**ANNUAL HYDROLOGIC
DATA REPORT
VOLUME I: PRECIPITATION
WATER-YEAR 2017**

PREFACE

This publication presents precipitation data collected by the Flood Control District of Maricopa County's (FCDMC) automated ALERT system. This telemetered flood-detection network is located primarily throughout Maricopa County, Arizona with additional stations in Yavapai, Pinal, Gila, Yuma and La Paz Counties.

The data contained in this report were collected, compiled and edited by the Flood Warning Branch of the Engineering Division. Precipitation data include daily, monthly, and annual totals for 347 stations owned and maintained by FCDMC. The ALERT base station computers also collect and store data from various stations not owned by FCDMC - data from these stations are not included in this report.

Information contained herein is as accurate and complete as possible within the limitations of real-time ALERT data collection technology currently available. Wherever possible, footnotes have been included to identify questionable, estimated or missing data. Reliance upon the accuracy, reliability or authority of this information is solely the responsibility of the user.

This report is Volume 1 of a 3 volume set entitled "Annual Hydrologic Data Report - Water Year 2017". Volumes 2 & 3 in order are [2] Surface Water Report; and [3] Weather Data Summary. Additional copies of this report, and copies of the companion volumes, may be purchased from:

Precipitation Data

[Daily Totals](#) and Statistics for Precipitation Stations 1 - 347
(In Order of Gage ID Number)

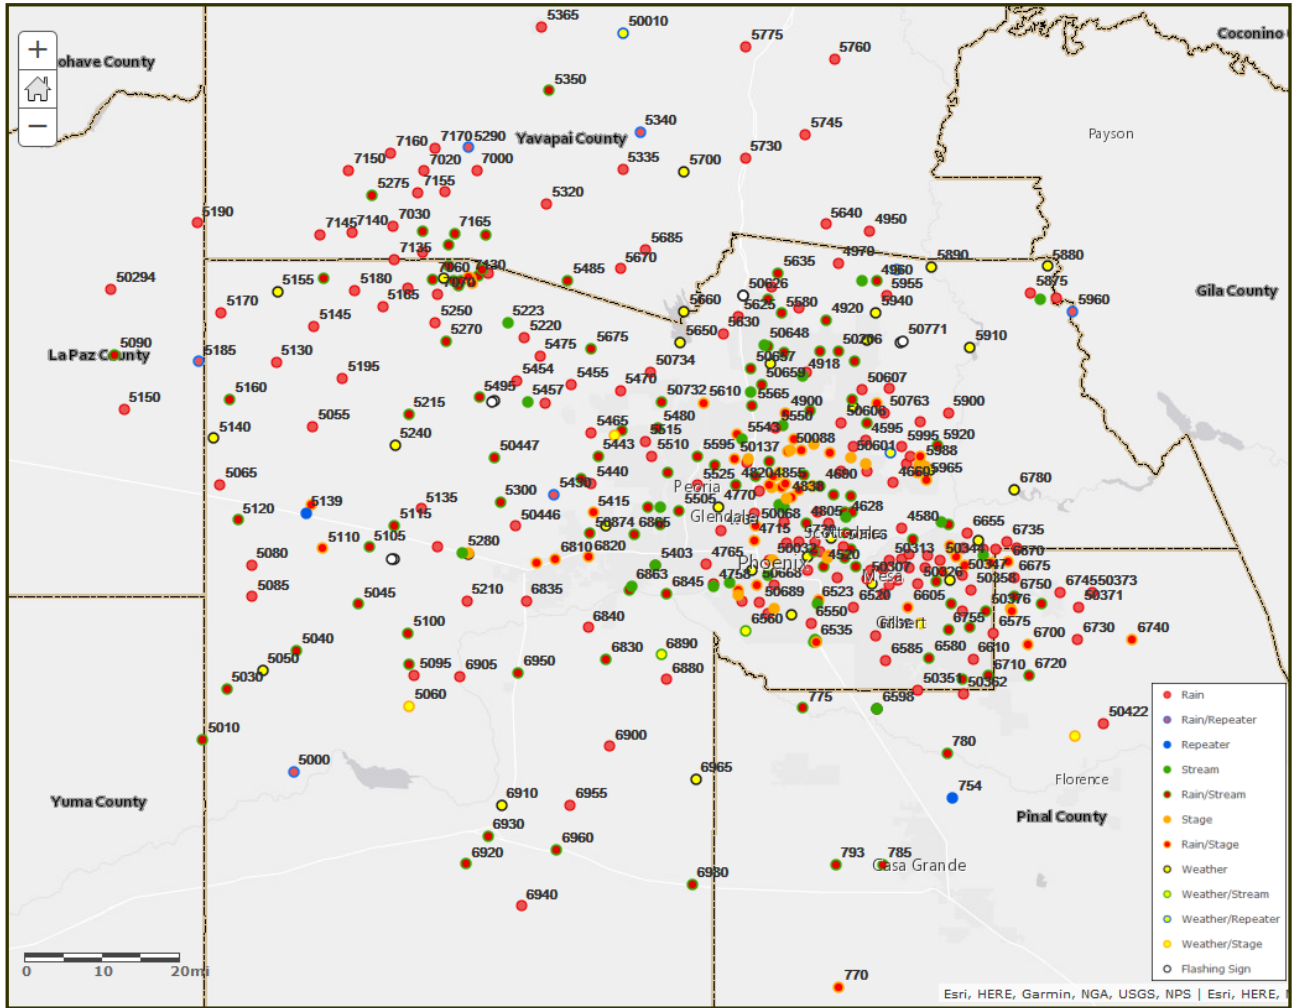

Reid Park Rain Gage,
Station 50311, Installed
1/10/2017

INTRODUCTION

The following paragraphs describe the arrangement, collection and compilation of data in this report:

1. Data is tabulated for each precipitation gage based on the "2017 Water Year" which began Oct. 1st, 2016 and ended Sep. 30th, 2017. Each data page presents data from one gage, and lists daily precipitation totals, monthly totals, cumulative rainfall by month, maximum daily values for each month, monsoon total, water-year total, and the number of days with rain greater than or equal to 1mm. The pages are arranged in ascending order by gage ID.
2. The unit of measurement for precipitation totals provided in this report is inches. To convert inches to millimeters divide by 0.03937.
3. An index of gage names, numbers, locations and other descriptors is included as Table I.
4. All of the data in this report have been reviewed and/or edited in an attempt to provide the highest accuracy possible. Inaccurate data or recording time gaps are flagged with a footnote describing the time the gage was down, the cumulative rainfall count in millimeters at the beginning and end of the down period, whether or not rain fell during that time and whether or not monthly and annual totals were affected. For example, a footnote might read "Gage 5550 down from 2/12 03:40 (92) through 2/14 13:30 (94) due to a lightning strike; assigned 2 mm to 2/13", where the values in parentheses are the beginning and ending rainfall counts in millimeters.
5. Snow gages were in service during Water-Year 2017, consisting of a 4-foot tube mounted vertically above and attached to the tipping-bucket funnel. Consequently, gages above approximately 5,000 feet will show meltwater following the colder winter precipitation events.
6. Table II lists the sensors installed in the FCDMC ALERT System during Water Year 2017 and their installation dates. Table IV lists the annual rainfall total for each gage, sorted by ID number, along with Water-Year totals for 2016, 2015, and 2014. Table IV can also be used as a quick reference to determine which gages were installed during the Water Year, which had incomplete records and which had estimated totals. In the case of estimated totals, one or more daily totals were calculated using rainfall values from nearby gages and/or weather-radar estimates.
7. Additional and/or more detailed sensor data in hard copy or computer disk format is available for the gages listed in this report. Contact the Flood Control District, Flood Warning Branch at (602) 506-8701. Data can also be downloaded from our web site at <https://www.maricopa.gov/3833/Get-Weather-Information>.
8. Note on data compilation: All the automatic rain gages in this network measure rainfall depth in 1mm increments. The base station computers that collect the data use the relation $1\text{mm} = 1/25.4$ or 0.03937 inches to convert millimeters to inches. As a result, daily totals may sum to a slightly different total than the reported monthly total in English units (which is more accurate than the sum of the daily totals) because of rounding errors. In the same way, the annual totals reported in Table IV may not match exactly the sum of the monthly totals, but can be considered more accurate.
9. Note on the accuracy of monthly and annual totals: Because automatic ALERT gages are designed for flood warning applications, there is some inherent error associated with their use in maintaining accurate long-term records. The tipping buckets collect rainfall in 1mm increments before sending a signal and discarding the accumulated rainfall. Because evaporation often dries the bucket between storms, the measurement error averages out to be 0.05 mm (0.02 in) times the number of rainfall events during the period of interest (month or year). It is also probable that during times of low evaporation and/or short times between storms that the bucket could be partially or nearly full at the start of a rainstorm. Other errors can be introduced by the effects of gage height, calibration errors, and the physical environment (trees, buildings, wind patterns) near the gage - these are noted where known to cause inaccuracies.

Notes Apply to Water-Year 2017 Values Only

Note 1: Gage installed during Water-Year 2017, total given is not complete.

Note 2: Total is inaccurate due to gage failure during a precipitation event at one or more times during the Water-Year, or the gage was taken out of or returned to service.

Note 3: Water-Year total contains one or more estimated event totals. Estimated totals are included in the data set used to produce the annual & monsoon rainfall plots (Figures 2 & 4).

Note 4: Total not included in the annual & monsoon rainfall plots (Figures 2 & 4) by reason of high-wind profile or other detrimental physical condition.

TABLE V – Rainfall Statistics for Water-Years 2003 through 2017

FCDMC RAINFALL LINKS

To retrieve the Annual History Document for any FCDMC rain station, use the internet link below:

http://alert.fcd.maricopa.gov/alert/Rain/FOPR/7005_FOPR_17.xlsx

Substitute “7005” with the gage ID of choice, i.e. “0795” or “6550”. “17” represents the water-year through which data and statistics are included.

To retrieve a water-year of daily totals for a gage in text format, use the internet link below:

http://alert.fcd.maricopa.gov/php/showrpts_P.php?ID=7005&PA=rain&SP=1d&NM=365&ME=09&DE=30&YE=2016

and substitute ID="7005" with the gage ID of choice, i.e. "0770" or "5640". If you want a water-year other than 2016, substitute any year back to 1980. If you choose a leap year, (2012, 2008, 2004...) you must change the NM="365" to "366". To retrieve a calendar-year, change ME to "12" and DE to "31".
