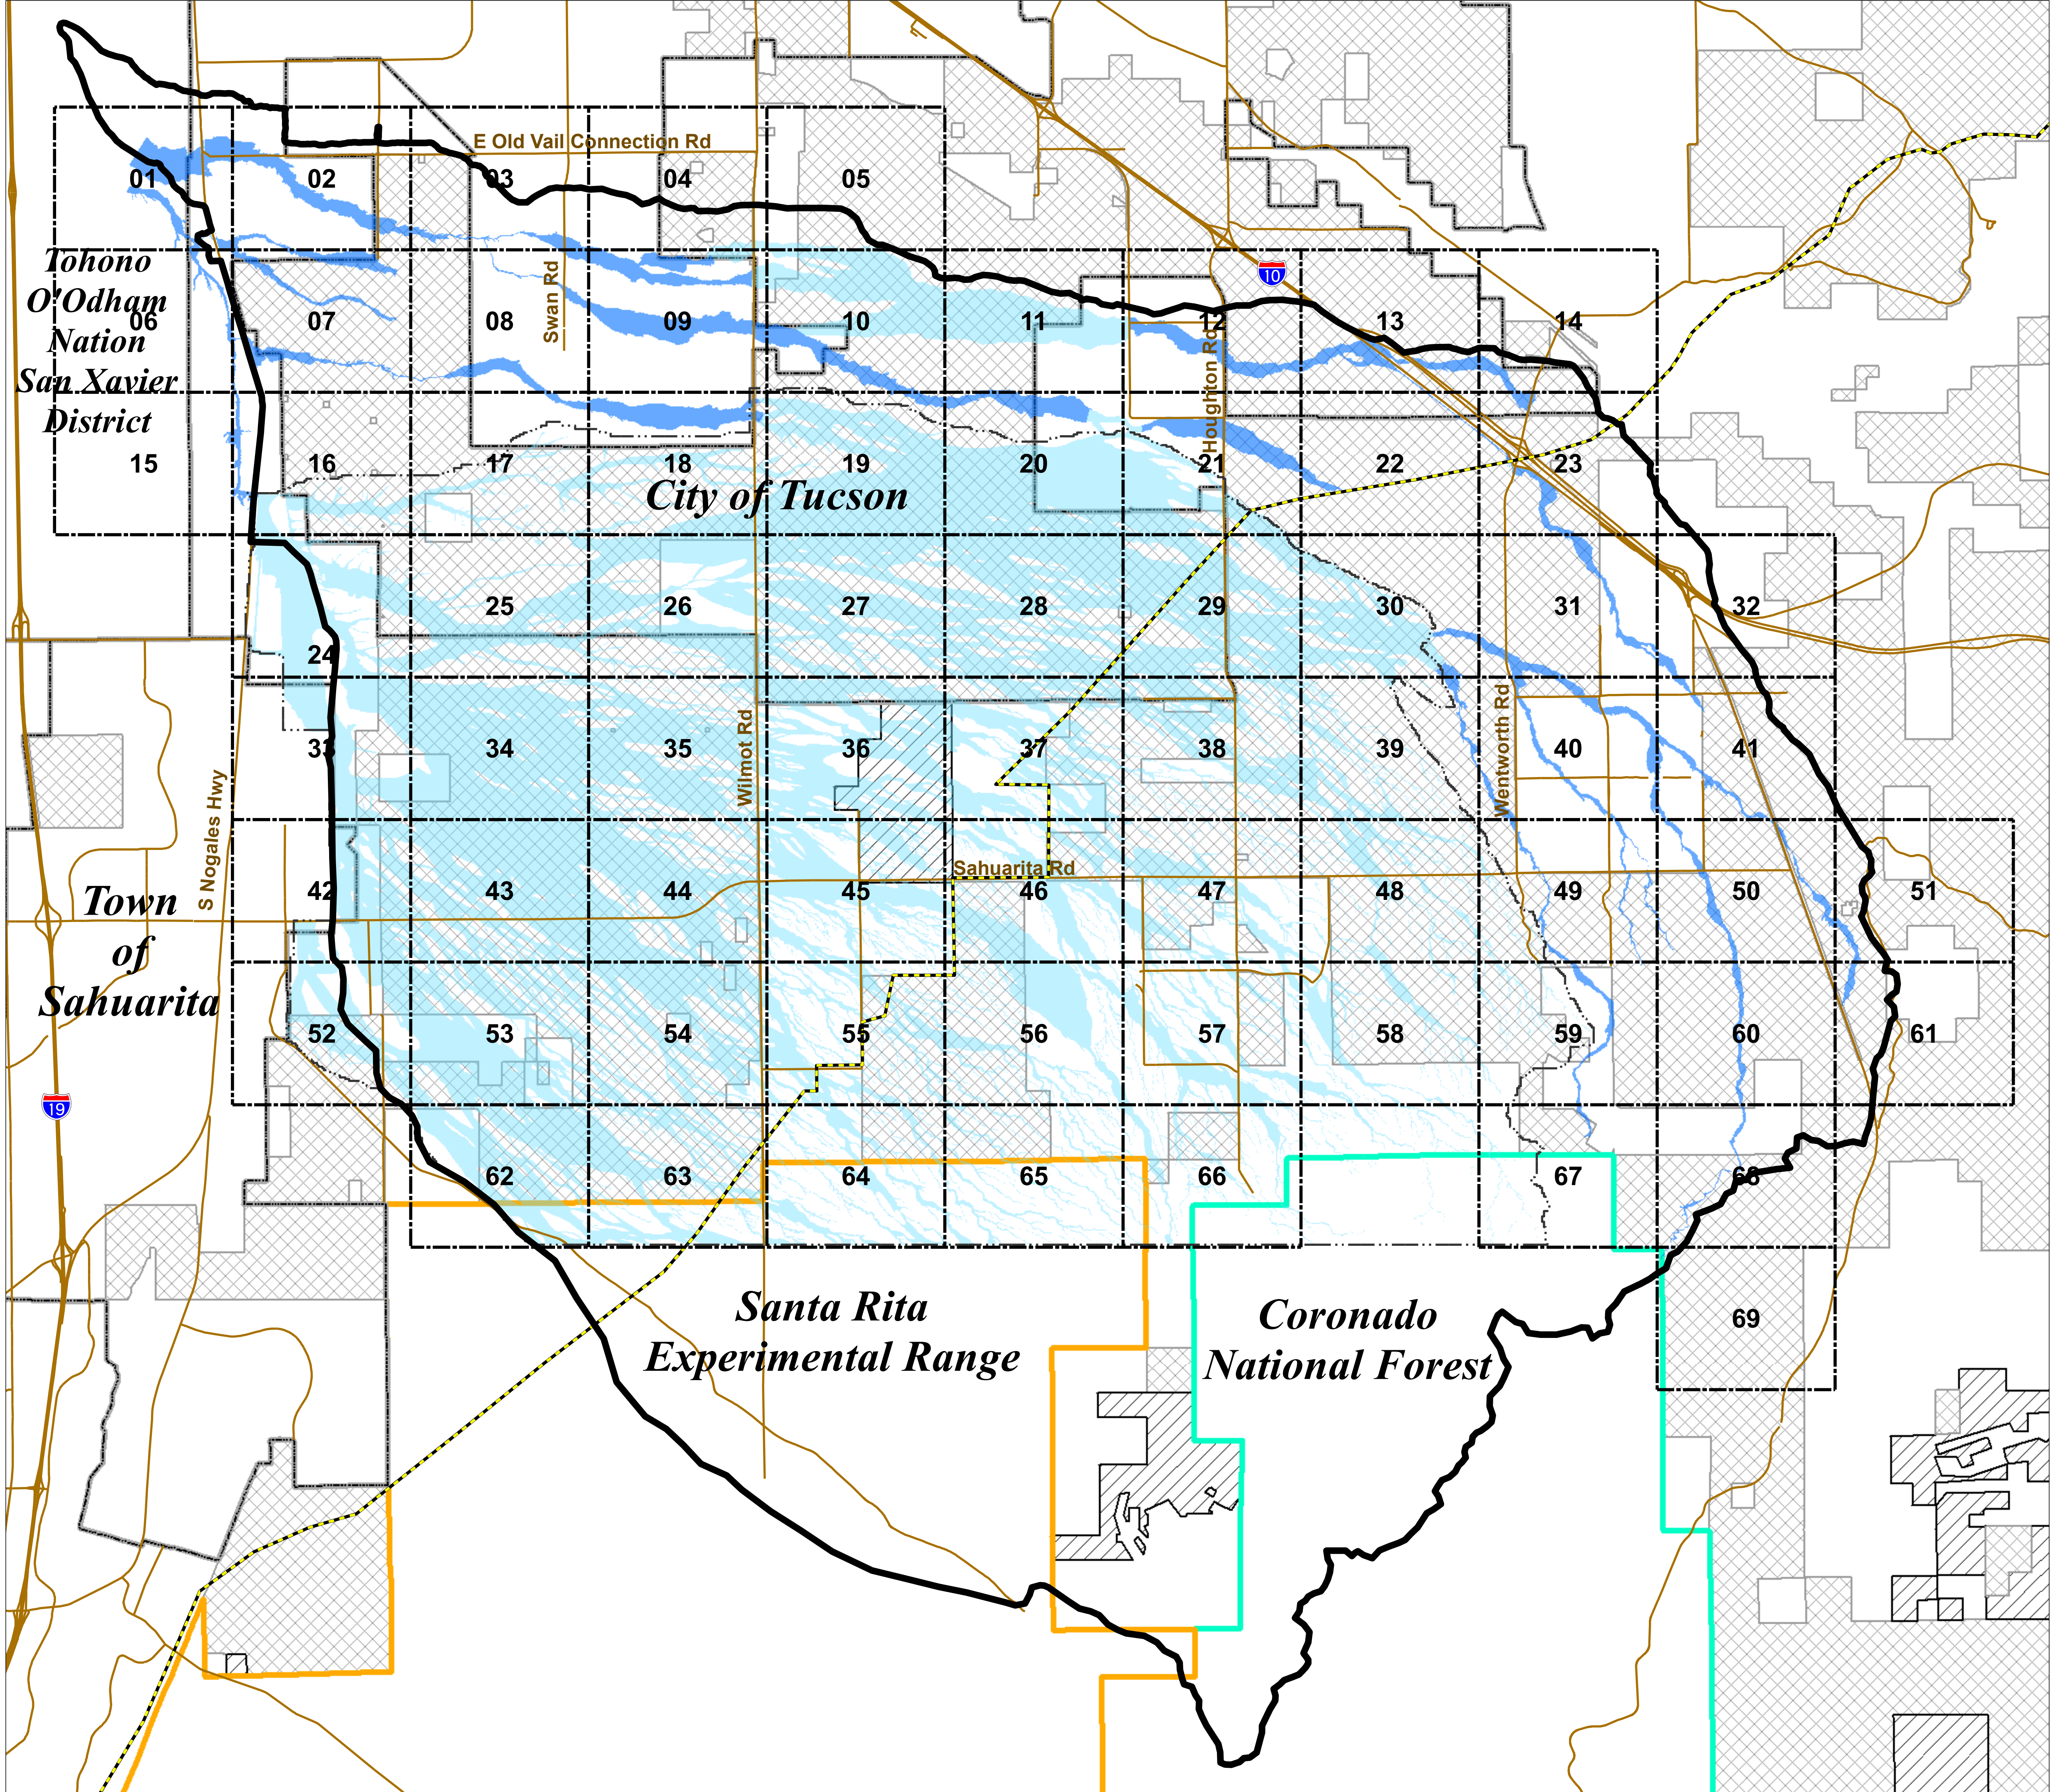

## Exhibit 1 - FLO-2D Predicted Flood Inundation Maps Flow Depths

# Lee Moore Wash Basin Management Study

## Exhibit 1 - Lee Moore Wash Basin Management Study 100-yr Floodplain Maps

The floodplains presented on this exhibit reflect the outcome of HEC-RAS and/or FLO-2D hydraulic modeling based on 100-year peak flows developed for either the 3-hour or 24-hour storm event. Maps do not necessarily show flooding resulting from localized, higher intensity storms.

### Index Map Legend

- Major Streets
- CLS Designation Boundary
- Lee Moore Watershed Basin Study Area
- 100-ft Resolution FLO-2D Model Boundary
- 100-yr FLO-2D Flood Limits ( $Q_p > 100\text{cfs}$ )
- 100-yr HEC-RAS Flood Limits ( $Q_p > +/-1000\text{cfs}$ )
- Municipal Boundary
- Coronado National Forest
- Santa Rita Experimental Range and Wildlife Area
- Bureau of Land Management
- State Trust Land

### Plan Set Legend (Sheets 01 to 69)

- Unmodeled Breakout Potential
- Flow arrow
- Sheet line
- Streets (major)
- 10-ft Contours (NAVD 88)
- FLO-2D Flow Recording Cross Sections (discharge in cfs)
- CLS Designation Boundary
- Concentration Point
- 100-yr FLO-2D Flood Limits ( $Q_p > 100\text{cfs}$ )
- 100-yr HEC-RAS Flood Limits ( $Q_p > +/-1000\text{cfs}$ )
- Section Line
- Parcels (approximate)
