FOREWORD

The prevention and control of crime in our society is a responsibility that is not confined to those actively involved in the criminal justice system. Crime is a social disease, affecting everyone. All of society is concerned with its control.

To provide an effective defense against crime it is necessary for every citizen to unite with local authorities. The extent of crime depends on its ability to flourish in our communities. If authorities receive the support of the community in creating an environment hostile to crime, that ability is greatly reduced.

The purpose of this publication is to expose the nature and extent of crime in Arizona. Ideally, this information will prompt citizen action against crime.

This publication is the product of the combined efforts of Arizona's law enforcement agencies. Without their cooperation, the collection of the data here presented would be impossible.

The Department of Public Safety strives to maintain a crime reporting system patterned after that established by the Federal Bureau of Investigation. It is only through the use of such a comprehensive system that crime information can be compiled and distributed.

It is hoped that this publication will stimulate the concern of all Arizonans.

RAPE, ROBBERY, ASSAULT INCREASE

Violence Up 77% In First Quarter

By DAVID PEARSON

The year began with a bloody murder in a university apartment area known as "Sin City." Since then violent crime has continued to rise in alarming proportions in Tempe.

In fact, the Tempe Police Department reported today that violent crime in the city rose 77 percent during the first three months of 1978 as compared to the previous year.

Rape, robbery and assaults all increased during the three-month period with murder holding steady.

The only murder this year was that of Arizona State University coed Deana Bowdoin in January.

But on the average in Tempe during the first quarter of the year there was a robbery every three days; a rape every eight days; and an assault ever 1.3 days.

It is the most violent start of any year in the history of the city.

—There were 11 rapes in the first quarter of 1978 as compared to six the year before; an increase of 83 percent.

—Robberies increased 82 percent with 31 holdups in three months compared to 17 in 1977.

—Sixty-seven persons were assaulted this year compared to 38 in 1977; an increase of 76 percent.

Overall there were 110 violent crimes in Tempe during January, February and March. Last year there were 62 violent incidents.

Going along with this huge increase in violence was an even larger rise in assaults on policemen. Seven officers were assaulted in the

three-month period while only two in 1977.

Veteran officers privately say that they expect the number of assaults on officers to increase.

Even though violent crime rose drastically, the total crime picture was not so pronounced. Figures provided by police show a modest 2 percent increase.

That's a rise of 38 reported crimes in the three-month period, or 1,936 to

Turn to Page 5.

Violence

1,896 in 1977.

Every year the largest number of crimes are in burglaries and larcenies, which determine the total crime figures in the city. But more visible and alarming to most residents are violent crimes.

Burglaries decreased in the first quarter by 22 percent, according to police officials. But they quickly add that this decrease is due in part to redefinitions of the terms burglary and larceny by national crime analysts.

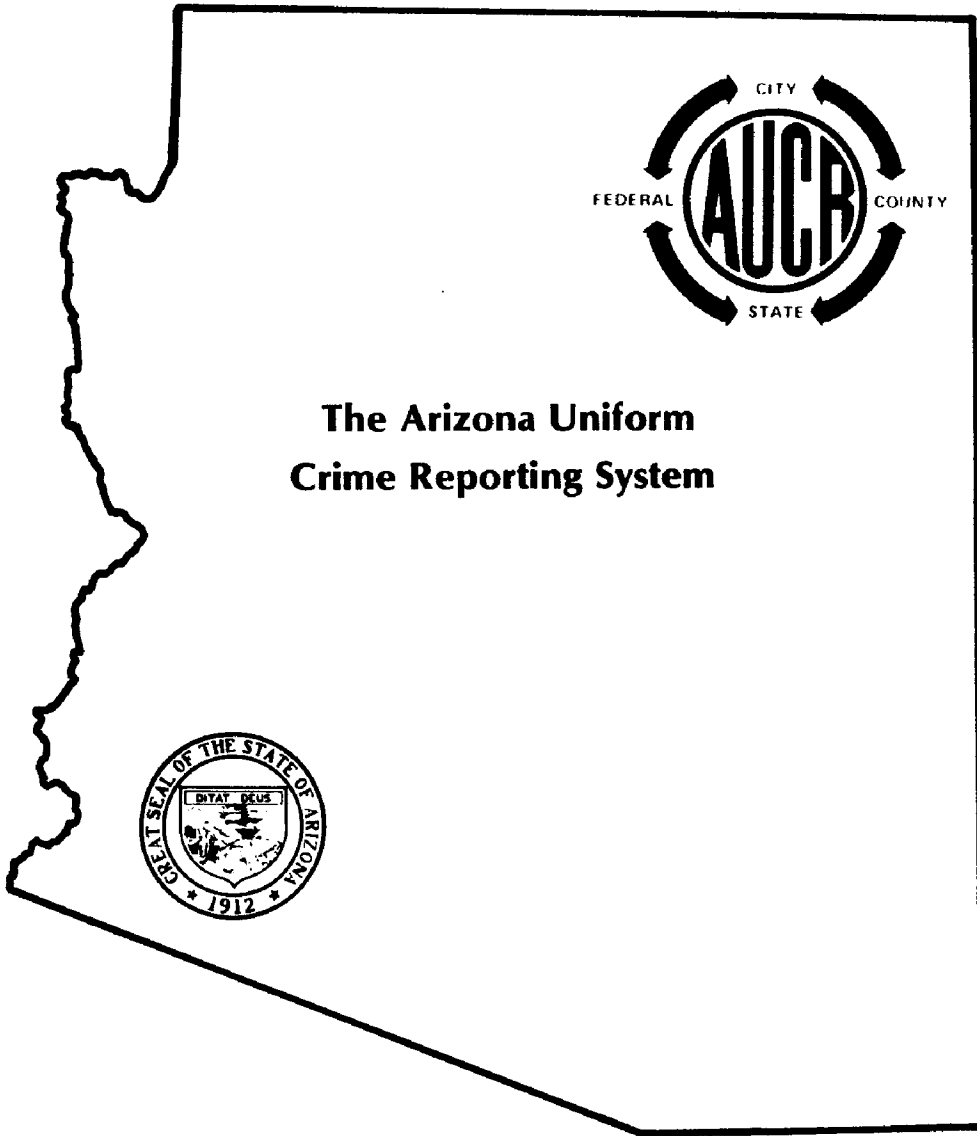

Officials estimate that this redefinition accounted for 10 percent of the burglary reduction, leaving a real drop of 12 percent.

For the same reason, larcenies increased 11 percent in Tempe during the first three months. Many of the crimes that were formerly identified as burglaries were reclassified larcenies.

The number of auto thefts in the city decreased also. From 74 last year to 67 in 1978; a drop of 9.5 percent.

Meanwhile, statistics show that the total number of crimes solved by Tempe police declined 3 percent. Only in the case of assaults did officers clear more cases in the first quarter of 1978 than 1977.

In all of other categories, rape,

**The Arizona Uniform
Crime Reporting System**

INTRODUCTION

The second year of publication of the AUCR Report adds a new dimension to crime reporting in Arizona. The capability of delineating two years of crime statistics will aid the user in defining crime rates and making analyses and comparisons.

The AUCR Section is in a continual process of refining and adding more meaningful information to assist the users in their fight against crime.

HISTORY OF ARIZONA UNIFORM CRIME REPORTING

The AUCR System first began receiving quantitative crime statistics from Arizona police agencies during January 1975. By the close of the calendar year 1976, 72 out of a possible 87 (83%) Arizona police agencies were contributing to the AUCR program. An accurate estimate of the exact influence which the missing reports from the 15 non-reporting and 10 partially reporting agencies have on this statistical publication is difficult to assess. These nonreporting and partially reporting agencies represent a combined census population of 81,577.

The evaluation of the significance of the crime statistical resource must be made by the local community institutions, organizations and police agencies from within the state. These segments of society can determine the worth of the AUCR system by their applied use of the resource in deterring, reducing and preventing community crime. Only then can this system assume that it has begun to meet its stated intent.

INTENT OF THE SYSTEM

The intent of the Arizona Uniform Crime Reporting (AUCR) System is to: supply Arizona communities, agencies, institutions and organizations with a resource of quantitative crime statistics which they can use, efficiently and effectively, to deter, reduce and prevent crime.

OBJECTIVES OF THE SYSTEM

The scope of this system shall be to produce a reliable set of state quantitative crime statistics which measure the extent, fluctuation and distribution of serious crime in Arizona.

The extent of the conditions and performance of the AUCR Section, Department of Public Safety, shall be limited to the intent set forth by Statute (ARS 41-1750).

LIMITATIONS OF THE PUBLICATION

The statistics listed in this publication are the most accurate data currently available.

The following factors have a major influence on the statistics presented in this publication.

1. Crime figures presented in this publication are police statistics as distinguished from judicial or penal statistics.
2. Actual crimes represent violations of Arizona statutes.
3. Some police jurisdictions overlap.
4. Crime rates, as used in the AUCR program, are based on census-fixed residential populations of police jurisdictions.
5. Arizona Indians living on reservations are not counted in AUCR population figures, although they are included in the state's population figures.
6. Some juveniles are informally handled which affects the accuracy of the juvenile report input.
7. Of the Arizona police agencies, 29 percent did not submit twelve full months of AUCR statistical information.

PROCEDURES AND METHODS

Each contributing agency is responsible for compiling its own reports. To aid in this endeavor the Arizona UCR guide manual is supplied to all contributors. This manual outlines reporting procedures in detail and is complete with examples and illustrations. Additionally, the AUCR Field Representatives provide additional instruction and clarification as required. Each agency is supplied with a complete set of forms yearly. These forms are used by the agencies when they submit their reports to the AUCR system.

UNIFORM CRIME REPORTING CLASSIFICATION OF OFFENSES

Major Crime Offenses (Crime Index) Part I

Violent Crimes

1. Murder and Non-negligent Manslaughter
2. Forcible Rape
3. Robbery
4. Aggravated Assault

Non-Violent Crimes

5. Burglary
6. Larceny - Theft
7. Motor Vehicle Theft

Other Crime Offenses (Non-Index) Part II

1. Other Assaults
2. Arson
3. Forgery and Counterfeiting
4. Fraud
5. Embezzlement
6. Stolen Property: Buying, Receiving, Possessing, Etc.
7. Vandalism
8. Weapons: Carrying, Possessing, Etc.
9. Prostitution
10. Sex Offenses (Except forcible rape and prostitution)
11. Narcotic Drug Laws
12. Gambling
13. Offenses Against Family and Children
14. Driving Under the Influence
15. Liquor Laws
16. Drunkenness
17. Disorderly Conduct
18. Vagrancy
19. All other offenses (except traffic)
20. Suspicion (not reported in Arizona)
21. Curfew and Loitering Law Violations
22. Runaways

VERIFICATION

When the AUCR Section receives a report from a contributing agency, the report is examined for accurate mathematical computations and offense classifications. After the contributed reports are verified, reviewed and recorded, the statistical information is processed and transcribed onto magnetic tape. This statistical information is reproduced on data printout forms and redistributed to the respective agencies. The statistics are also sent to the Federal Bureau of Investigation's National Uniform Crime Reporting center in Washington, D. C.

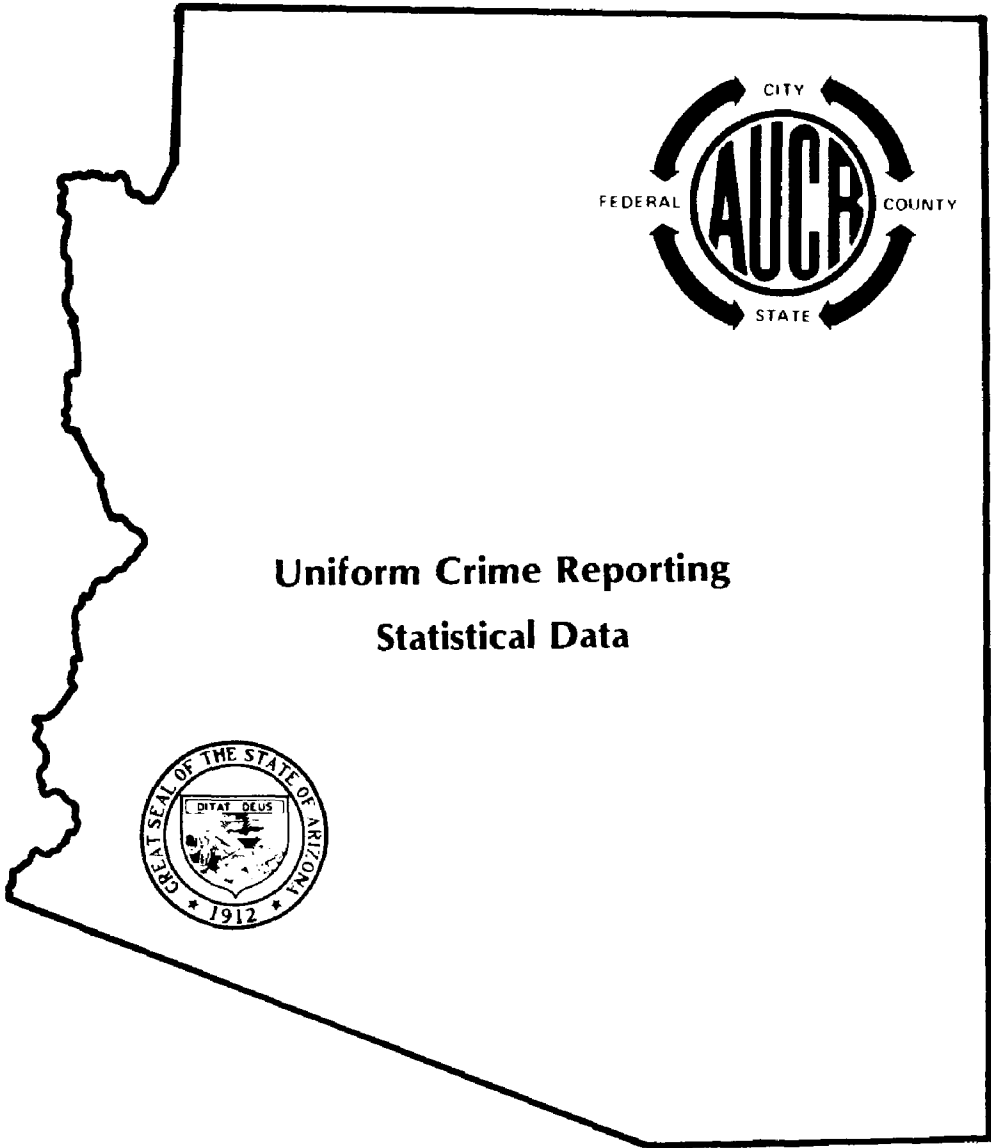

CONCLUSION

Crime exists as a local community problem in Arizona. The intent of AUCR is to offer these local communities a basic resource of quantitative crime statistics that could be used by them to deter, reduce and prevent crime.

The interpretation of crime statistics frequently results in a controversy as to the accuracy of the comparison and how these statistics were compiled. We ask that great care be taken in analysis and interpretation.

Arizona Profile

The following population distribution grouping factor has some influence on the volume and type of crime displayed in this Annual Report.

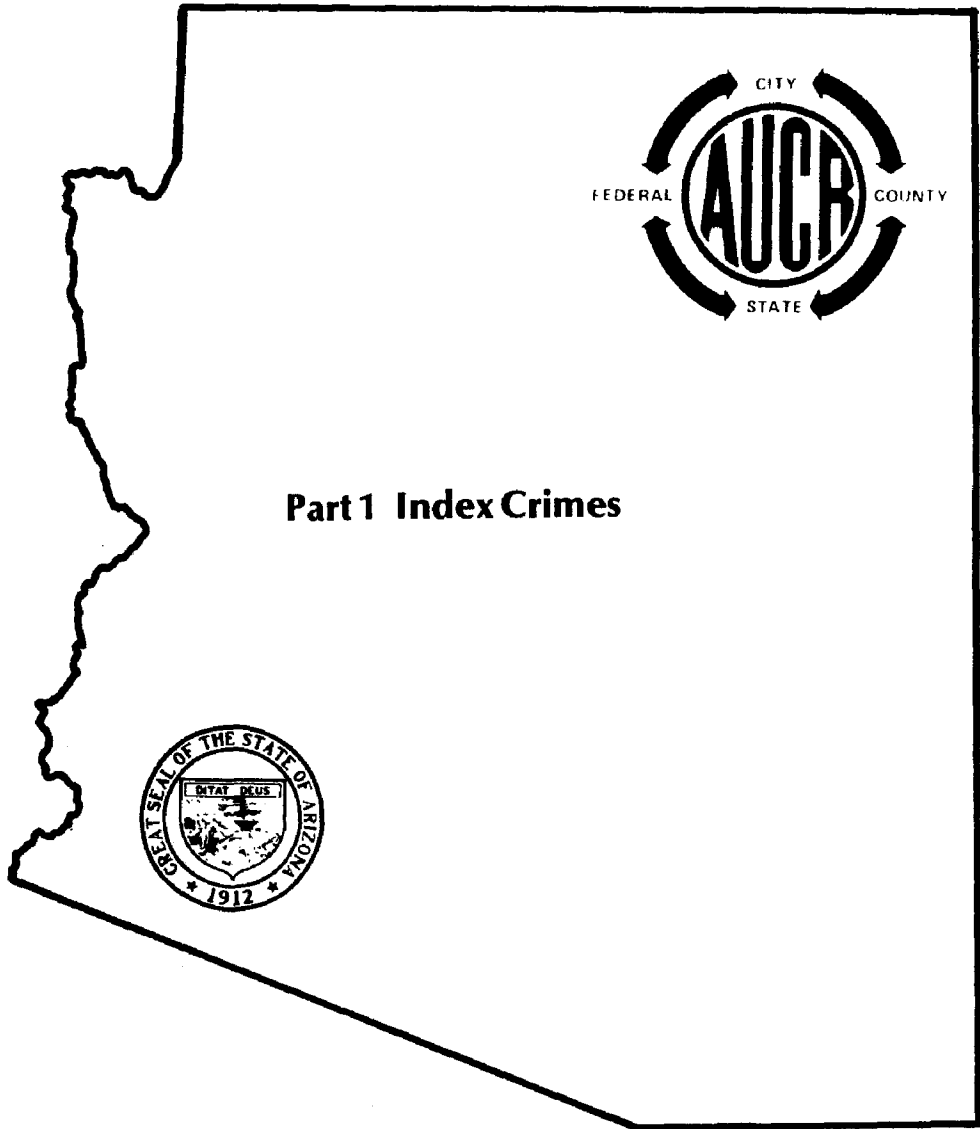

The cities, towns and counties within the state have been divided into six (6) groups according to population size. The following is the grouping breakdown.

GROUP

1. Over 250,000 population. There are only two (2) cities that fall within this group.
2. 100,001 to 250,000 population. There are two (2) cities, towns, or counties that fall within this group.
3. 50,001 to 100,000 population. There are five (5) cities, towns, or counties that fall within this group.
4. 25,001 to 50,000 population. There are eight (8) cities, towns, or counties that fall within this group.
5. 10,001 to 25,000 population. There are eight (8) cities, towns, or counties that fall within this group.
6. 10,000 or less population. There are forty-seven (47) cities, towns, or counties that fall within this group.

The following is a population group listing of law enforcement agencies submitting crime data to Arizona Uniform Crime Reporting Unit, Arizona Department of Public Safety.

Criminal Homicide

Clearance Rates For Homicide

Analysis

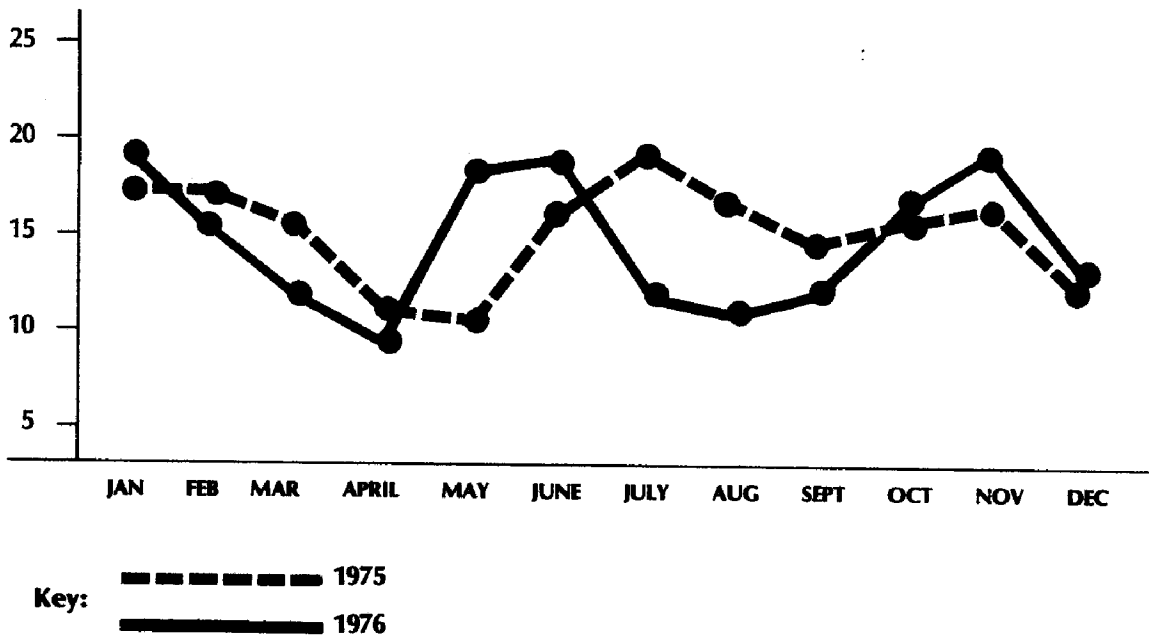

In 1976, Arizona agencies reported 173 criminal homicides. The month of November had the highest frequency of murders, with 20. There were 177,152 index crimes reported and the crime of murder made up .1 percent of these offenses, and 1.7 percent of the 10,207 violent crimes.

There were .08 murders for every 1000 Arizona residents. The weapon most often used to commit these murders was the firearm which was used to commit 56.6 percent of the murders. Information was gathered on the type of firearm, and it was shown that 45.1 percent of the firearms were handguns. Cutting or stabbing instruments were used to commit 16.8 percent of the murders. Other weapons, (blunt objects, poisons, explosives, arson, drowning, etc.) were used in the commission of 17.9 percent of the homicides. All other murders were committed through the use of personal weapons such as hands, fists, feet, etc. These amounted to 8.7 percent.

Relevant to the 173 actual offenses of criminal homicide, 157 or 90.8 percent of these offenses were cleared by arrest or exceptional means.

RAPES PER 1000 POPULATION

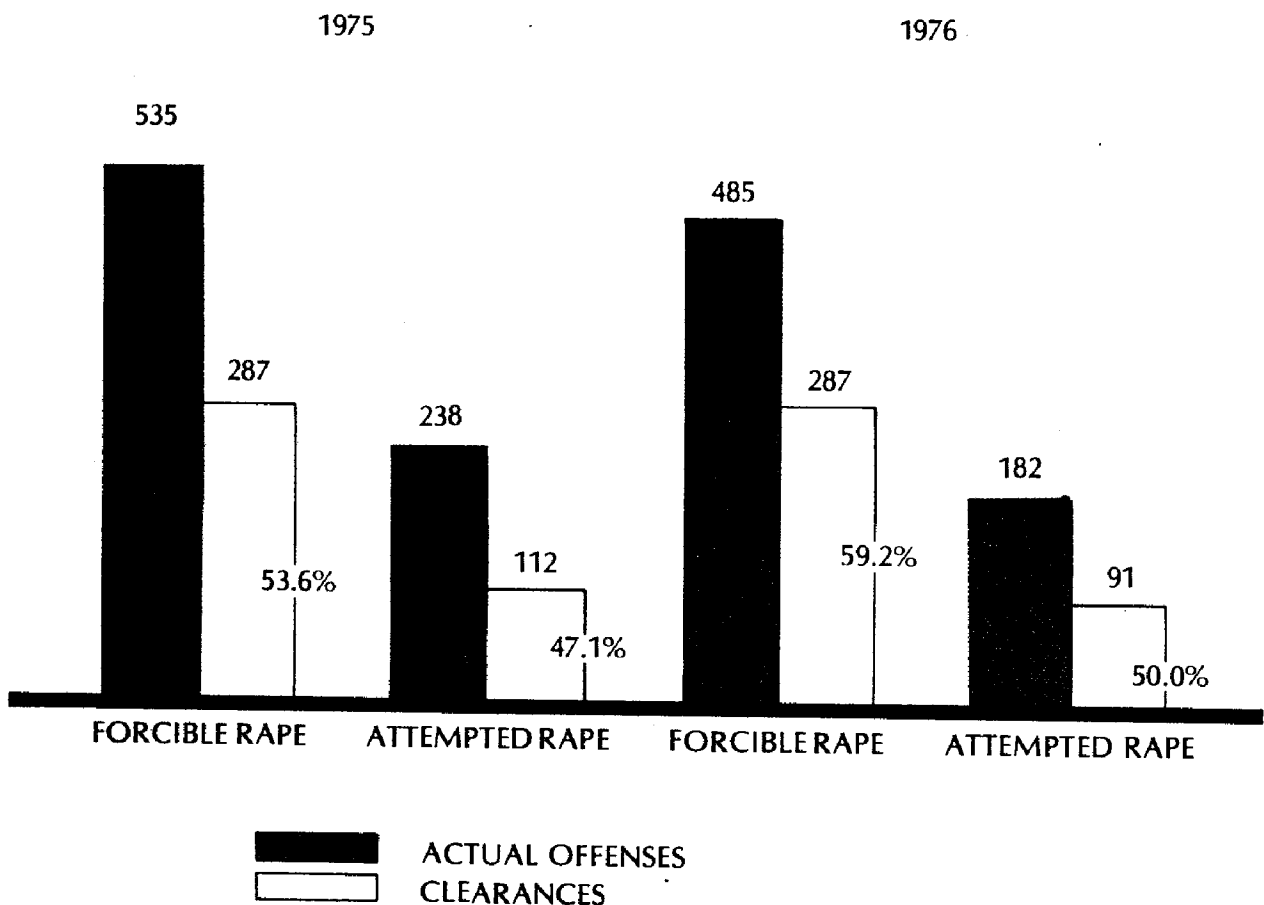

Rape

Analysis

Forcible rape and attempts to commit forcible rape accounted for 667 of Arizona's actual 177,152 index crimes reported in 1976. Of this number, 485 were actual forcible rapes, and 182 were attempts to commit forcible rape. There were 10,207 violent crimes in 1976, and the offense of rape made up 6.5 percent of those crimes.

There were 378 cases of rape cleared by arrest or exceptional means. This accounted for 56.7 percent of the actual offenses. Juveniles accounted for 13.5 percent of the clearances.

Robbery

Analysis

Arizonans reported 2,921 actual robberies in 1976. These robberies are 28.6 percent of the 10,207 violent crimes committed this year, and 1.6 percent of the 177,152 index crimes. The reporting agencies were able to clear 31.9 percent of the robberies. The average dollar amount taken in each of these was \$389. There was a total of \$1,137,555 dollars taken in Arizona robberies.

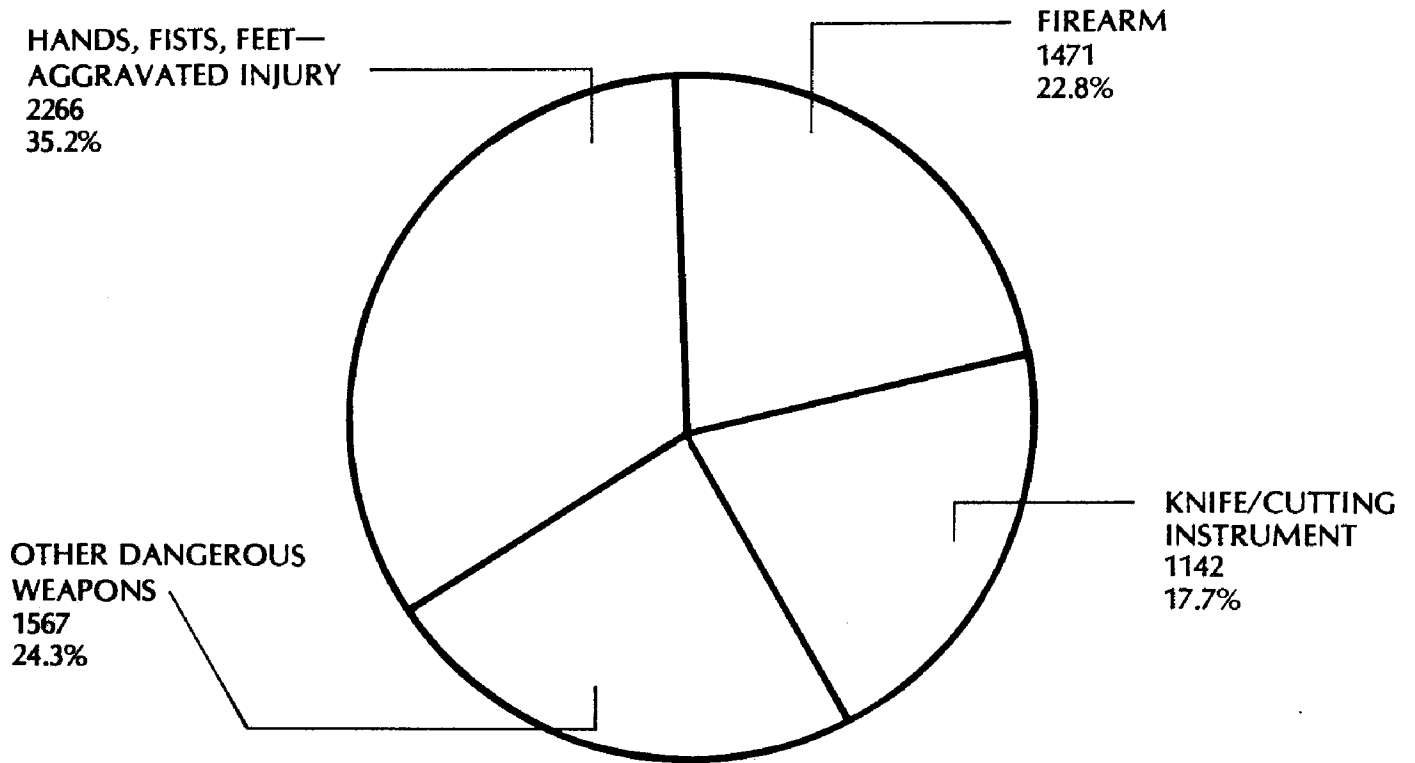

Of those arrested for robbery, 90.8 percent were males and 9.2 percent were females. Juveniles accounted for 30 percent of the arrests.

Assault Clearances By Month

Aggravated Assault

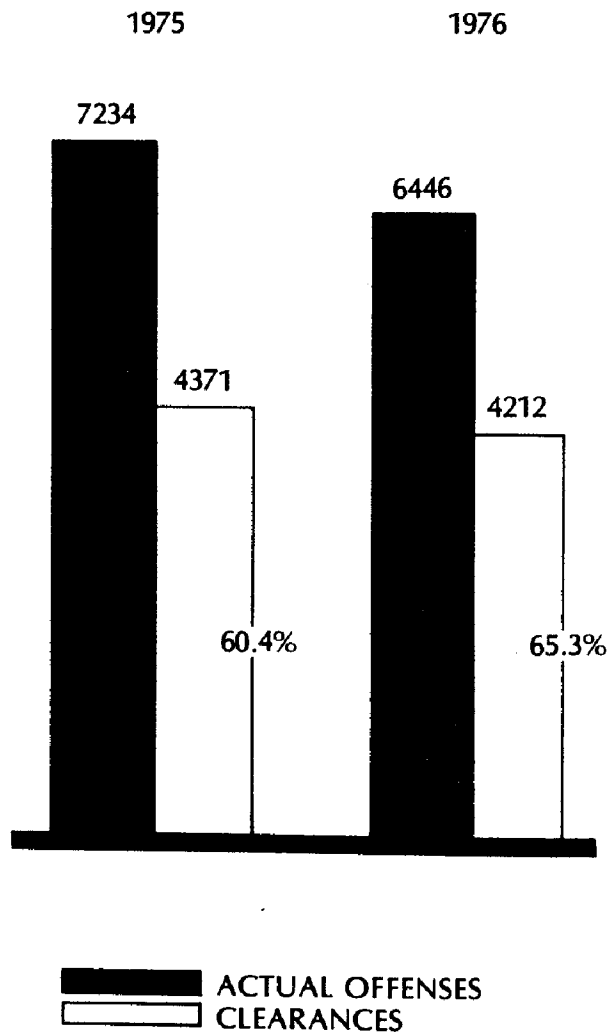

Analysis

There were 6446 aggravated assaults in the state in 1976 - 2.8 assaults for every 1000 Arizonans. The largest number of these assaults were committed in the month of August with 623. Personal weapons, such as hands, fists and feet etc., predominate as the weapon most frequently used to commit an aggravated assault. These types of personal weapons were used to carry out 35.2 percent of the aggravated assaults.

Firearms were used in 22.8 percent of the assaults, knife or cutting instruments in 17.7 percent, and the remaining 24.3 percent were committed with the use of other dangerous weapons such as clubs, tire irons, etc. The aggravated assaults accounted for 3.6 percent of the index crimes and 63.2 percent of the violent crimes.

During 1976, 4212 or 65.3 percent of the 6446 actual offenses of assault were cleared by either arrest or exceptional means.

Burglary

Analysis

The 53,306 burglaries in Arizona during 1976 comprised, 30.1 percent of the index crimes, and 31.9 percent of our nonviolent crimes. The reporting agencies were successful in clearing 7405 of these crimes. Of the total number of persons arrested, 59.7 percent were juveniles and 40.3 percent were adults.

The greatest number of burglaries were in the forcible entry category, which accounted for 64.3 percent of all burglaries. Unlawful entry no force burglaries accounted for 27.5 percent, and the remaining 8.2 percent were attempted forcible entries. The night time burglaries (6 PM - 6 AM) accounted for 22,324 or 41.9 percent of the actual offenses.

Analysis

The Arizona law enforcement agencies reported 104,180 cases of larceny theft in 1976. These larcenies made up 62.4 percent of the nonviolent crimes. Of the total number of these crimes, 19,153 were cleared. Of all arrests for larceny, 39.2 percent were adults, and 60.8 percent were juveniles.

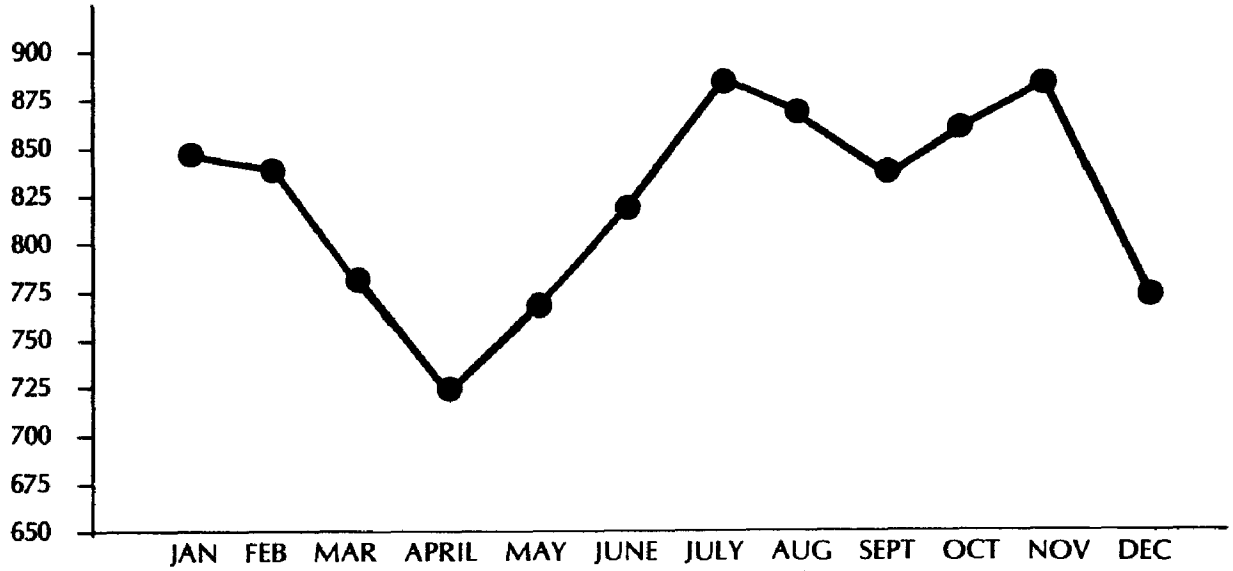

A total of \$16,886,375 were stolen in these larcenies. The category in which the largest amount of dollar loss occurred was from "all other" wherein \$5,626,891 were taken. In comparison with 1975, a total of \$18,204,451 were stolen and in the category of "all other," \$8,063,904 were taken.

LARCENY/THEFT COMPARISON

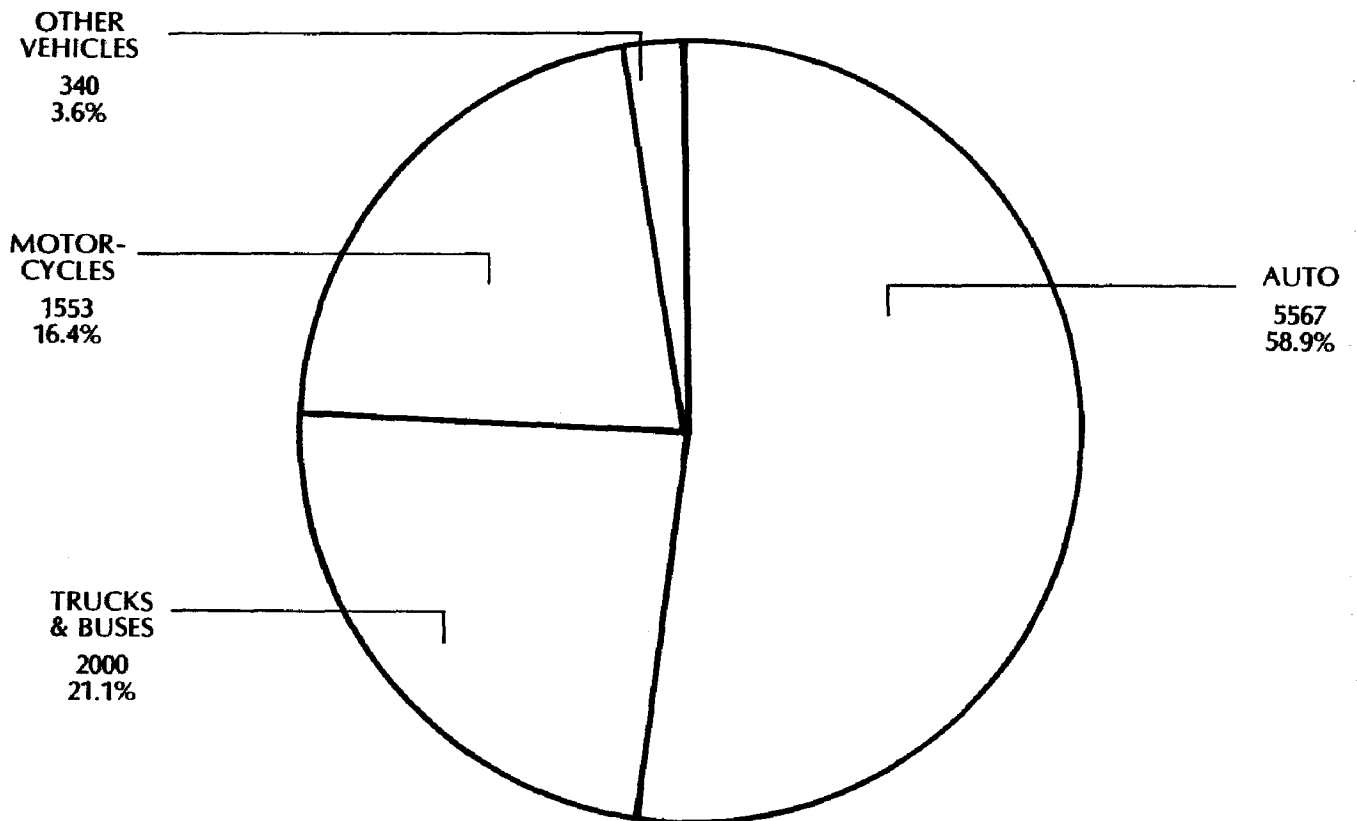

Motor Vehicle Theft

Motor Vehicle Theft By Month

Motor Vehicle Theft By Classification

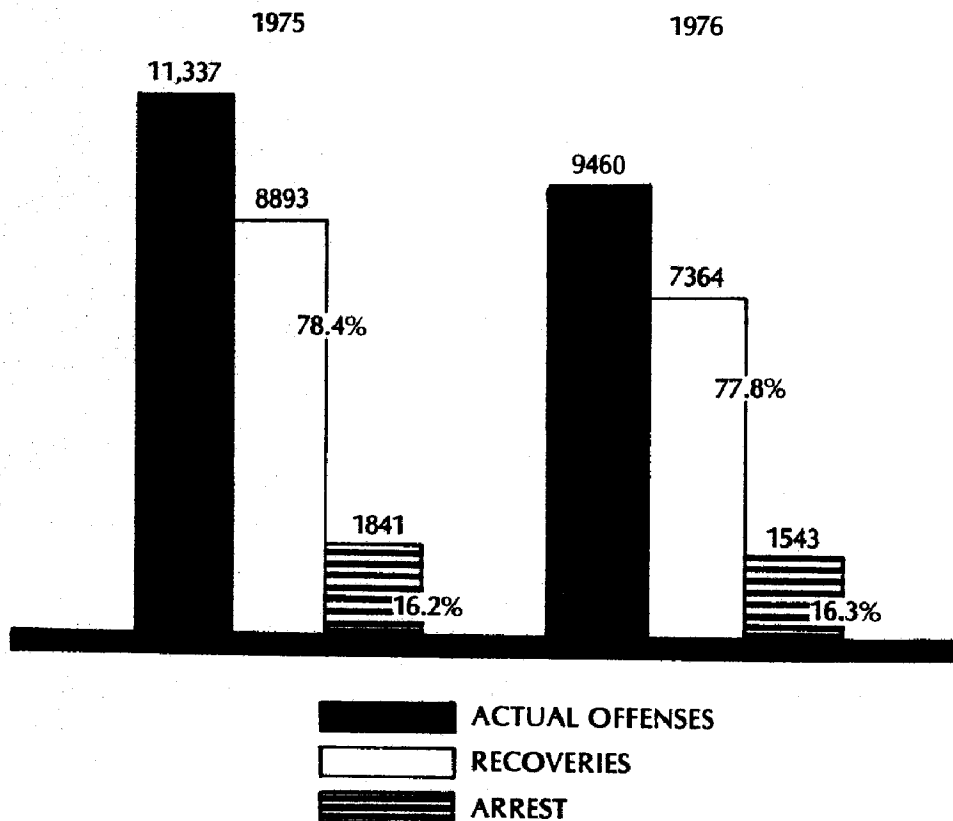

Motor Vehicle Theft

Analysis

In 1976 Arizona agencies reported 9460 actual offenses of motor vehicle theft. This represents 5.7 percent of the nonviolent crimes and 5.3 percent of the index crimes. Of persons arrested for motor vehicle theft, 36.2 percent were adults and 63.8 percent were juveniles. The average value of vehicles stolen is \$1,752.93.

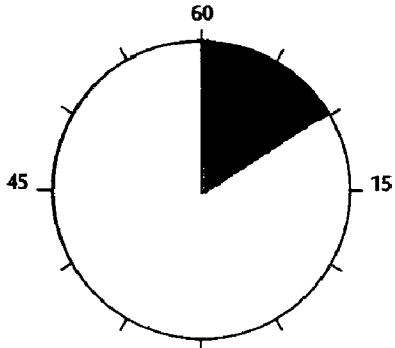

During 1976, 19.0 percent of the vehicles stolen in Arizona resulted in an arrest or clearance by exceptional means.

Assaults on Police

Distribution Of Weapons Used To Commit Assaults On Police Officers

Time of Assault

Appendices

APPENDIX A

GLOSSARY OF TERMS

QUANTITATIVE CRIME STATISTICS — The use of numbers to measure and express a mathematical quantity. This phrase implies results expressed in numbers rather than descriptive phrases.

CRIME ANALYSIS — Statements relating to type and nature of crimes and its rate of occurrence and distribution in Arizona, but not comparisons of agencies or causes.

CRIME RATE — A figure which represents the number of crimes committed known to the police for each 1,000 population.

CRIME INDEX — Or Index Crimes, refers to the seven major crimes or Part I crimes, which are: Homicide and Non-Negligent Manslaughter, Rape, Robbery, Aggravated Assault, Burglary, Larceny/Theft, and Auto Theft, and Auto Theft. Note: The "Other Assaults" - simple, not aggravated are not Part I, or Index Crimes, but are collected on the Return A for quality control purposes, and to give a complete picture of total assault activity.

RISK FACTOR — The mathematical probability of being a victim of a crime based on the occurrence rate by population group.

PERCENT OF DISTRIBUTION — The numeric value expressed in percent of the total number of occurrences.

CLEARANCE BY ARREST — The perpetrator of an offense has been apprehended.

CLEARANCE BY EXCEPTIONAL MEANS — The person(s) who committed the offense has been identified, their whereabouts are known but for some reason beyond police control they cannot be arrested. There must also be enough information to support the charge.

PART I OFFENSE — Any of the crimes on form A. These crimes occur most frequently in the United States and subsequently generate the most interest. These crimes are Homicide, Rape, Assault, Robbery, Burglary, Larceny/Theft and Motor Vehicle Theft.

PART II OFFENSE — All crimes other than Part I offenses. We do not report Part II offenses unless the suspect is in custody.

JUVENILE — A person under the age of 18 years.

ADULT — A person 18 years of age or older.

OFFENSES KNOWN — Those offenses that come to the attention of the police by report or investigation.

UNFOUNDED — A reported offense that is found to be false or baseless as the end result of police investigation. (Not the findings of the courts.)

ACTUAL OFFENSE — Those known or reported offenses that actually occurred.

AUCR PROCESS:

Classify - Finding the proper offense category from the available facts.

Score - Counting and recording the number of offenses committed during the commission of an unlawful set of events.

Return or Report - The required forms, from A through F that are submitted by the individual agencies each month, and forms G and H, submitted annually. The entire collection of forms submitted is referred to as the Monthly Return. (See sample forms Appendix B)

Verify or Verification - The process that the Monthly Return goes through to ascertain the accuracy of the contributed information. This verification is performed by UCR personnel on the state level.

Monthly facsimile printout - Reproduces agency input by form. Used to authenticate the accuracy of computer input.

AUCR PERSONNEL:

Field Representative - The designation of commissioned police officers, who travel about the state making personal contact with the individual agencies. This person instructs UCR, verifies and acts as liaison between the state and federal government.

Clerk Verifier - This person verifies returns and acts in the facilitation of any administrative function within the UCR Unit.

Statistician - This individual is responsible for coordinating efforts relevant to computer programming, development of new programs, special studies, preparation of manuals and statistical analysis.

Arizona Revised Statutes

(41-1750 Criminal Identification Section; duties)

- A. There shall be a criminal identification section within the Department of Public Safety.
- *B. The criminal identification section shall:
 1. Procure and maintain records of photographs, descriptions, fingerprints, dispositions and such other information as may be pertinent to all persons who have been arrested for or convicted of a public offense within the state.
 - *2. Collect information concerning the number and nature of offenses known to have been committed in the state, of the legal steps taken in connection therewith, and such other information as shall be useful in the study of crime in the administration of justice.
 3. Cooperate with the criminal identification bureaus in other states and with the appropriate agency of the federal government in the exchange of information pertinent to violators of the law. In addition, the criminal identification section shall provide for the rapid exchange of information concerning the commission of crime and the detection of violators of the law, between the law enforcement agencies of this state and its political subdivisions and the law enforcement agencies of other states and of the federal government.
 4. Furnish assistance to peace officers throughout the state in crime scene investigations for the detection of latent fingerprints, and in the comparison thereof.
 5. Provide information from its records to law enforcement agencies of the state or its political subdivisions upon request by the chief officer of such agency or his authorized representative. Such information shall be used only for purposes of law enforcement.
 6. Provide information from its records to courts, prosecutors or correctional agencies of the state or its political subdivisions upon request by the chief officer of such agency or his authorized representative. Such information shall be used only for purposes of the criminal justice system.
 7. Provide information from its records relating to convictions for public offenses to nonlaw enforcement agencies of the state or its political subdivisions upon request by the chief officer of such agency or his authorized representative, for the purpose of evaluating the fitness of prospective employees of such agency. Such information shall be used only for the purpose of such evaluation.
 8. Provide information from its records relating to convictions for public offenses to licensing and regulatory agencies of the state or its political subdivisions upon request by the chief officer of such agency or his authorized representative, for the purpose of evaluating the fitness of prospective licensees. Such information shall be used only for the purpose of such evaluation.
 9. Provide information from its records relating to arrests or convictions for public offenses to the subject of such information, or to his attorney at the request of the subject, and when accompanied by proper identification.
- *C. The chief officers of law enforcement agencies of the state or its political subdivisions shall provide to the criminal identification section such information concerning crimes and persons arrested for or convicted of public offenses within the state as the chief of the criminal identification section, with the approval of the director, shall deem useful for the study or prevention of crime and for the administration of justice.
- D. Any person who releases or procures the release of information held by the criminal identification section other than as provided by this section, or who uses such information for a purpose other than as provided by this section, is guilty of a misdemeanor.
- E. The chief of the criminal identification section may, with the written approval of the director and in the manner prescribed by law, remove and destroy such records as he determines are no longer of value in the detection or prevention of crime.
- *F. The chief of the criminal identification section, subject to the approval of the director, shall make and issue rules and regulations relating to the procurement and dissemination of information, in the manner prescribed by law.
- G. All non-law enforcement agencies of the state or its political subdivisions may establish by rule, regulation or ordinance the need for fingerprint or background investigations for purposes of employment or licensing and may, thereafter, utilize the criminal identification section of the Department of Public Safety in accordance with subsection F. Added Laws 1968, Ch. 209, § 1, effective July 1, 1969, as amended Laws 1972, Ch. 39, § 1.

(Effective April 6, 1972.)

*Section B2 C, and F directly applies to UCR.
