**Annual Hydrologic Data Report
Volume III: Weather Statistics
Water Year 2012**

PREFACE

This publication presents meteorological data collected by the Flood Control District of Maricopa County (FCDMC) automated ALERT system. Thirty-five telemetered weather stations are included in this report. Thirty-one of the stations are located within Maricopa County, two in Yavapai County, and two in Pinal County.

The weather data contained in this report were collected, compiled, and edited by the Flood Warning Branch of the Engineering Division. The information contained herein is as accurate and complete as possible within the limitations of real-time data collection technology currently available. Wherever possible, footnotes indicating periods of questionable and/or missing data have been added to the appropriate weather summaries. Although every possible means has been taken to provide accurate data, the liability for using this data falls upon the user and not the FCDMC.

This report is Volume 3 of a 3 volume suite entitled “Annual Hydrologic Data Report – Water Year 2012”. Volumes 1 & 2 in order are [1] Precipitation Report; and [2] Surface Water and Streamflow Report. Additional copies of this report, and copies of the companion volumes, may be purchased from:

INTRODUCTION

This publication is part of a three-volume report containing hydrologic and meteorological data collected by the Flood Control District of Maricopa County during Water Year 2012. This report is Volume III and contains weather station statistics. On-line users of this document have additional resources available by selecting hyperlinks. Weather Station names will link to the FCDMC web page for that weather station. Other hyperlinks will link within the document.

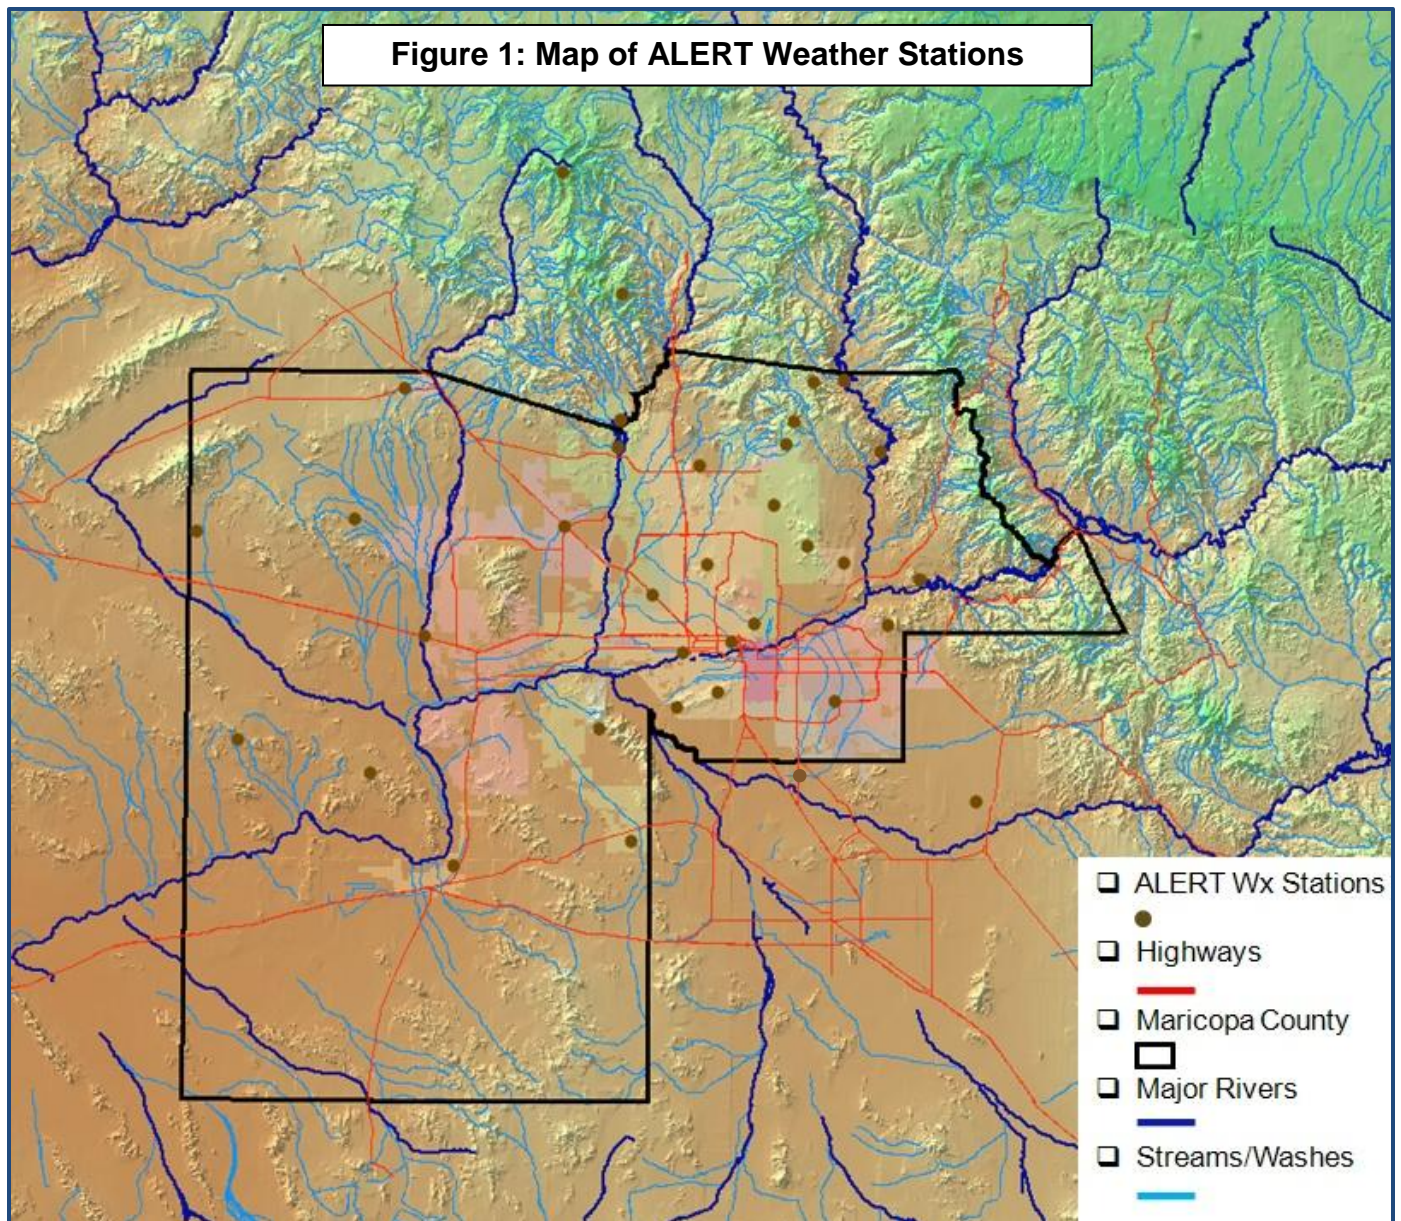

All weather stations report temperature and relative humidity; many also report a combination of wind direction, wind speed, barometric pressure and solar radiation. In addition dewpoint temperature is calculated at all weather stations using the temperature and relative humidity data. The temperature, relative humidity, and wind sensors record data every 15 minutes; the barometric pressure and solar radiation sensors every 30 minutes. Fifteen minute dewpoint temperatures are calculated by the ALERT computer using temperature and relative humidity data.

The following paragraphs describe the arrangement, collection, and compilation of the monthly weather station data contained in this report:

- Weather station data presented in the monthly weather summaries is based on the “2012 Water Year” which began on Oct. 1st 2011 and ended Sept. 30th, 2012. Each monthly summary represents one weather station and lists daily weather station statistics by sensor. The monthly summaries are arranged chronologically by station name.
- An index of ALERT System weather stations, code names, locations, and installation dates is located on [page ix](#). This is followed by a sensor id number matrix listing the available sensors at each weather station. Both indexes are sorted by station name in alphabetical order. Station names are hyper linked to additional weather station information and climate summaries (where available).
- The monthly weather summaries contain daily maximum, minimum, and mean values for temperature and dewpoint. The monthly summaries also contain daily maximum and minimum values for relative humidity and barometric pressure. Finally, the monthly summaries contain daily maximum peak wind and solar radiation values. All of the ALERT System weather stations record precipitation; however that data is located in the [FCDMC Hydrologic Data Report Volume I](#).
- The unit of measurement for daily maximum, minimum, and mean temperature data is in degrees farenheight (°F). The daily maximum, minimum, and mean dewpoint data is in degrees farenheight (°F). The daily maximum and minimum relative humidity data is in percent (rh%). The daily maximum peak wind data is in miles per hour (mph). The daily maximum and minimum barometric pressure is in millibars (mb). The daily maximum solar radiation data is in watts per meter squared (w/m²).
- All data presented in the weather summaries is rounded to the nearest whole value. Additional and/or more detailed sensor data in hard copy or electronic copy is available for the weather station sensors listed in this report. Contact the FCDMC, Engineering Division, Flood Warning Branch at (602) 506-1501. Data can also be downloaded from our web site at <http://www.fcd.maricopa.gov/Rainfall/Weather/weather.aspx>.

Comments or discovered errors in regards to this report should be sent to the Flood Warning Branch via email which can be found on the [FCDMC ALERT System home page](#) or sent directly to Daniel Henz at danielhenz@mail.maricopa.gov.

General Map of ALERT Weather Station Locations as of 09/30/12

New Installations in Water Year 2012

There was one new weather station installed during Water Year 2012

- EMF@ Arizona Ave., precipitation and stream gage site, was upgraded to a weather station, Code # EAA, in June 2012. Sensors 6595 and 6598 were retained at the location. Sensors for Peak Wind (6584), Wind Speed/Direction (6587), Relative Humidity (6593), Temperature (6597), and Solar Radiation (6588) were added at the location and began transmitting data on June 06, 2012. All weather station data for Water Year 2012 are filed under EMF@Arizona Ave.

Station Changes in Water Year 2012

There were no weather stations moved in Water Year 2012.

Flood Control District of Maricopa County

ALERT System Weather Stations WY 2012 – Sorted by Station Name

Station Name	Installed	T-R-S	Latitude	Longitude	Elev.	Location

Summary of Significant Weather Events

The 2012 Water Year produced several abnormally warm and cold periods throughout this past year, but none was more significant than the two week heat-wave that started off the month of August. A short summary of the temperature statistics during this period are provided below. Twenty-four weather stations were chosen to take part in this summary. These stations were chosen namely as they all have periods of operational record greater than 10 years and include calculated climate summaries listed on the [FCDMC Weather Information](#) webpage. These stations vary in location covering the greater Metropolitan Phoenix area within Maricopa County as well as portions of Yavapai and Pinal counties. Station elevations range from 1,050 ft to 7,495 ft. The applicable stations are listed in Table 1 below:

TABLE 1: Daily Mean Temperature Compared to Normal, Aug. 1st-14th period						
Weather Station	Elev. (ft)	POR (yrs.)	Sensor ID	2012 mean Temp. (°F)	Normal mean Temp. (°F)	Diff. (°F)
Bartlett Lake	1,780	12	5912	98.1	90.1	+8.0
Buckeye FRS #1	1,090	16	5282	98.1	94.1	+4.0
Carefree Ranch	2,960	23	4932	92.8	87.6	+5.2
City of Glendale	1,220	17	5522	99.8	93.0	+6.8
Crossroads Park	1,270	17	6622	97.3	91.8	+5.5
Durango Complex	1,050	20	4702	102.1	94.2	+7.9
Estrella Fan	1,455	20	6892	98.7	94.7	+4.0
Fountain Hills Fire Dept.	1,665	16	5952	97.8	91.4	+6.4
Gila Bend Mtns.	1,560	23	5052	98.2	93.6	+4.6
Horseshoe Lake	2,070	12	5892	94.9	88.1	+6.8

Lake Pleasant North	1,750	12	5662	96.1	90.8	+5.3
Magma FRS	1,625	17	6717	94.0	91.1	+2.9
Mt. Union	7,495	23	5382	72.3	68.7	+3.6
Osborn Rd. @ 64th St.	1,255	15	4617	95.8	92.0	+3.8
Pima Rd. @ Jomax Rd.	2,180	16	4672	99.3	90.1	+9.2
Saguaro Lake	1,550	13	6782	96.3	90.1	+6.2
South Mtn. Fan	1,270	19	6562	101.9	95.3	+6.6
South Mtn. Park	2,255	23	6512	95.7	90.8	+4.9
Thompson Peak	3,995	17	5947	93.7	85.4	+8.3
Tiger Wash Fan	1,605	18	5142	97.9	92.3	+5.6
Usery Mtn. Park	2,115	19	6652	97.0	91.8	+5.2
Wickenburg Airport	2,385	19	7122	92.5	88.0	+4.5

Table 1, on the previous page compares temperature data at 24 ALERT weather stations during the period encompassing August 1st through 14th. The left side of the table includes weather station information including elevation, period of station record (POR), and the four digit temperature sensor id number. The right side of the table includes the 2012 mean temperature, the normal mean temperature, and the temperature difference from the mean (anomaly) over the two week span. Values highlighted in red, within the 2012 mean temperature column, represent new or matched records for the period.

During the period from Aug. 1st through the 14th 2012 each one of the 24 weather stations experienced an above average mean temperature when compared to that station's normal mean temperature. Perhaps even more significant, 16 of the 24 weather stations (75%) matched or set records for the warmest mean temperature during that two week span. Looking at the temperature anomalies, departures from the mean, 14 of the 26 stations experienced a 5.0°F or greater warm anomaly during the period.

Going a step further, standardized anomalies were calculated at each station (not shown) to remove station biases. Twenty-one of the 24 station's standardized anomalies exceeded 1.5 times the normalized standard deviations at their respective stations and ten of which exceeded 2.0. To quickly try and put that in perspective a standardized anomaly value was calculated for the Durango Complex station over the same time period last year, the hottest month of August on record in terms of mean temperature. The results are shown below in Table 2.

Year	Mean Temp. (°F)	Diff. (°F)	Standardized Anomaly
2012	102.1	7.79	2.84
2011	99.5	5.29	1.93

Taking a closer look at various other temperature statistics at the Duragno Complex weather station data revealed that the mean temperature for the period bested the old record, set in 2011, by 2.6°F. The average daily high temperature was 113.7°F and the average daily low temperature was 90.1°F. For a 9 day span lasting from the 5th though the 13th the temperature never dropped below 90°F. For 13 days in a row (2nd-14th) the average daily high temperature reached or exceeded 110F. While short periods of record breaking heat are not uncommon to the region during late summer, the prolonged nature of incessant excessive heat lead to quite a rare and unique event. A complete meteorological write-up detailing the unique weather pattern and observational data from Phoenix Sky Harbor Airport weather station can be found [here](#).
