**MARICOPA COUNTY TRANSPORTATION EXCISE TAX
OFFICIAL FORECAST UPDATE
RISK ANALYSIS OF EXPECTED VALUES
as of November 2004**

Introduction

In 1985, the voters of Maricopa County approved Proposition 300 to establish a one-half cent transportation excise (sales) tax for construction of a regional freeway system within the county. The half cent sales tax was approved for a period of 20 years and ends on December 31, 2005.

On November 2, 2004, Maricopa County's voters approved Proposition 400 which extends the one-half cent sales tax for another 20 years through December 31, 2025. The sales tax extension will be used for construction of new freeways, widening of existing freeways and highways, improvements to the arterial street system, regional bus service and other special transportation services, and high capacity transit services such as light rail, bus rapid transit and express buses.

This document contains the official forecast of expected values for the Maricopa County Transportation Excise Tax for the period FY 2005-2026 developed by the Arizona Department of Transportation in cooperation with the Maricopa Association of Governments, Valley Metro and Valley Metro Rail.

Background

Since 1986, the Arizona Department of Transportation (the Department) has used a comprehensive regression-based econometric model to estimate Transportation Excise Tax revenues for Maricopa County. These revenues, which flow into the Regional Area Road Fund (RARF), are the major funding source for the Maricopa County Freeway Program.

The revenue forecast is highly dependent on estimates of independent variables. In order to deal with variability between estimated and actual values, the Department introduced the Risk Analysis Process (RAP) in 1992. The RAP relies on probability analysis and the independent evaluation of the model's variables by an expert panel of economists. The process results in a series of forecasts, with specified probabilities of occurrence, rather than a single or "best guess" estimate.

Enhanced forecasting accuracy was achieved in July 1996, when Hickling Lewis Brod Inc. (HLB) working in conjunction with Dr. Dennis Hoffman of Arizona State University, incorporated economic data and independent variables which were not included in the 1986 model.

In September 2000 and 2003, HLB reviewed the model and updated the equations. The independent variables contained in the updated model include:

- Maricopa County real income growth per capita
- Maricopa County population growth
- Maricopa County construction employment growth
- Phoenix Consumer Price Index (CPI)
- Prime interest rate.

Risk Analysis Panel

The Risk Analysis Process (RAP) relies heavily on the judgments of an expert panel of economists to provide information critical to the forecasting process. In September 2004, an expert panel of eleven economists representing public, private, and academic sectors provided their individual estimates of the model's independent variables and comments on the future economic outlook.

Model Results

The model results from the panel inputs produced a mean forecast of \$14,869.3 million for the period FY 2005-2026 with an average compound growth rate (CGR) of 7.2 percent.

The Official Forecast totals \$14,813.2 million for the period FY 2005-2026 and has an average compound growth rate of 7.2 percent. The FY 2005 forecast of \$306.9 million was developed independently of the econometric model using time series techniques and historic and projected growth rates from the model. The FY 2005 forecast is 6.3 percent above the FY 2004 collections.

The FY 2005-2026 forecast utilizes the 50% confidence interval growth rate to account for less uncertainty in the future. The Mean Forecast and the Official Forecast are shown on the next page.

TOTALS							
FY 05-26	\$15,115.9	\$9,582.0	\$14,813.2	(\$302.7)	\$9,403.2	\$9,892.2	\$9,609.2
FY 06-25	\$14,021.4	\$8,914.7	\$13,735.7	(\$285.7)	\$8,743.4	\$9,197.3	\$8,934.5

Note: 1/ Discounted at constant 2002 dollars at the respective discount rate.

Totals may not add due to individual rounding.

The November 2004 Official Forecast for FY 2005-2026 in current dollars (inflated) totaled \$14,813.2 million compared to the November 2003 Official Forecast of \$15,115.9 million, a decrease of \$302.7 million. The decrease in the November 2004 Official Forecast was due to the RAP panel being somewhat less optimistic with future Maricopa County real per capita income growth.

However, the RAP panel also forecast a lower Phoenix CPI during the forecast period. The September 2002 RAP panel estimated the Phoenix CPI would average 3 percent over the FY 2006-2025 forecast period. This Phoenix CPI figure was then used by the Maricopa Association of Governments to deflate into 2002 constant dollars the revenue

forecast used in Proposition 400. In addition, the Department used the 3 percent Phoenix CPI figure to deflate the November 2003 Official Forecast into 2002 constant dollars, which resulted in revenue forecast similar to the forecast used in Proposition 400. By applying the same 3 percent Phoenix CPI with the November 2004 Official Forecast, the total 2002 constant dollar revenues would amount to \$8,743.4 million, a decrease of \$171.3 million from the November 2003 Official Forecast of \$8,914.7 in 2002 constant dollars.

As noted above, the September 2004 RAP panel estimated a lower Phoenix CPI for the forecast period. By incorporating the forecast period midpoint Phoenix CPI of 2.65 percent, the November 2004 Official Forecast in 2002 constant dollars would be \$9,197.3 million, an increase of \$282.6 million over the November 2003 Official Forecast for the FY 2006-2025 time period. For comparison purposes, a 2.85 percent Phoenix CPI figure used to deflate the November 2004 Official Forecast would provide similar revenue results when compared to the November 2003 Official Forecast using a 3 percent deflator.

Summary

The Official Forecast for FY 2005-2026 totals \$14,813.2 million, which reflects the extension of the Maricopa County Transportation Excise Tax. The November 2004 Official Forecast was decreased by \$302.7 million from the November 2003 Official Forecast. Compared to last year, the Risk Analysis Process panel forecasted lower growth in Maricopa County income, construction employment, prime rate and Phoenix CPI but a higher population growth for FY 2005–2026 period. In FY 2005, the Department expects improvement in Maricopa County's economy with modest job and population growth along with strength in tourism.

Supplementary Information

The remainder of this report presents supplementary information on the RAP's model, the values of the independent variables forecast by the expert panel, and detailed results of the Risk Analysis Process.

TOTALS	\$8,543.6	\$1,503.1	\$4,766.5	\$14,813.2

Note: 1/ In FY 2005, \$7.7 million was transferred from RARF to the RPTA for transit costs. This transfer amount is adjusted annually by the GDP price deflator. Beginning July 1, 2005, this transfer from RARF will be divided equally between MAG and the Public Transportation Fund for planning and administrating the regional transportation plan.

2/ Reflects the current one-half cent transportation excise tax and the extension which begins on January 1, 2006.

3/ Reflects the end of the one-half cent transportation excise tax extension on December 31, 2025.

Total may not add due to rounding.

Distribution

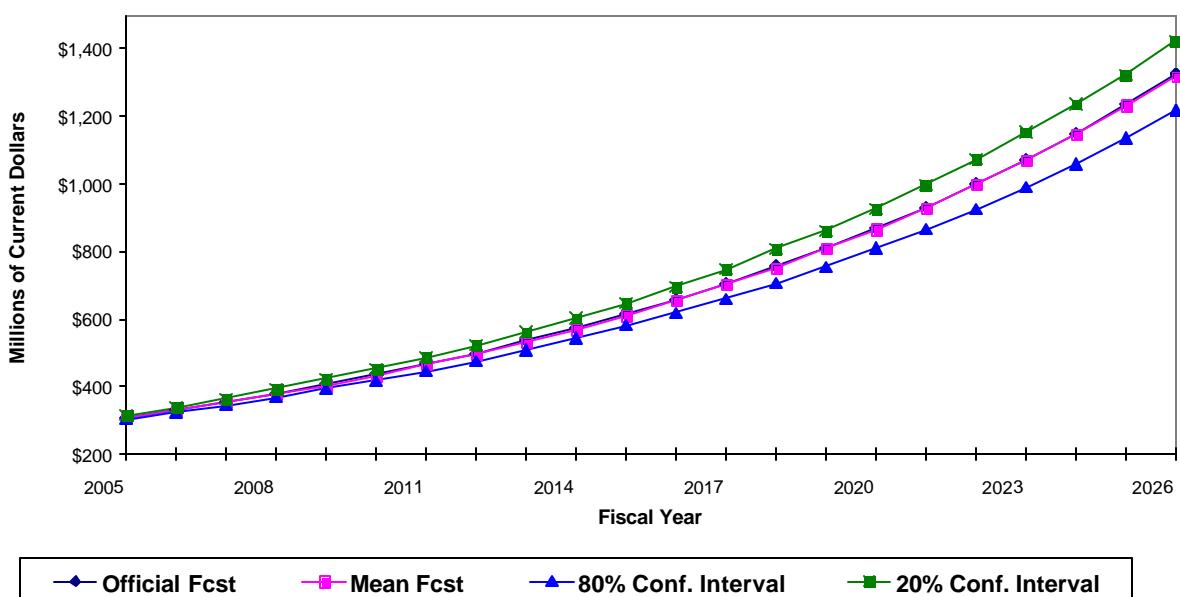

Per Laws 2004, Chapter 2 (HB 2456), the sales tax extension will be distributed as follows:

1. 56.2 percent to the Regional Area Road (RARF) fund for freeways and other routes in the state highway systems, including capital expense and maintenance.
2. 10.5 percent to the RARF fund for major arterial streets and intersection improvements, including capital expense and implementation studies.
3. 33.3 percent to the public transportation fund for:
 - (a). Capital costs, maintenance and operation of public transportation classifications.
 - (b). Capital costs and utility relocation costs associated with a light rail public transit system.
